Table of Contents

List of Tables.....	iv
List of Graphs.....	viii
List of Maps.....	ix
Abbreviations.....	xi
Foreword.....	1
Introduction.....	2
Executive Summary.....	5
CHAPTER ONE: EQUITABLE ACCESS.....	12
1.1 Pre-Primary Education Program.....	12
1.1.1.Pre-Primary Institutions.....	12
1.1.2. Enrolment in Pre-Primary Education.....	15
1.1.3. Gross Enrolment Rates in Pre-primary Education.....	19
1.2 Equitable Access in Primary Education.....	22
1.2.1. Number of Primary Schools.....	22
1.2.2. Primary Education Enrolment.....	31
1.2.3. Primary Education Enrolment Rates.....	54
1.2.4. Primary Gender Equity in the Last Five Years.....	76
1.3. Equitable Access in Secondary Education.....	79
1.3.1. Number of Secondary Schools.....	79
1.3.2. Student Enrolment in Secondary Schools.....	84
1.3.3. Secondary Schools Enrolment Rates.....	93
1.4. None Formal Education.....	104
1.4.1. Alternative Basic Education /ABE/.....	104
1.4.2 Integrated Functional Adult Literacy/IFAL/ Program.....	109
CHAPTER TWO: EDUCATION QUALITY.....	113
2.1. Quality Indicators in Pre-Primary Education.....	113
2.2. Quality Indicators in Primary Education.....	115
2.2.1. Teachers in Primary Education.....	115
2.2.2. Different Ratios in Primary Education.....	124
2.3. Alternative Basic Education Facilitator.....	148
2.4 Quality Indicators of Secondary & Preparatory Education.....	149
2.4.1. Secondary & Preparatory Education Teachers, Principals and Vice Principals.....	150
2.4.2. Different Ratios in Secondary and preparatory Education.....	167
2.4.3. Secondary and Preparatory Schools Facilities.....	176
CHAPTER THREE: EDUCATION INTERNAL EFFICIENCY.....	197
3.1. Primary Education Internal Efficiency.....	197

3.1.1. Internal Efficiency and Flow Rate.....	200
3.2. Primary Education Cohort Analysis	217
3.2.1. Internal Efficiency of the Cohort in Primary Education.....	223
3.2. Secondary Education Promotion, Dropout and Repetition Rates	232
3.3. National and Regional Exam Result	236
3.3.1. Regional Exam Results	236
3.3.2. National Exam Results.....	237
Chapter Four: Tertiary Education.....	240
4. College of Teachers Education (CTE).....	240
4.1 Enrolment in Diploma Program	240
4.1.1 Enrolment in Regular Diploma Program.....	240
4.1.2. Enrolment in Evening and Weekend Diploma Program	242
4.1.3: College of Teachers Education Summer In-Service Diploma Program	243
4.1.4 Students with Disabilities Enrolled in Diploma Program by College	245
4.2: Pre-Primary Teachers Training Program	245
4.3: Oromia CTEs, Candidate Teachers Attrition	246
4.5. 'CTE's Academic and Technical Staff by Education Level	252
4.5.1. Full-time 'CTE's Academic Staff by Education Level	252
4.5.2. Oromia CTEs Part time Academic and Technical Staff by Academic Rank.....	252
4.5.3. Oromia CTEs Administrative Staff by Education Level	253
4.6. 'CTE's Academic Staff by Education Level and Rank	253
INDICATORS BY WOREDAS.....	254

Foreword

Education is one of the most important investment a country can make in its people and its future. It reduces poverty, boosts economic growth and increases income. It can also promote gender equality, reduce child marriage, and promote peace. It is an essential sector to ensure sustainable development in a given country that enables citizens to participate in democratic, social and political aspects for the betterment of entire society, country and mankind.

To evaluate whether the education is going on the right track or not, there should be an analysis on the education sector performance. Oromia Education Bureau is therefore collects, compiles, analyzes and delivers educational data in such publications on annual basis. Accordingly, this Education Statistics Annual Abstract is also giving emphasis on the provision of relevant and articulated information in all education levels, from preprimary to preparatory, taking place in our region. The charts, graphs and tables in this publication present a relevant and accurate picture of our progress on an annual basis.

This document would likely meet the need of decision makers, planners, policy makers, researchers, developmental partners and other educational stakeholders in providing information regarding educational performance in our region. All key players are welcome to use the information contained in this publication in their endeavors to improve the delivery of education and training in the region. Furthermore; this educational annual abstract gives direction in filling the gaps through different performance indicators of education in the region particularly in improving the quality of education.

Tolla Beriso Geda (Ph.D.)
Oromia Education Bureau
Head

Introduction

Oromia National Regional State Government Education Bureau has been preparing Annual Abstract every year for improving and creating conducive work environment to plan and monitor the provision of quality and relevant education for citizens. As it is well known, we had been launched the preliminary quick abstract containing basic data for the instant utilization till this annual abstract comes to be active. Accordingly, starting from the beginning of this year till now educational data of the year have been collected, encoded and verified at Zonal level then finally verified at Regional level and recently this final annual abstract of the year is compiled and ready for use.

This publication has been written by Oromia Education Bureau EMIS team, edited and commented by higher regional education experts at with the significant support and cooperation of the thousands of educationalists who participated in filling the questionnaires, encoding the data to the StatEduc database at Woreda and Administrative towns level and finally submitted to zone education office. The data was collected based on standard questionnaires designed for pre-primary (KG), Alternative Basic Education, Primary and Secondary education and Integrated Functional Adult Literacy program. This annual abstract contains both descriptive and analytical summaries of equitable access, quality and efficiency of education of our region in detail manner. The data are further disaggregated by the level of education, gender, ownership and localities in order to show detailed educational information of the region. Accordingly, we hope that this publication may provide a basis for monitoring the system and having educational information for decision makers, policy makers, planners and also references for researchers as well.

Finally, EMIS team would like to thank all of our staffs who were involved in data collection, data encoding, and data verification and preparation of this document at school, woreda, administration town and zonal level; because the data collection, entry and verification would not been possible without the substantial contributions of all of you. A special note of thanks is also reserved for all experts of our bureau in general and ICT & EMIS directorate in particular for their cooperative effort on the publication of this document.

I. Data Gathering Process

The Annual School Census (ASC) of 2011, (2018/19 G.C) has covered all educational institutions across the Region. These institutions are distributed in 20 zones, 19 Administrative Towns and 317 districts in the Region. The educational data gathering process has passed through;

- The Regional EMIS team has conducted Training of Trainers (ToT) at regional level for all district education office (DEO), Zonal/Administrative town education offices (ZEO) statistician on how train the respective practitioners to fill the annual census questionnaires properly and the ToT trainees also conducted training for their respective supervisors and school directors at CRC and district level.
- Workshop and training on the ASC questionnaires at District and Administrative town level for CRC supervisors and school principals has been given so as to create awareness about how to fill the questionnaires. With the acquired awareness; questionnaires were filled by school directors within 7 days at school level. Finally, verification and approval of the filled census questionnaires have taken place by respective supervisors and district education office statisticians.
- Supervisors, DEO and ZEO statisticians were overseeing the filling, retrieval and authentication of filled questionnaires by the school directors.
- After the filled questionnaires have been collected from schools, the process of encoding data has been took place at Woreda and Administrative towns for over a maximum of 20 days, depending on the number and size of institutions in each of the Woreda and Administrative towns.
- Subsequently checking, verification, retrieval of authenticated questionnaires and settling conditions for data entry have taken place by the Zonal and Regional EMIS experts.

II. Data Validation and Verification

Data entry had been done by statistician at DEO and Town Administrative Offices under the supervision of the EMIS technical team at zonal level. It has taken place using the enabling tool called StatEduc software that operating on a local area network. During data verification, the data verifiers were checking the error within encoded data and also clear the data accordingly. After data verification at DEO/TEO/zonal level, all the data bases were collected and merged at regional

level to have regional level aggregated data. The last process was data verification & refining at regional level by Zonal statisticians under the supervision of regional EMIS team, so as to clean errors and ensure data quality.

III. Document preparation

After the Regional EMIS team carried out the final validation and verification stage, the 2011(2018/19 G.C) draft preliminary quick education abstract had been prepared and then distributed for directorates of the Regional Education Bureau for timely utilization of the data and comments to validate the data. After the comments were incorporated and data have been matured this Education Statistics Annual Abstract of the yeas has been started to prepared and finally such a comprehensive Regional Education Statistics Annual Abstract has come to appear.

Executive Summary

The Regional Education Bureau gathers, compiles, analyses and disseminates educational information annually that covers all education subsectors i.e. Pre-primary, Primary, Secondary, Non-formal Education and College of Teachers' Education/CTE. In the same phenomenon almost, all education data has been collected from all institutions and then compiled and analyzed in this publication. Students' performance obtained from National and Regional Examination was also analyzed as indicated in the findings. The five years trend of education data and information as well as the summary of key indicators is presented here under;

1. Trend of Equitable Access in the last five Years

As indicated on Table 1 below, the number of institutions was somehow increased most specifically in primary and secondary schools, as one can see from the table the Average Annual Growth Rate (AAGR) of these institutions were 5.88% and 1.99% for primary and secondary schools respectively. Whereas, AAGR of ABE centers was negative because the number of institutions was less in the final year than the baseline, the decreasing of AAGR may be natural because one can judge that the missed ABE centers may be upgraded to regular schools, however the issues have to be identified by research whether those centers were upgraded to regular schools or closed by other reasons.

As shown in table 2 below, enrolment has been significantly increased in the last five years, 2007 to 2011 91014/15-2018/19 G.C) in some sub-sectors such as in pre-primary, primary and secondary with the AAGR of 4.97%, 3.15% and 8.23% respectively.

Regarding to five years trend of access rates, specifically related to GER, the AAGR of gross enrolment rate of all levels were increased. However the GER growth rate of pre-primary, upper primary (grade 5-8), secondary grade 9-10, and preparatory grade 11-12 were magnificently higher than the rest and that was 6.03%, 3.16%, 3.14 and 11.61% respectively.

I. Number of Institutions

Table 1: Five Years Trend of Number of Institutions

Five Years Trend of Number of Institutions, 2007-2011 (2014/15-2018/19 G.C)						
Institutions	Year					AAGR
	2007	2008	2009	2010	2011	
Kindergartens	1543	1631	1657	1726	1819	3.35%
"O-class"	9817	11180	11216	10729	11362	2.97%

	5_8	59.2	46.8	62.5	50.7	63.9	51.8	67.6	54.3	69.4	56.0	3.16%
	1_8+ABE	95.0	86.8	104.9	98.2	104.4	97.5	106.8	99.4	105.8	98.3	2.15%
Secondary	9_10	36.2	17.5	37.5	17.9	38.1	17.5	41.00	18.9	42.41	19.6	3.14%
	11_12	8.1	4.5	9.2	5.2	9.8	5.6	9.97	5.2	14.48	8.0	11.61%

Graph 1: Five Years Grade 1 AIR and NIR Trend

As the Graph 1 above shows, the five years grade 1 trend of AIR were above 100%, it means that most of the children joined the system at early or late the official school age. In the same way the NIR was also reveals the same trend as well, except in 2007 (2014/15 G.C)

Graph 2: Primary Education GER Five Years Trend

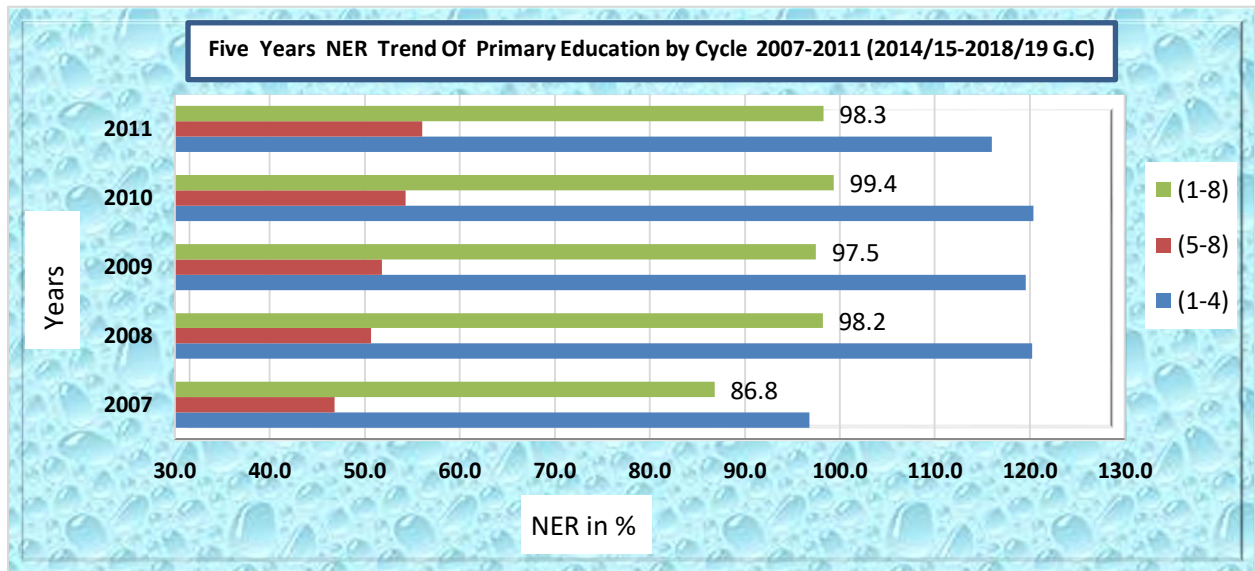

As observed from the graph 2 above, the Grade 1-4 Regional GER was enumerated as 126.1% by 2007 (2014/15 G.C) and increased to 140.9% by 2011 (2018/19 G.C). It is clearly seen from the graph that, the rate is inflated because of over aged and under aged children in the system.

As Graph 2 and Graph 4 shows, the AAGR of Gross Enrolment Rate of primary and secondary first and second cycles were 2.23%, 3.16%, 2.15% 3.14%, and 11.61% respectively for grade 1-4, 5-8, 1-8, 9-10 and 11-12. As one can observe from the figures the growth rate of grade 5-8, grade 9-10, and grade 11-12 were exceed from the rest.

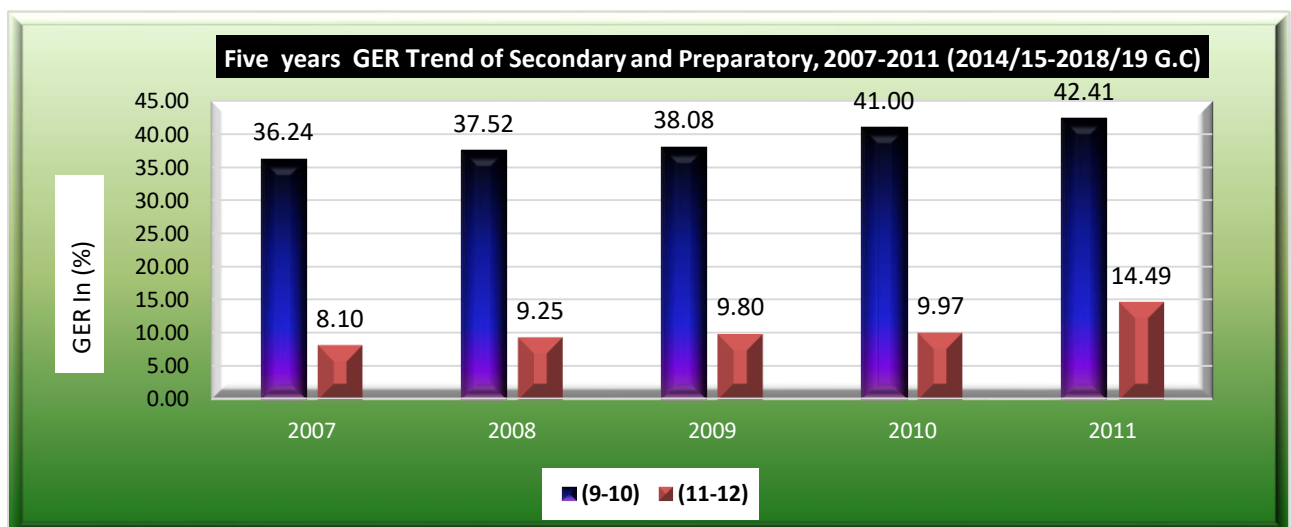

Regarding to Grade 5-8 the Regional GER was 59.2% in 2007 (2014/15 G.C) and slight increased to 69.4%, as the data indicates, large number of the students enrolled in primary first cycle were left the system before without joining the second cycle primary. So, the issue needs farther investigation in figuring out why this was happened and putting the remedial action for the gap shown. As one can observe from the graph, the GER of Grade 1-8 inclined from 95.0% in 2007 (2014/15 G.C) to 105.8% in 2011 (2018/19).

As shown from Graph 3 and Graph 5, the Net Enrolment Rate differs in increments in primary and secondary first and second cycle, from the starting year 2007 to final year 2011, however when we look at the AAGR of all primary and secondary schools' grade 1-4, 5-8, 1-8, 9-10 and 11-12 the growth rate was 3.69%, 3.67%, 2.52%, 2.29% and 12.20% respectively. As we observe from the figures the growth rate of grade 1-4 and grade 11-12 were a little bit higher than the others.

CHAPTER ONE: EQUITABLE ACCESS

1.1 Pre-Primary Education Program

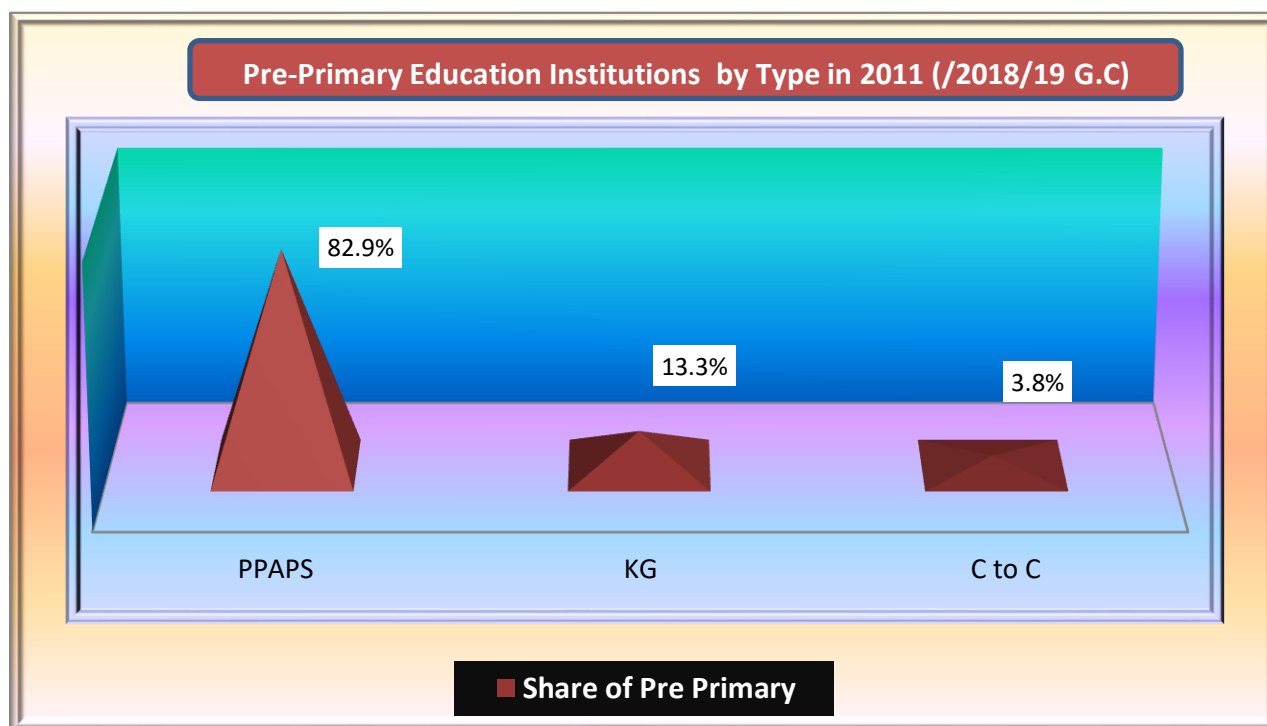

Over View of Pre-Primary Education Program

Education which is delivered for children of four to six years old before they enter formal schools is called pre-primary education. Pre-primary education is provided through different methodologies including kindergartens, “O-class” and child to child programs. Kindergartens are predominantly operated by communities and non-governmental organizations such as faith-based institutions mostly in urban area. Government has been involving in pre-primary attached to primary schools (“O-class”) and child to child programs to address disadvantaged rural children of the level. In this regard Oromia Education Bureau recently embarked on development of the pre-primary sub sector since constructive impact on further learning in primary education and beyond significantly dwells on Early Childhood Development (ECD) education. Developments have been under taken to boost the performance in this subsector to achieve EFA goals; for instance, the development of the early childhood curriculum & teacher training are among the efforts made.

1.1.1. Pre-Primary Institutions

There were 13,702 (1,819 KG, 11,362 PPAPS and 521 C to C) pre-primary institutions those responded to the 2011 (2018/19 G.C) ASC. The number of the former two institution has increased and the number of latter institution has decreased when compared with that of 2010 (2017/18.G.C). Accordingly, the number of KGs and ‘o-classes’ have increased from 1,726 to 1,819 and 10,729 to 11,362 respectively; whereas the number of Child to Child centers has decreased from 655 to 521. Graph 1.1.1 below also shows that among 13,702 pre- primary delivery institutions in 2011 (2018/19 G.C) the majority (82.9%) were pre-primary attached to primary schools (PPAPS) followed by KG (13.3%) and then Child to Child centers (3.8%).

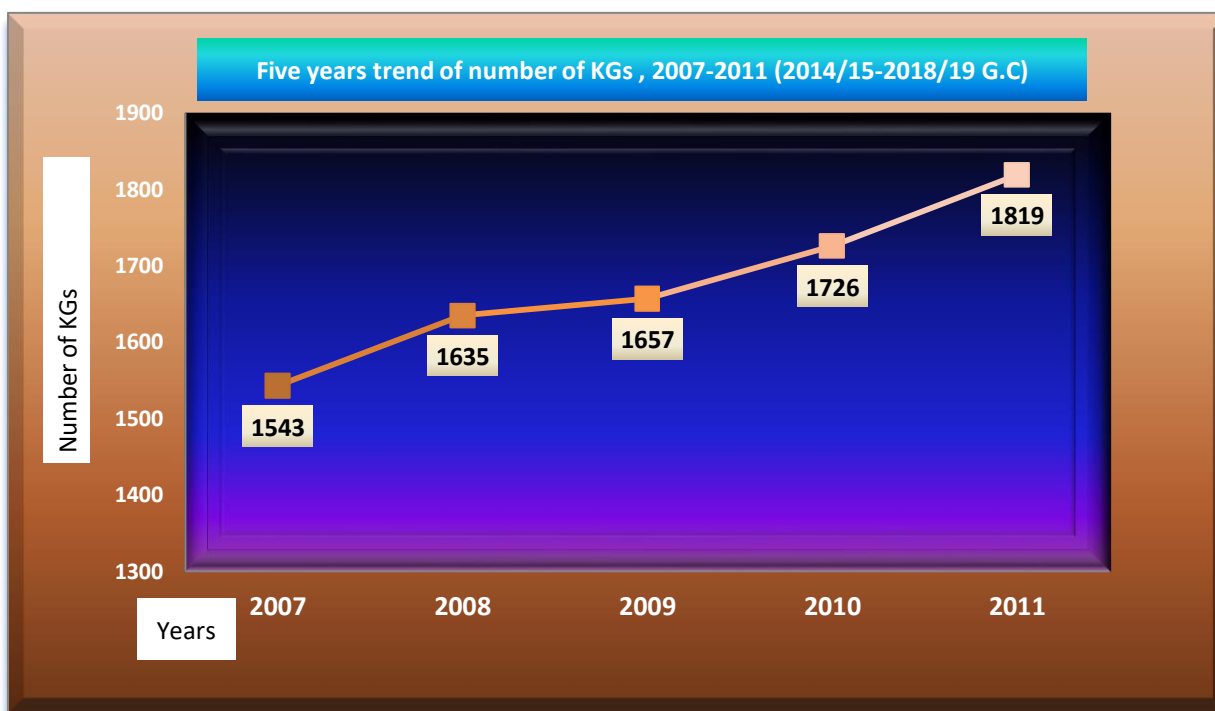

Graph. 1.1.1: Pre-PRIMARY EDUCATION BY TYPE

Since the development of the ECD curriculum was introduced, there is a direction that all Government primary schools have to conduct the PPAPS program. Based on the National Policy for ECD, Oromia Education Bureau has been put in to practice since 2002 to benefit vulnerable and disadvantaged children of age 6 who do not have access to kindergarten by annexing it to public primary schools especially in rural areas for one year. That is why most of primary schools in the region 77.1% were involved in the implementation of program as annexes. But still 22.9% of primary schools were not implementing the program in 2011 (2018/19 G.C) for their own reason that needs due attention by the concerned body to benefit children of this age.

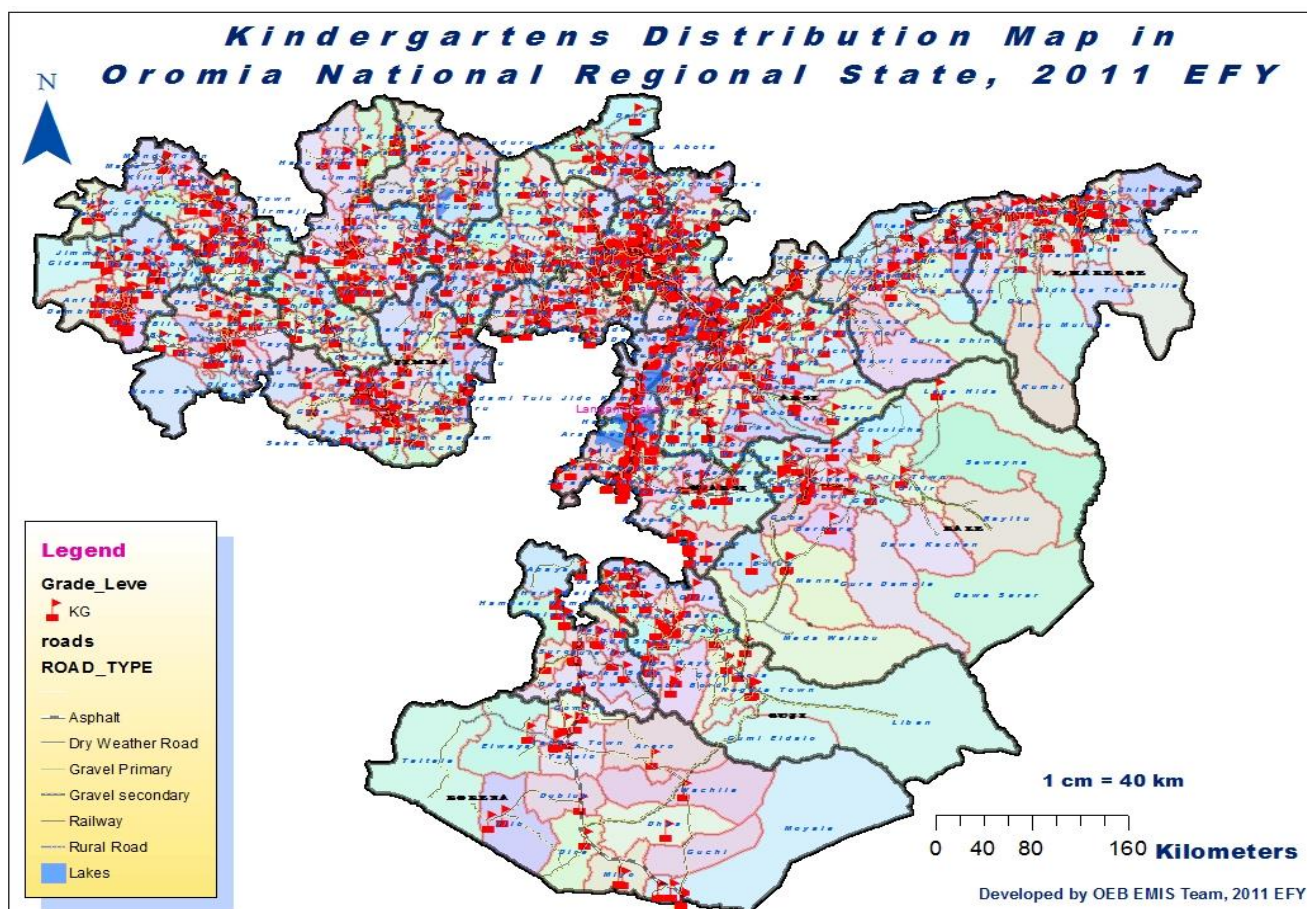

The other modality to benefit children of age 4-6 is engaging them in Kindergartens. The number of these institutions has shown increment from year to year. Accordingly, there were 1,543 KGs in 2007 and increased to 1,819 in 2011 (2018/19 G.C). Graph 1.1.2 below also shows five years trend of number of KGs.

Graph 1.1.2: Trend of Number of Kindergartens

Regarding distribution, most of KGs are concentrated in urban areas of the region mainly owned by private and non-governmental organizations. Map 1.1.1 below shows the distribution of KGs those their location data have collected in 2011 (2018/19 G.C). As can be seen on the map most of KGs in the Region are located in urban areas and along the main roads. As we can observe from the distribution map; all zones and administrative towns in general and Zones like Buno Bedelle, Horo Guduru Wollega, Ilu Aba Bora, Borena, West Guji, East Wollega, Bale, South West Shoa, West Hararge and North Shoa zones need due attention in increasing access of kindergarten schools in all unreached woredas.

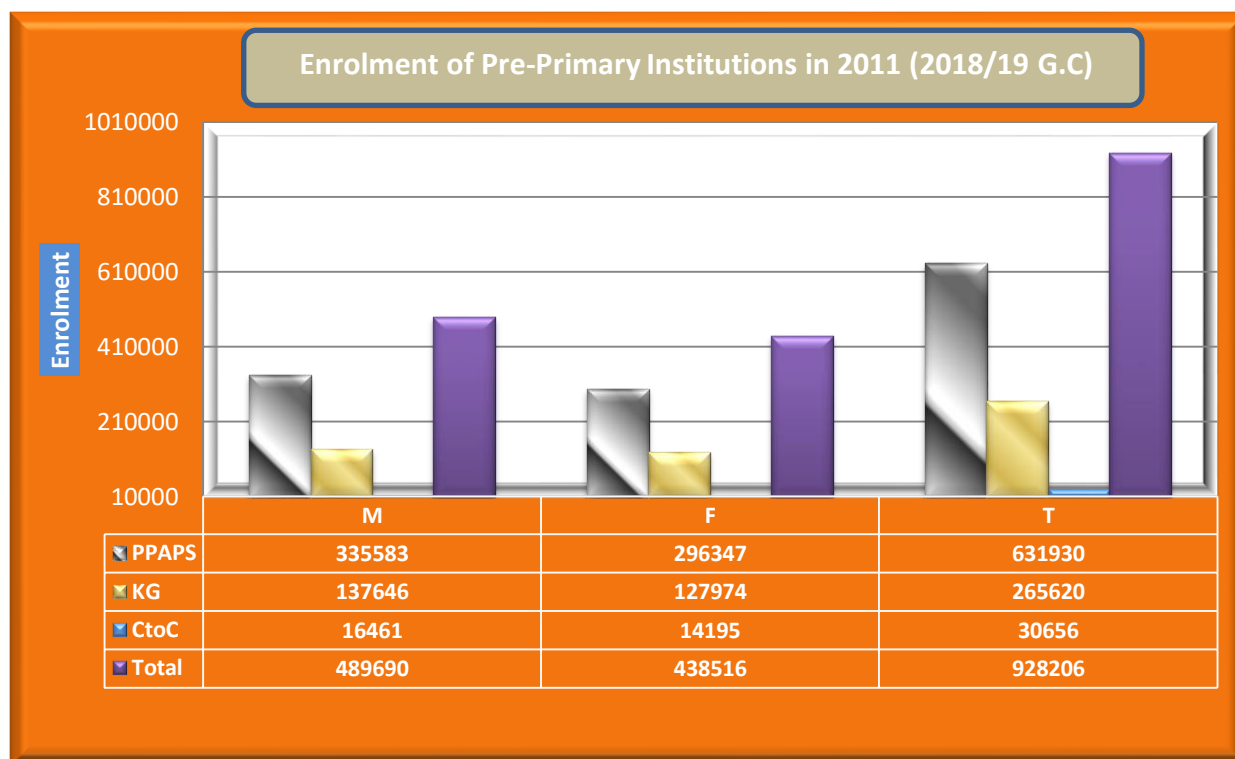

Map 2.1.1: Kindergarten Schools Location Map at Regional Level

1.1.2. Enrolment in Pre-Primary Education

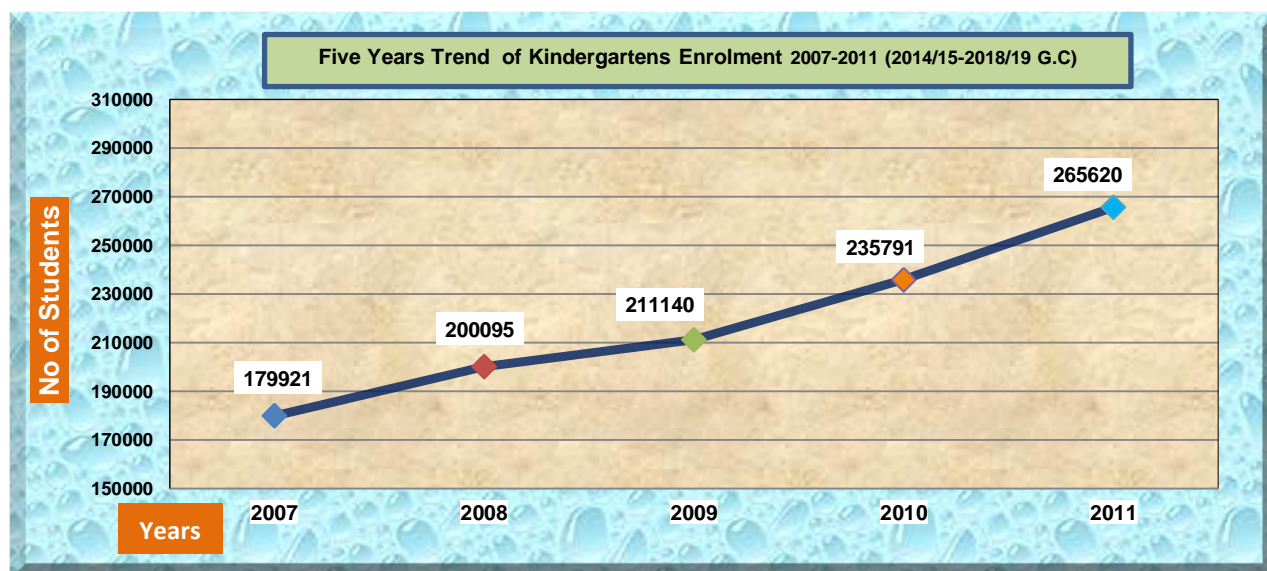

Graph 1.1.3 below shows that the total number of enrolments of pre-primary education in 2011 is 928,206 with 52.8% of total is boys. Of these, the share of PPAPS enrolment reaches 631,930 (68.1%) followed by KG which was 265,620 (28.6%). The enrolment share of C to C centers for preprimary education is 30, 656 (3.3%).

Graph.1. 1.3: Enrolment of Pre-Primary institutions

Graph 1.1.4 below shows five years trend of KG enrolments. Accordingly, the number of KG enrolments has increased from 179,921 in 2007 to 265,620 in 2011 (2018/19 G.C)

Graph 1.1.4: Trend of Enrolment of Kindergartens

Although the number of children enrolled in preprimary education has been improving from year to year, it needs to be moved forward faster to improve the low GER of the sector as compared to the large population of pre-primary school age children. Table 1.1.1 below shows the SAP of pre-primary, number of enrolled children and GER of pre-primary education. It indicates that most of children are still out of preprimary schools and the GER is still very low. Policies and strategies need to be designed and implemented in the period Growth and Transformation Plan of Education sector, to achieve the desired goal.

1.1.3. Gross Enrolment Rates in Pre-primary Education

GER of pre-primary education is defined as the percentage of total number of children in the level irrespective of age out of the total population of 4-6 age children in the region or in a given zone.

The Gross Enrolment Rate (GER) for Kindergarten (KG), Pre-Primary Attached to Primary Schools (PPAPS) and Child to Child program in 2011 were 8.5%, 20.2% and 1.0% respectively. The average GER of preprimary education at regional level in the year have reached 29.6% (M= 30.9%, F= 28.3%). As indicated in graph 1.1.5 below the preprimary GER is different from zone to zone. The majority of zones in the region have lower pre-primary GER and the most three are Guji, West Guji and West Wollega by having 19.0%, 20.0% and 21.0% respectively. On the other hand only two Zones (Jima and East Shoa) have pre-primary GER greater than the regional average by having 31.2% and 34.1% respectively.

Graph. 1.1.5: Zonal Comparison of Pre-primary GER

Regarding Administrative towns all of them have pre-primary GER greater than the regional average. As indicated in graph 1.1.6 below except Bishan Guracha 18 Administrative towns in the region have pre-primary GER greater than 100%. Especially the pre-primary GER of Administrative towns like Sebeta (630.2%), Burayu (360.1%) , Dukem (357.6) and Lega Tafo Lega Dadi (319.9%) exceeds 300% . The reason why these Administrative towns' pre-primary GER exceeds 300% has to be identified through research.

Graph. 1.1.6: Administrative Towns Comparison of Pre-primary GER

1.2 Equitable Access in Primary Education

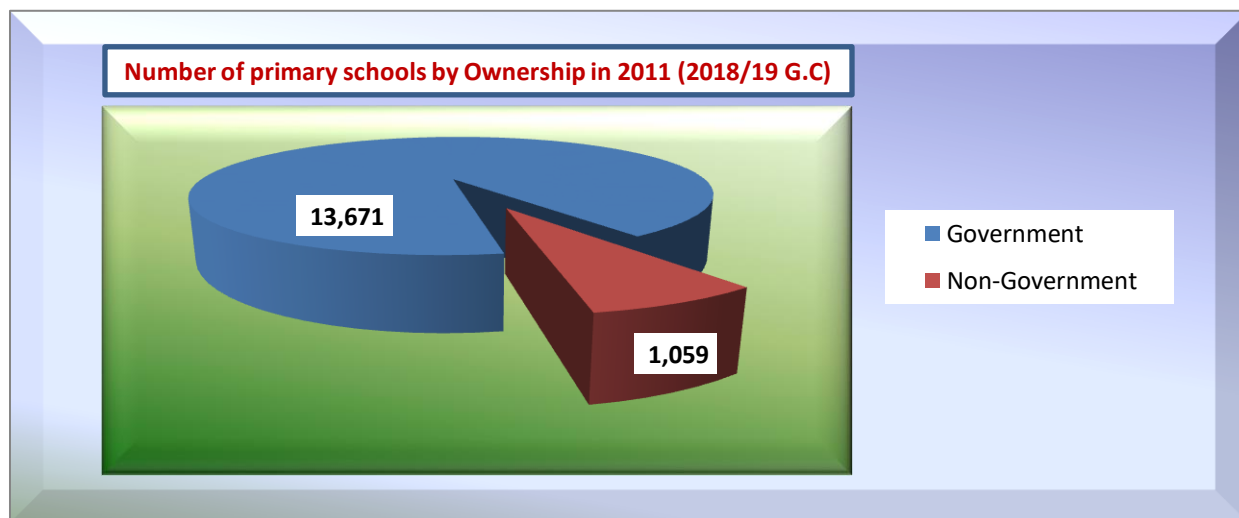

In Ethiopia, primary education is defined as education in Grades 1-8 that can be categorized in to two cycles; primary 1st cycle (grades 1-4) and primary 2nd cycle (grades 5-8).The program is normally designed on a unit or project based on basic education to develop pupils' ability to obtain and use information they need, about their home, environment/community or the country.

1.2.1. Number of Primary Schools

I. Number of Primary Schools by Ownership, Cycle & Number of CRCs

In 2011 (2018/19 G.C.) the number of primary schools in the Region has reached 14,730 as compared to 14,519 primary schools in 2010 (2017/18 G.C.) with an increment of 211(1.47%). As shown in Graph 1.2.1 below among 14,730 primary schools 13, 671 (92.8%) were government owned where as the rest 1,059 (7.2%) non-government organizations. Specifically, there were 721 private, 160 churches, 69 missions, 39 mosques, 39 local community/public, 16 international community and 24 other than these schools in the region.

Graph. 1.2.1: Number of Primary Schools by Ownership

On the other hand, table 1.2.1 below also shows the number of primary schools in each Zones and Administrative towns by ownership cycle. At regional level; out of 14,730 primary schools 3,741 are primary first cycle (grade 1-4) and 10,989 are primary second cycle (grade 5-8) schools.

II. Geographical Locations of Primary First Cycle (Grade 1-4) Schools Distribution in the Region

Map 1.2.1 Primary First Cycle Geographical Locations in the region

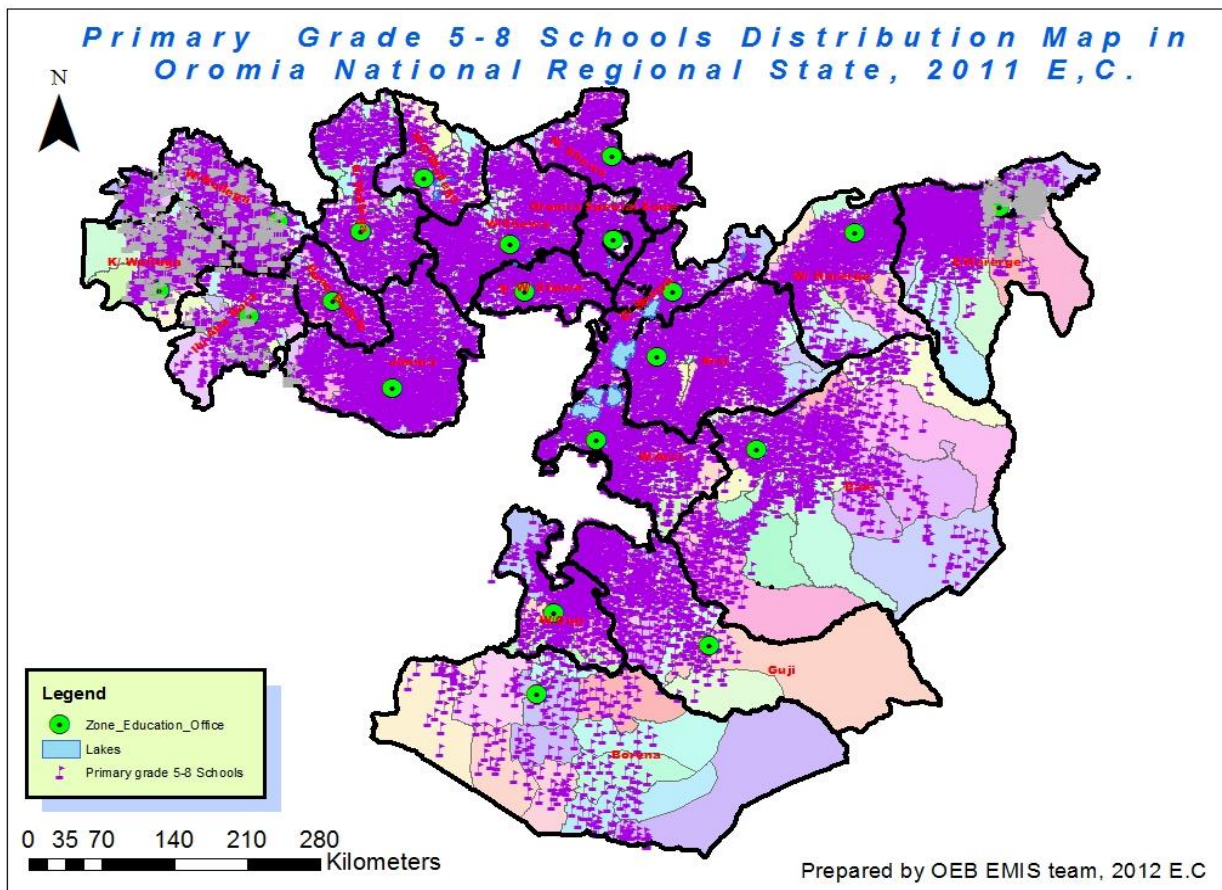

Map 1.2.1 above, shows the distribution of primary 1st cycle (Grade 1-4) schools in the Region. As we can see from the map primary first cycle schools are very dense in Northern and central parts of the region, whereas scattered in the South East areas of the region for those areas are dominantly resided by pastoralist society.

As the map indicates, most of pastoral areas are still unreached to primary 1st cycle within 3 km buffer zone; in order to achieve government policy “every child has not to move more than 3 km from his/her home for schooling.” So, support and attention of government and stockholders is needed to access those pastoral areas for schooling.

Primary Second Cycle (Grade 5-8) Schools Distribution

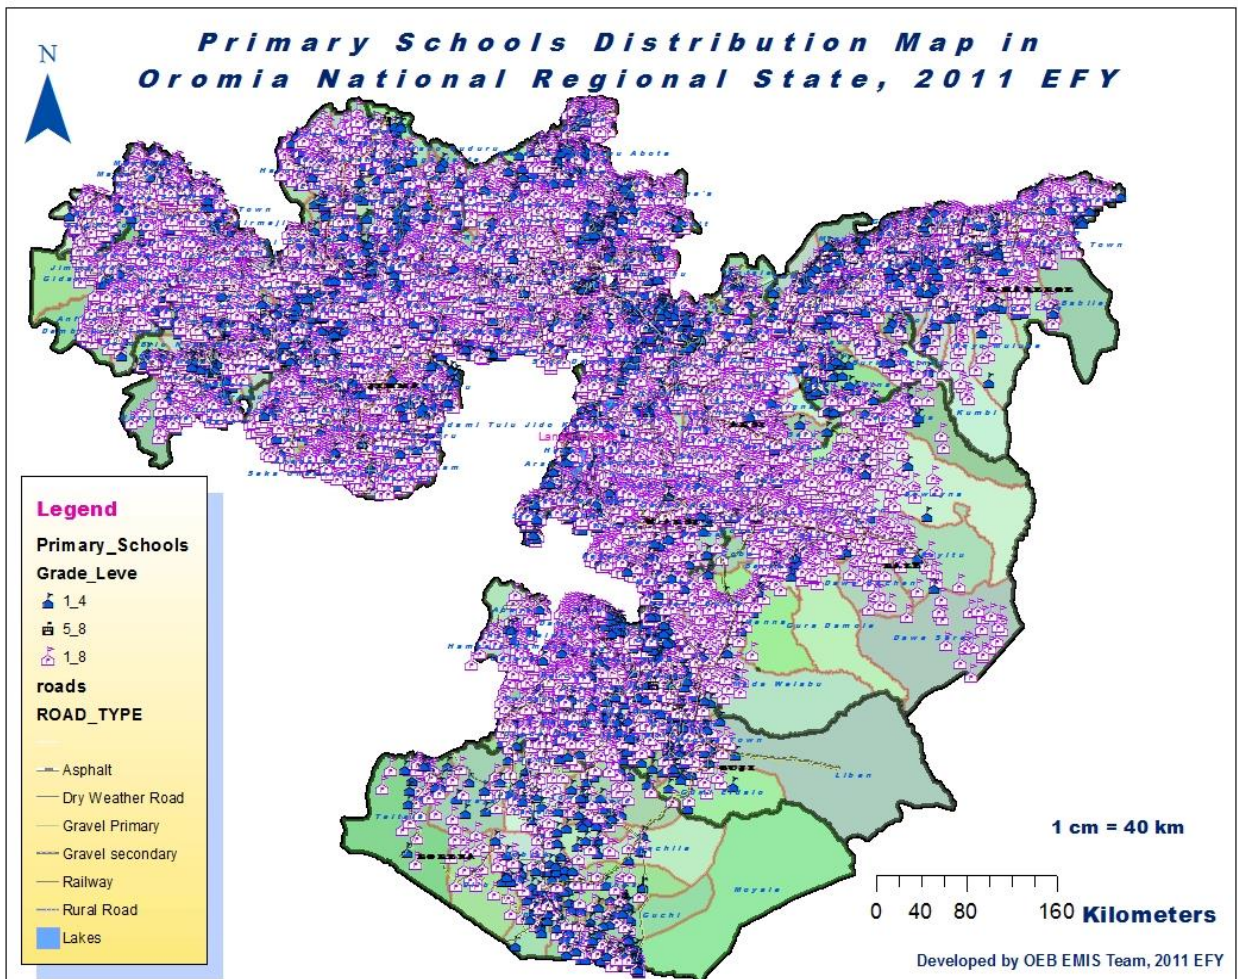

Map 1.2.2 Primary Second Cycle Schools Geographical Locations in the region

Map 1.2.2 above shows the distribution of primary 2nd cycle schools in the Region. As we can see from the map the schools are dense in central and North East as well as Western areas of the region, whereas as scattered as primary 1st cycle schools in other areas. The point data on the map shows schools by grade level with different color for (Grade 1-5, Grade 1-6, Grade 1-7, Grade 5-8 and Grade 1-8), and the map also shows the accessibility of road to the schools.

All Primary (Grade 1-8) Schools Distribution in the Region

Map 1.2.3 Primary schools (Grade 1-8) Geographical Locations in the region

Map 1.2.3 above shows the distribution of all primary schools having grade level (1-8) in the Region. As we can see from the map the schools are highly dense at central, North East and North West areas of the region, whereas scattered in Southern part of the region. The map also shows the accessibility of major roads to the schools. As the map indicates, most of pastoral areas are still unreached of primary schools within 3 km buffer zone, so that it needs special attention from concerned bodies.

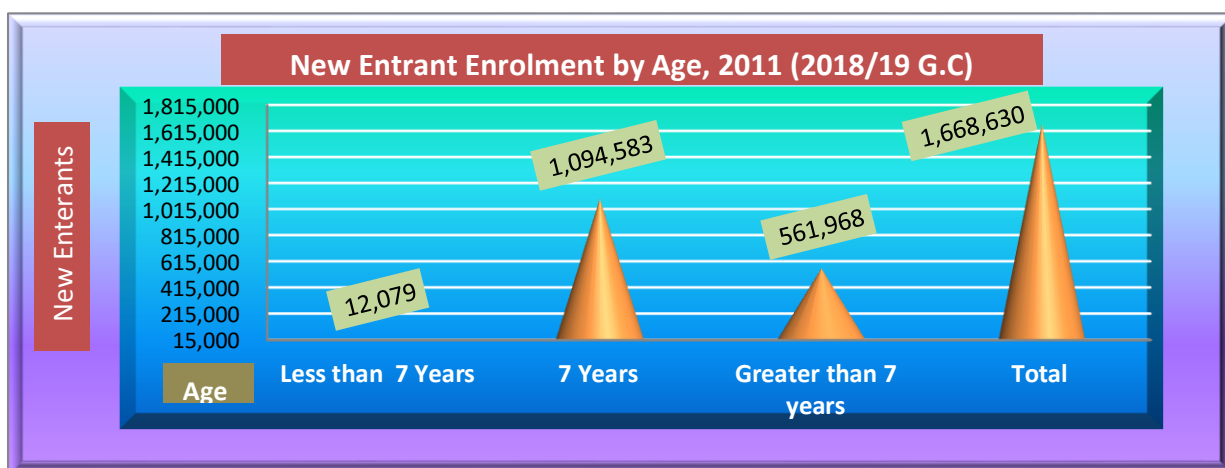

1.2.2. Primary Education Enrolment

1.2.2.1. New Entrants to Grade one in Primary Education

I. New Entrants by Age

Alike the previous year's publications the Annual School Census of 2011 E.C was accompanied by the collection of data of new entrants to grade one by age. The government recognized the official school beginning age as 7 year and it's upon this that the findings in the figure below are summarized.

Graph 1.2.2. New Entrant Enrolment by Age

In 2011 (2018/19 G.C.) a total of 1,843,016 (M= 987926, F=855,090) children have registered in grade one of which 1,668,630 were new entrants (893,247 Males and 775,383 Females) to start their schooling for the first time. This accounts 90.4% of the total enrolment of grade one in the year. It is possible to observe from graph 1.2.2 above that among the total new entrants in grade one, the biggest number of new entrants 1,094,583 (65.6%) is belongs to children of 7 years old which is the official government recognized age of primary school entry. On the other hand 12,079 (0.72%) and 561,968 (33.7%) children of the entrants were underage and over age respectively.

II. New Entrants by Zone and Administrative Towns

Table 1.2.6 below shows the number of new entrants by age in their respective zones and Administrative towns. Since the number of new entrants depends on the size of population we can't interpret in such away.

1.2.2.2. Primary Grade1-8 Enrolments

I. Primary Enrolment by Grade and Gender

In the 2011 (2018/189 G.C) a total of 8,007,942 (Male 4,341,411 and Female 3,666,531) pupils have enrolled in primary schools in the region. Considering pupil enrolment distribution by grade, higher enrolment figures were registered in lower classes and gradually decreases as the grade goes up. Accordingly, as shown in graph 1.2.3 below grade one enrolment accounts 23% and the share of grade eight is about only 6.1%. In general, the percentage distribution of pupils by class from graph tells us that there is a high dropout rate and repetition rate when we move from grade one to grade eight in the system.

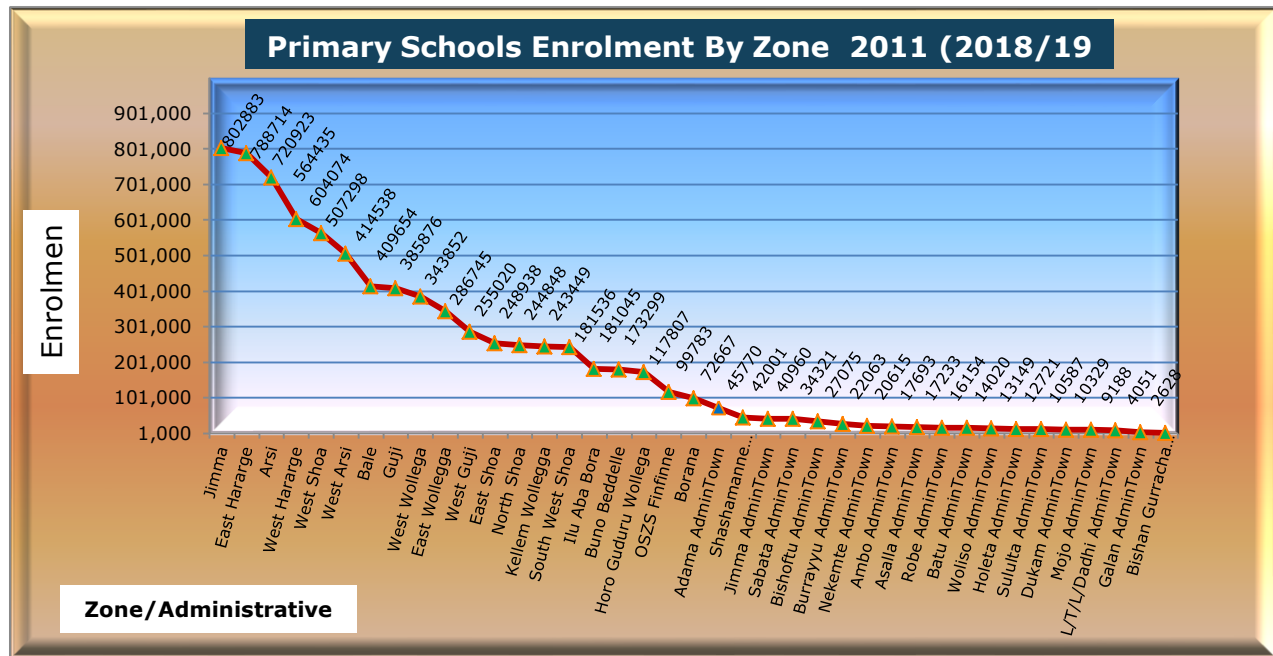

Graph 1.2.3. Percentage of Distribution of Primary Education Enrolment by Grade

II. Primary Enrolment by Zone, Ownership, Locality and Program Mode

Enrolment was categorized according to Zones/ Administrative towns to establish which zones have the highest and/or lowest enrolment rate. Enrolment rate again depends on SAP.

Graph 1.2.4 Government Schools Primary Enrolment by zones/ Administrative towns

Concerning enrolment by ownership of primary schools, the role of government is much greater than that of non-governmental organizations. Graph 1.2.5 below shows that 96.4% enrolment belongs to government schools, while 3.6% of enrolment belonged to Non-Government schools. Enrolment of primary education can be categorized also by locality (urban 78.4% and rural 21.6%), by program mode (regular 99.5% and evening 0.5%) and by language of instruction (Afan Oromo 95.3% and other language 4.7%).

Graph 1.2.5 Primary Enrolment share by Ownership, Locality, Program and Language

1.2.2.3. Enrolment of Children with Special Needs

The issue of special needs data has also addressed in the process of collecting educational data of 2011 (2018/19 G.C) ASC. Graphs 1.2.6 & 1.2.7 below illustrate enrolment with Special Needs by type of disability in primary first and second cycle. In this academic year there were 68,511 (Male 40,575, Female 27,936) Special Needs enrolment in the region. Amongst, 9,765 (14.25%) have partial and sever physical difficulty, 11,138 (16.26%) have partial and sever vision difficulty, 12,578 (18.36%) have partial and sever hearing difficulty and 11,064 (16.16%) have partial and severe mental difficulty. The remaining number of special needs enrolment 23,966 (34.98%) are with types of disabilities such as multi disabilities, autism, communication difficulties, learning difficulties, behavioral and social difficulties. This data indicates that, there are a lot of children with Special Needs who are currently not attending schools throughout the region as comparing to 10% (As UNESCO estimate) of school age population of their level. The above figure, 68,511, accounts only 0.86% of the total primary enrolment in the region. The existence of such large number of students with special needs in the region requires commitments and implementing the already existing inclusive policy and strategy in order to provide them the support of teachers training, physical infrastructure, provision of learning equipment and preparing special schools where it is needed. Therefore, the issue needs our attention to make them getting opportunity to learn in an inclusive environment and keeping their right to learn. Graph 1.2.8 below also shows special needs enrolment percentage with type of difficulties. On the other hand table 1.1.17 below also shows Special Needs enrolment by Zone as well as Administrative towns.

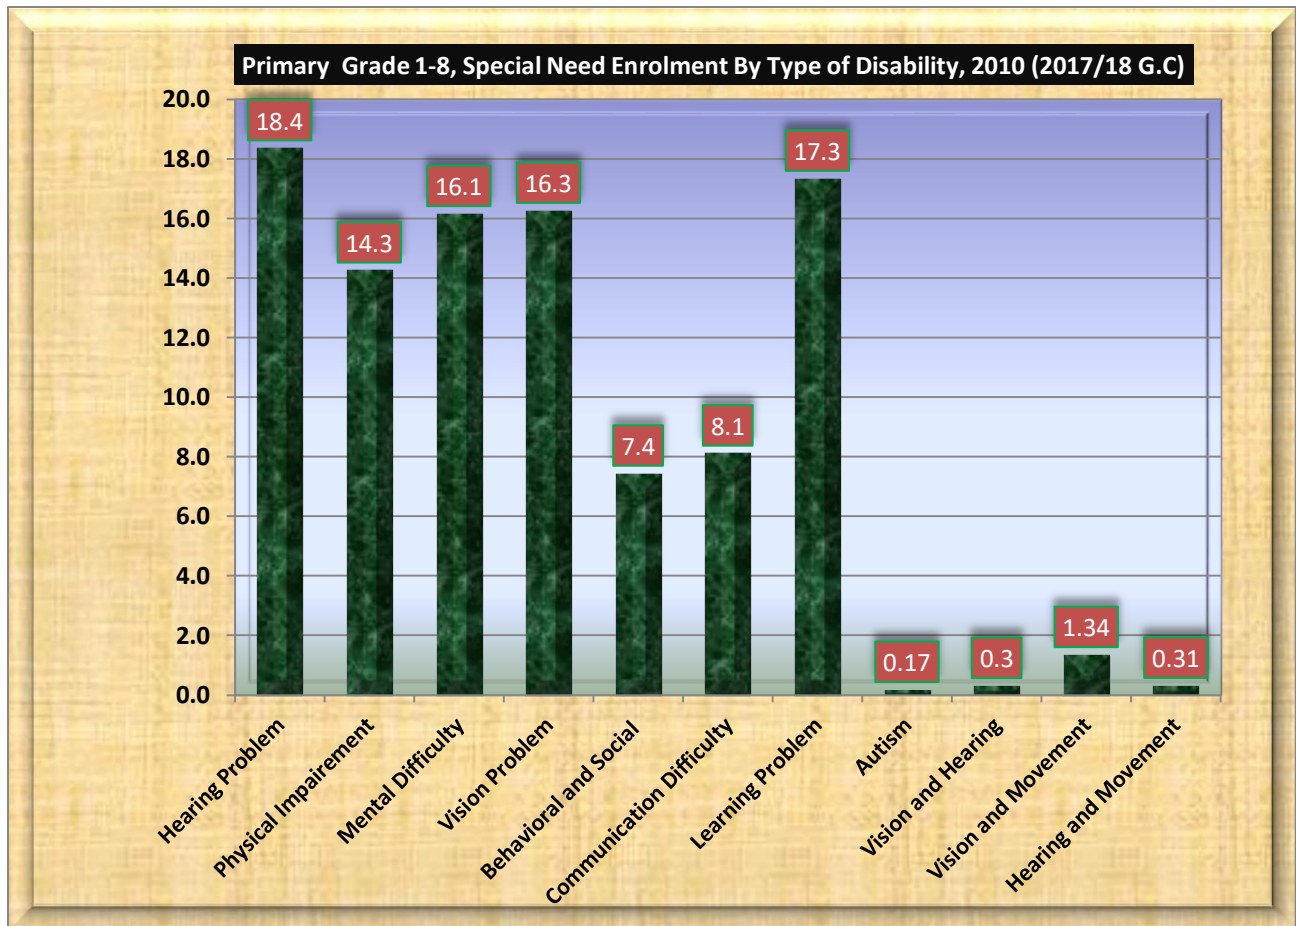

Graph 1.2.6 Primary First Cycle (1-4) Special Need Enrolment by Type of Disability

Graph 1.2.7 Primary second cycle (Grade 5-8), Special Need Enrolment by Type of Disability

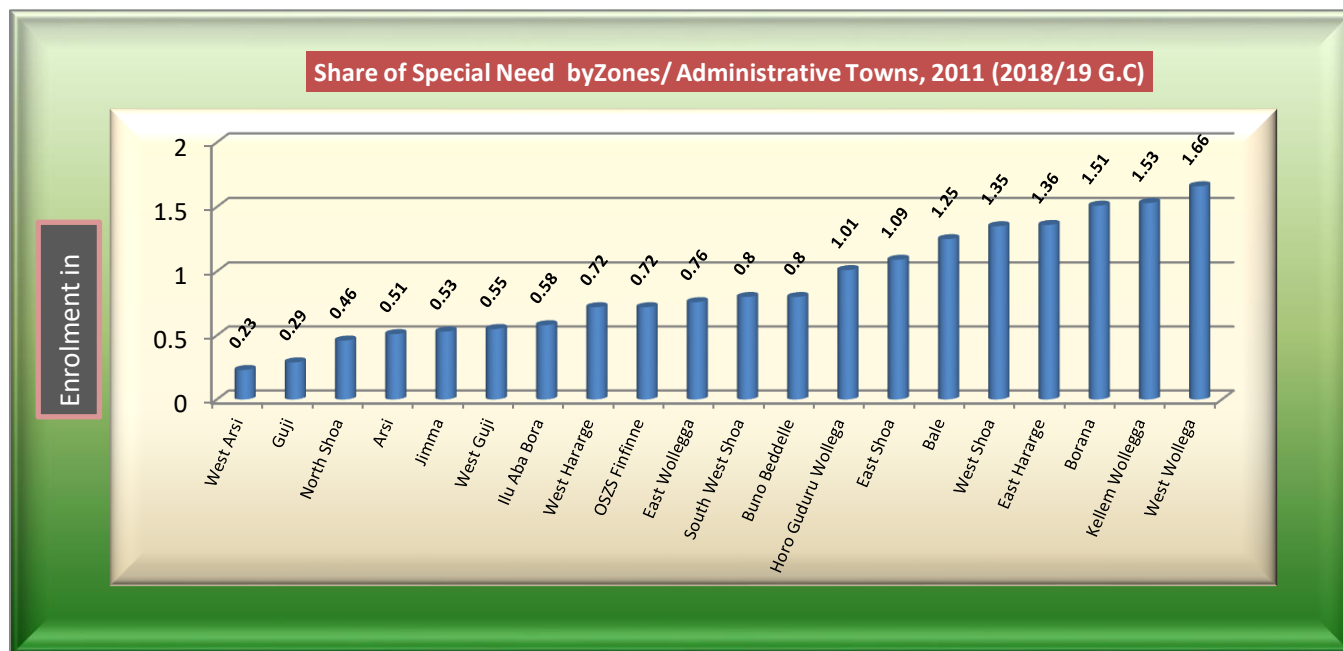

Graph 1.2.8 Primary Grade 1-8, Special Need Enrolment by Type of Disability

Comparison of Primary Education Special Need Enrolment by Zone Administrative Town

As shown in graph 1.2.9 below, the zonal analysis on children with special needs in primary schools shows that West Wollega, Kellem Wollega and Borana have the largest share of special needs enrolment with their respective enrolment which accounts 1.66%, 1.53%, 1.51%. On the other hand West Arsi, Guji and North Shoa zones have the least share of special needs enrolment in respective to their enrolment which accounts 0.23%, 0.29%, 0.46%.

Graph 1.2.9 Zonal Comparison of Primary Special Need Education respective to enrolment

As shown in graph 1.2.10 below, Bishoftu, Gelan and Robe Administrative Towns have relatively the highest share of special needs enrolment that accounts 2.17%, 2.05%, 2.02% respectively when we compare with their respective enrolment. Whereas Bishan Guracha administrative town is the only administrative town with no special needs enrolment.

Graph 1.2.10 Zonal Comparison of Primary Special Need Education respective to enrolment

1.2.2.4. Orphans in Primary Schools

Proportion of Orphans in Primary Schools in the Region

Orphan students are those who have lost both their parents due to different reasons. The 2011 (2018/19 G.C) ASC indicates that there were 49,541 (27,066 boys and 22,475 girls) those have lost both of their parents that accounts 0.62% (boys 0.62% and Girls 0.61%) of the entire pupil enrolled in primary schools. Table 1.1.18 below indicates orphan student in primary schools that among the 20 zones in the region OSZS Finfinne, South West Shoa and West Shoa had the highest proportion of orphans that accounts 1.01%, 1.01% and 0.79% respectively. Concerning the 19 administrative towns Gelan, Burayu and Adama administrative towns have the highest proportion of orphan pupils rating 4.15%, 2.32% and 1.73% respectively. The total number of orphans in the primary education is determined and expressed as a proportion to the total enrolment is indicated in tables 1.2.19.

1.2.3. Primary Education Enrolment Rates

1.2.3.1. Intake Rates

Intake rate is used to indicate the extent of new entrants to the first grade of primary education. It indicates the proportion of children who join the primary education system for the first time in terms of official school age for the first grade. It compares children who come to school for the first time, registered at first grade (grade 1) with children of official school admission age (7 years old children) in the population. Under this umbrella Apparent Intake Rate (AIR), Net Intake Rate (NIR), Early Starters and Late Starters are analyzed.

Apparent Intake Rate (AIR)

AIR is the percentage of new entrants (irrespective of age) in Grade 1, out of the number of children of the official primary admission age 7, in a given year. Sometimes, it is also called the Gross Intake Rate (GIR). AIR tends to reflect those students, who may have not been enrolled in school at the appropriate age, and often reflects the “backlog” of students who could not enrolled before. A high Apparent Intake Rate indicates a high degree of access to the first grade of primary education. The calculation includes all new entrants to first grade (regardless of age). The Apparent Intake Rate can be more than 100%, due to over- and under-aged children entering primary school for the first time and/or due to inconsistencies in population data. Here is the formula to calculate AIR.

$$AIR. = \frac{\text{Number of New Entrants in Grade 1}}{\text{Population at the official school-entrance age}} \times 100$$

Graph 1.2.11 Trend of AIR IN the Last Five Years

As shown on graph 1.2.11 above, AIR of the Region was greater than 100% for the last five years; which was because of over and under age children enrolment. The AIR has been fluctuating from year to year. As the data shows, there are children in the system which have not been enrolled in schools until this year, and often reflects the “backlog” of children who could not enrolled before.

Although the official Ethiopian school entrance age is 7 years old for grade one, children older than the official school age are registered to attain grade one and made Apparent Intake Rate exceeds 100% as can be seen from table 1.2.20 above.

As indicated in the table 1.2.21 above, it is possible to see that, AIR of the region in 2011 (2018/19 G.C) is 165.4% (M=175.4% and F=155.2%). The table also shows that all zones and all administrative towns AIR greater than 100%. Concerning GPI eight zones and two administrative town (Bale, East Wollega, Buno Bedelle, West Gujii, Guji, South West Shoa, West Shoa, East Hararge, West Hararge, Horo Guduru Wollega,, North Shoa, Robe Administrative Town & Batu Administrative Town) have GPI less than that of the regional average (0.89). The remaining Zones and Administrative towns have GPI greater than the regional average.

From the table 1.2.22 above, it is possible to see that a total sum of 1,668,630 new entrants have joined grade one, where 893,247 are Male and 775,383 are female. The largest number of new entrants (65.6%) was children of 7 years old which is the official government recognized age of primary school entry. The data shows that 0.7% of the new entrants were underage whereas 33.7% of the new entrants were overage. (See the above table for more information)

Net Intake Rate (NIR)

Net Intake Rate shows new entrants in the first grade of education system who are of the official school-entrance age, expressed as a percentage of the population of the same age. The calculation requires new entrants in the first grade of primary education which are of the official school-entrance age and population at the official school-entrance age. The method of calculation is as follows:

$$NIR = \frac{\text{New entrant in 1st grade of primary education who are of the official school entrance age}}{\text{Population at the official school entrance age}} \times 100$$

A high Net Intake Rate for primary education of official primary school-entrance age children indicates a high degree of access for official school entrance age to the first grade of primary education

Graph 1.2.12 Trend of NIR in the Last Five Years

As can be seen on graph 1.2.12 above, the trend of NIR in the last five years has been fluctuating at regional level. The graph also shows that NIR of Grade one by 2007 was, 96.2% (M=97.8%, F= 94.6%) and then this rate has move up to 124.8% (M=130.8%, F= 118.8%) by 2008. From 2009-2011 the average NIR has been decreasing to 11.5%, 112.3% and 108.5% respectively.

Table 1.2.23 above also shows the NIR, GG and GPI by Zones and Administrative towns. Among all zones in the region Borena, OSZS Finfine and North Shoa have the lowest NIR (72.2%, 82.3% and 83.4%) respectively. On the other hand nine zones have registered NIR greater than 100% and the top three are West Hararge, Guji and East Hararge by having 133.1%, 126.5% and 125.2% respectively. On the administrative towns side all administrative towns except Bishan Guracha have NIR greater than 100% which is illogical.

1.2.3.2. Primary Education Gross Enrolment Rate (GER)

Gross Enrolment Rate is defined as the enrolment in a specific level of education, regardless of age expressed as a percentage of the official school-age population corresponding to the same level of education in a given school year. GER is a crude measure of education coverage. Since it includes under-aged and over-aged pupils, GER can be greater than 100%, and frequently seen in developing countries to address the backlog of students didn't attend schools because of different reasons, such as financial needs, family issues, or absence of schools.

The data required to calculate GER is, the enrolment in a specific level of education, regardless of age and official school-age population corresponding to the same level of education. The method of calculation is as follows:

$$(GER) = \frac{\text{Total enrolment in a specific level of education, regardless of age}}{\text{official school- age population corresponding to the same level of education}} \times 100$$

GER does not appear to be a good indicator of school coverage. Although early or late entry is a minor issue that all children attend school is most important. Consequently, the GER is often considered as an indicator of the system's physical capacity rather than one of school coverage.

A GER of 100% would not imply that all children are attending school those have not got education due to different reasons yet and doesn't show that the schools have the capacity to educate all children of school age.

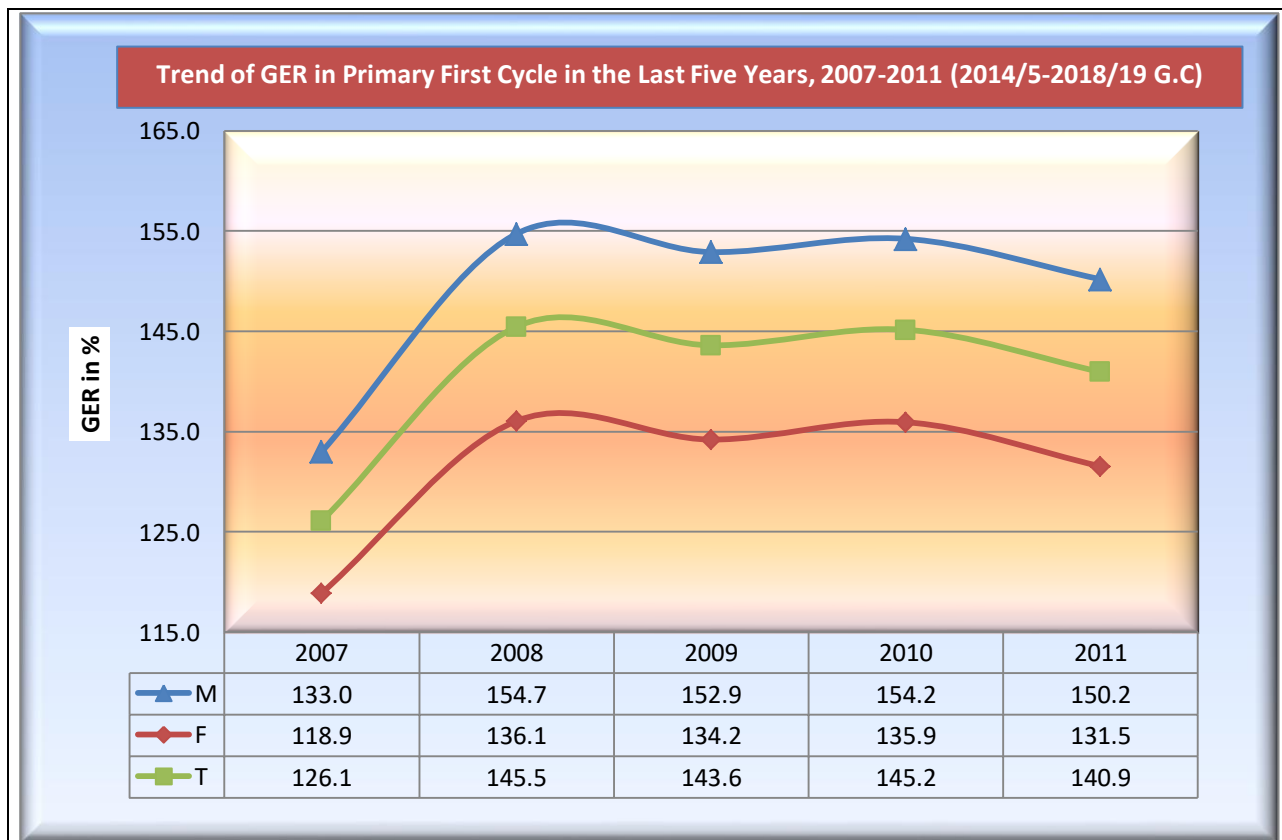

I. Gross Enrolment Rate of Primary First Cycle /1-4/

Gross Enrolment Rate of primary first cycle is the rate calculated simply by dividing the number of students enrolled in first cycle primary (irrespective of their age) by the population of 7-10 years old

$$. \text{Grade 1 - 4 GER} = \frac{\text{All age grade 1-4 enrolments}}{\text{School Age population of age 7-10}} \times 100$$

The Gross Enrolment Rate (GER) of Primary First Cycle /1-4/ education of the year is 145.2% (154.2% for boys and 135.9% for girls). This implies that there is an existence of overage and underage pupils enrolled in primary first cycle schools.

Graph 1.2.13 Trend of GER in Primary First Cycle in the Last Five Years

Graph 1.2.13 above shows, by 2007 (2014/15 G.C) the first cycle primary GER of the region was 126.1% (M=133.0%, F= 118.9%) and significantly increased to 145.5% (154.7% for boys and 136.1% for girls) by 2008 (2015/16 G.C). By 2011 (2018/19 G.C) it has reached 140.9 % (150.2 for boys and 131.5 for girls) by fluctuating from year to year.

It is possible to understand from table 1.2.23 below that the number of over age and under age children in the system has not been decreasing through the time. As the data shows, 11 zones and 2 administrative towns (Bishan Guracha and Modjo) have GER of primary first cycle below the regional average 140.9%. While the rest zones and administrative towns have GER of primary first cycle above the regional average.

Concerning the GPI, eight zones and two Administrative Towns, (Batu & Robe) have GPI less than the regional average which is 0.88. The rest zones and Administrative Towns have GPI equal to or greater than the regional average. Among 19 Administrative Towns 11 of them have GPI greater than or equal to one that implies girls have gotten equal or more access to the first cycle education as compared to boys in those towns.

The other method in analyzing gender issue is comparing the gender gap of the level. Gender gap is expected to be zero, which indicates whether both sexes have got equal chance or not to join school. Negative gender gap indicates female participation is greater than that of male and positive gender gap indicates male participation is greater than that of female. As illustrated in the same table, the regional average GG is 18.66 that tells us the number of male students in primary first cycle exceeds that of female students. On the other hand among all zones and Admin Towns, no town or zone have GG equal to 0. Among the 20 zones and 19 administrative towns in the region, four zones and two Admin Towns of the region have gender gap greater than the regional average which is 18.66%. Gujii, Bale and West Hararge Zones have the highest GG (36.21%, 33.64% and 30.74%) favoring to male whereas Dukem, Lega T/L/Dadhi and Burayu Administrative towns have the highest GG (-97.12%, -67.13% and -37.16%) favoring to female respectively.

Table 1.2.24. Primary First Cycle Gross Enrolment Rate

II. Gross Enrolment Rate of Primary Second Cycle /5-8/

Gross Enrolment Rate of primary second cycle (5-8) is the rate calculated simply by dividing the total number of students enrolled in second cycle primary (irrespective of their age) by the total population of 11-14 years old.

$$\text{Grade 5 - 8 GER} = \frac{\text{All age grade 5 - 8 enrolments}}{\text{School Age population of age 11 - 14}} \times 100$$

Graph 1.2.14 Trend of Primary Second Cycle (5-8) GER in The Last Five Years

As shown on graph 1.2.14 above, the Gross Enrolment Rate of primary second cycle (5-8) shows increment for the last five years. It was 59.2% (M= 62.6%, F= 55.8%), in the year 2007 (2014/15 G.C) and increased to 69.4% (M=76.1%, F= 62.5%) by the year 2011 (2018/19 G.C). As the data indicates the participation of students in primary second cycle is not in a position as it is intended to be and hence needs serious attention. Table 1.2.24 below also shows the GER of the level by zone and administrative town.

Table 1.2.25 Primary Second Cycle Gross Enrolment Rate

As can be seen from the table, 1.2.24 the GER of second cycle primary of 6 zones and 18 administrative towns exceed the regional average which is 69.4% (M=76.1%, F= 62.5%). The rest thirteen zones and one administrative town have registered less than the regional average. Bishan Guracha administrative town and Borena Zone have the least GER of all with 29.5% and 37.9% respectively.

Regarding GPI, among 20 zones in the region 9 of them (West Guji, Guji, West Hararge, East Hararge, Bale, Kellelem Wollega and West Arsi) and only one Administrative Town (Batu) have registered GPI less than the regional average which is 0.82. The rest Zones and administrative towns have GPI greater than or equal to the regional average. On the other hand 7 administrative towns have GPI greater than one that tells us the number of female students GER of the level exceeds that of male students.

III. Gross Enrolment Rate /GER/ Primary (1-8)

Gross Enrollment Rate of primary education (1-8) is a crude measure of primary educational coverage, which indicates the percentage of total enrollment in primary schools irrespective of age out of the corresponding primary school age (7-14) population. Apparently, it includes under-aged and over aged pupils. So that GER can be greater than 100%.

$$\text{Primary GER} = \frac{\text{All age grade 1 – 8 enrolments}}{\text{School Age population of age 7 – 14}} \times 100$$

As can be seen from graph 1.2.15 below trend of GER for primary education in the region has been fluctuating as slightly increasing for the last four years and declined in 2011 (2018/19). In general, it has increased from 95.0% (M=100.3%, F=89.5%) in 2007 (2014/15 G.C) to 105.8% (M=113.8%, F=97.6%) by 2011 (2018/19 G.C).

Graph 1.2.15. Trend Primary 1-8 GER in the last five years

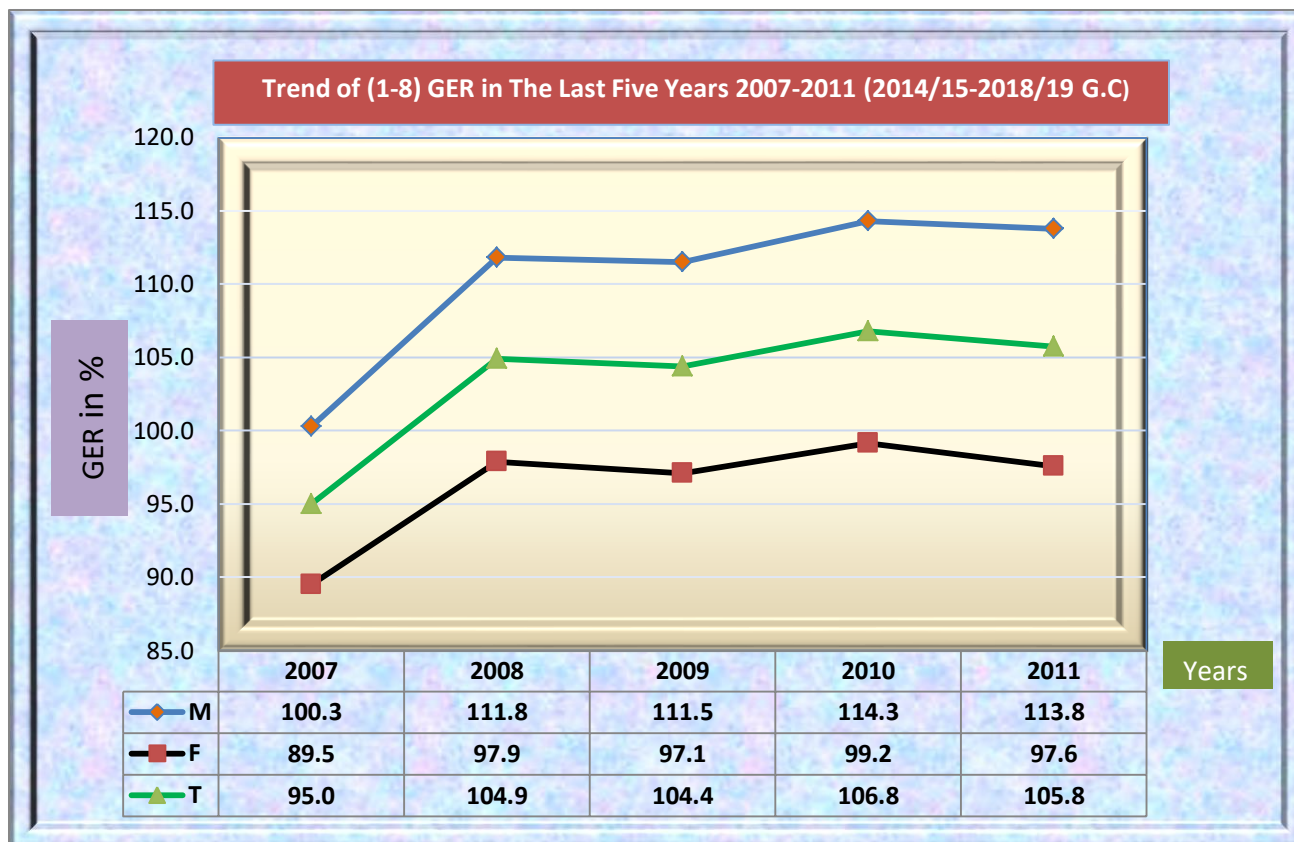

Table 1.2.26 below also illustrates primary education GER, GPI and GG of the region by zone and administrative towns. Accordingly, among 20 zones and 19 administrative towns in the region 11 zones and only one administrative town have GER below the regional average in the academic year which is 105.8%. The three zones with the lowest GER in the region are North Shoa, OSZSF and Borena by having 75.2%, 84.9% and 85.8% respectively. Among administrative towns only Bishan Guracha has GER less than 100%. To the contrary, the rest of zones and administrative towns have GER above the regional average. The case of administrative towns located around Finfine those registered GER 250% and above has to be identified and intervention has to be conducted. Regarding GPI, six zones and two administrative towns have registered GPI less than the regional average which is 0.86; while others have GPI above or equal to the region average. Among them eight Administrative towns have GPI greater than 1.0, which means, female children have got more access to primary education than male.

1.2.3.3. Net Enrolment Rate (NER)

It is the rate of the official school age group enrolled for a given level of education expressed as a percentage of the corresponding school age population. NER is the better way of measuring organized timely school participation and is a more refined indicator of school and enrolment coverage in terms of explaining the proportion of pupils enrolled from the official age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils.

$$NER = \frac{\text{Total Enrolment in a specific level of Education with official age – group}}{\text{Official school age population corresponding to the same level of Education}} \times 100$$

A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value of NER is 100%. Increasing trends can be considered as reflecting improvement in participation of official school age population at the specified level of education. When NER compared with GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100% then the difference with 100% provides a measure of the proportion of children not enrolled at the specified level of education. However, some of these children might be enrolled at other levels of education.

The NER is measure of school coverage for theoretical age groups, but is unfortunately not well to adapting measuring overall coverage. NER is severely affected by the inaccuracy of school age population data. Children's reported ages as per school censuses are often wrong due to children's or their teachers' ignorance, particularly when the registration of births is not widespread, or due to amendments to the birth register.

I. Net Enrolment Rate (NER) in Primary First Cycle (1-4)

It is the percentage of students who enrolled in primary first cycle, whose age is 7-10, compared to the school age population of this level; that is total population of 7-10 years old.

$$\text{Grade 1 – 4 NER} = \frac{\text{Grade 1 – 4 enrolments of age 7 – 10}}{\text{School Age population of age 7 – 10}} \times 100$$

Graph 1.2.16 below shows, the trend of last five years NER of first cycle primary education at regional level. Accordingly, the NER of primary first cycle was 96.8% (M=99.4%, F=94.1%) in 2007 (2014/15 G.C) and reaches to 116.0% (M=123.0%, F=108.9%) by 2011 (2018/19 G.C.). At normal circumstance the NER at any education level never exceeds 100% that implies all school age children of the level have joined schools. But from the year 2008 (2015/16 G.C) till 2011 (2018/19 G.C) the NER of primary first cycle at regional level exceeds 100%. Thus, we need to dig out the root cause of data inflation (i.e NER> 100%) for it being beyond the optimum rate from 2008 (2015/16 G.C) to 2011 (2018/19 G.C).

Graph 1.2.16 Five Years Trend of Primary First Cycle NER

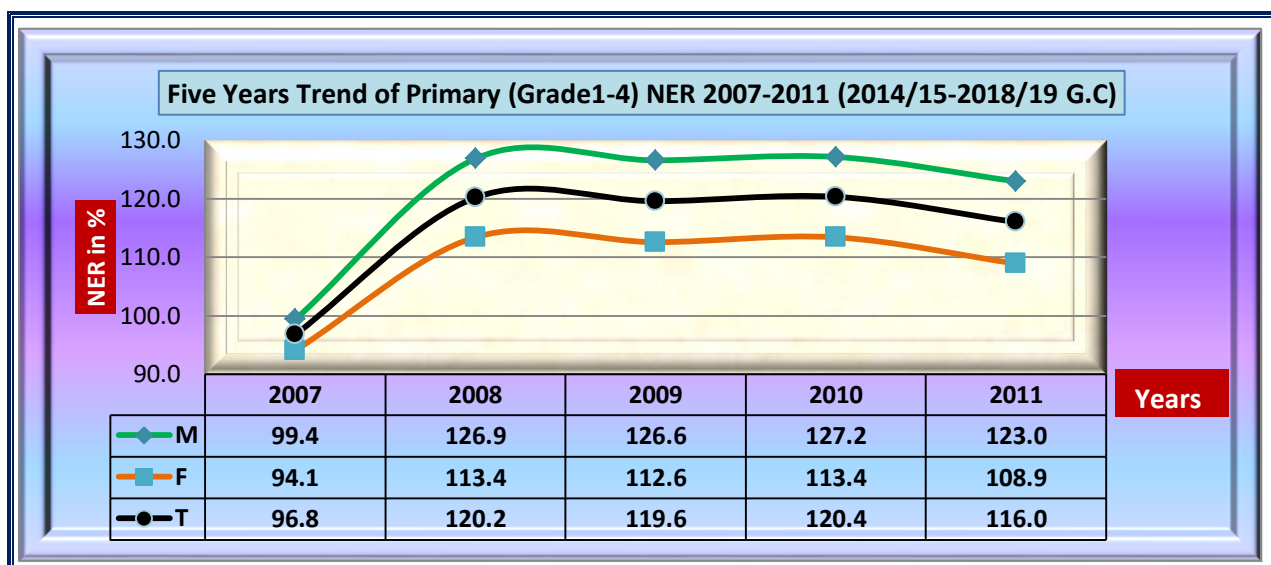

Table 1.2.27 below also demonstrates NER, GPI and GG of primary first cycle of the region by zone and Administrative towns. Accordingly, five zones (Borena, OSZS Finfinne, East Shoa, Ilu Aba Bora and North Shoa) as well as one Administrative town (Bishan Guracha) have NER less than the ideal value which is 100%. The other zones and administrative towns have NER greater than 100%. The case of administrative towns like Sebeta, Lege Tafo Lege Dadhi, Dukem, Holeta, Buryu and Sululta those their NER exceeds 200% needs to be identified by research. Regarding GPI, eight zones and one administrative town have GPI less than the regional average (0.89). The rest 12 zones and 18 Administrative towns have GPI greater or equal to the regional average. Among the Administrative towns, 10 of them have registered GPI greater than 1.0 that shows better female students' participation than that of male students.

II. Net Enrolment Rate (NER) in Primary Second Cycle (5-8)

Net Enrolment Rate /NER/ at primary second cycle is the proportion of enrolment of students in primary second cycle of the age (11-14), with eligible school population of age (11-14).

$$\text{Grade 5 - 8 NER} = \frac{\text{Grade 5 - 8 enrolments of age 11 - 14}}{\text{School Age population of age 11 - 14}} \times 100$$

Graph 1.2.17 Five Years Trend of Primary 5-8 NER

As graph indicated in 1.2.17 above, the trend of the NER of primary second cycle education in the region has shown a little bit progress for the last five years. Accordingly, in 2007 (2014/15 G.C) it was 46.98% (M=48.40%, F=45.20%) and increased to 56.04% (M=60.48, F=51.54%) by 2011 (2018/19 G.C), with the average annual growth rate of 3.65%. As the growth rate indicates, NER of the level shows insufficient increment. So that, it is recommended that a serious attention should be given for the issue to resolve the problem.

Table 1.2.28 below also shows NER of second cycle primary education of the region by zones and Administrative towns. Accordingly, six zones have registered NER of primary second cycle less than the regional average, 56.04%. On the other hand only one administrative town has registered NER of primary second cycle less than the regional average. But the remaining fourteen zones and eighteen administrative towns have registered NER greater than the regional average. Regarding to GPI, among the 20 zones in the region nine of them have GPI less than the regional average (0.875). The rest eleven zones and eighteen administrative towns have GPI greater or equal to the regional average. Among these administrative towns eight of them have registered GPI greater than 1.0.

III. Net Enrolment Rate (NER) in Complete Primary (1-8)

The Net Enrolment Rate (NER) for complete primary is the proportion of the appropriate school age (7-14) children enrolled in primary school with the total school age (7-14) population. When the first and second cycle NER separately compared with complete primary in the region, it would take more time to achieve 100%. This is because those children in first cycle primary of age 11-14 who are over aged for first cycle, and students of age 7-10 who are under aged for the second cycle are included while calculating NER for complete primary. In general NER of primary education is calculated by dividing the number of proper age for primary education (ages 7-14 for Ethiopia) by the number of children of school age (7-14) population.

$$\text{Primary grade 1 - 8 NER} = \frac{\text{Grade 1 - 8 enrolments of age 7 - 14}}{\text{School Age population of age 7 - 14}} \times 100$$

Graph 1.2.18 Five Years Trend of Primary 1-8NER

As illustrated on the graph 1.2.18 above; the NER of primary education has shown significant increment from 2007 (2014/15 G.C) to 2008 (2015/16 G.C). But it has been fluctuating from 2009-2011 (2016/17-2018/19 G.C).

Table 1.2.29 above shows complete primary education NER of the region by Zone and Administrative Towns. Accordingly, among all zones of the region, the NER of eleven zones and two administrative towns have registered less than the regional average of primary education NER, 98.3% (M=105.0%, F=91.5%). On the other hand, nine zones and thirteen administrative towns have NER above the regional average. Furthermore, among all zones and Administrative towns only six zones and one administrative town have GPI below the regional average (0.87). The remaining zones and administrative towns have GPI above the regional average. Among these administrative towns nine of them have registered GPI greater than 1.00 that implies more accessibility for female students.

1.2.4. Primary Gender Equity in the Last Five Years

What is Equity?

Education is considered to be one of the best channels to reduce socioeconomic inequalities, and especially, a powerful tool to reduce their trans-generational transmission. The level of qualifications and degrees obtained throughout schooling determine an individual's future socioeconomic status to a certain extent. Education systems are therefore expected to offer each child similar chances of success, based on merit over and above personal characteristics beyond their control (gender, area of residence, and so on). Given that schooling options are likely to be affected by individuals' financing ability and other specific characteristics, it is important to determine the extent to which education systems, especially those that are publicly funded, take these factors into account to limit their impact on individuals' access to school and results.

The Absolute Gap in Performance between Two Groups

The absolute gap in the performance of two groups A and B (such as urban and rural indicators or boys and girls) is calculated by subtracting the chosen performance indicator for group A from that for group B. The absolute gap is interpreted as the amount by which it is necessary to increase the performance indicator for group B (rural or girls in this instance) to achieve equity between the two groups.

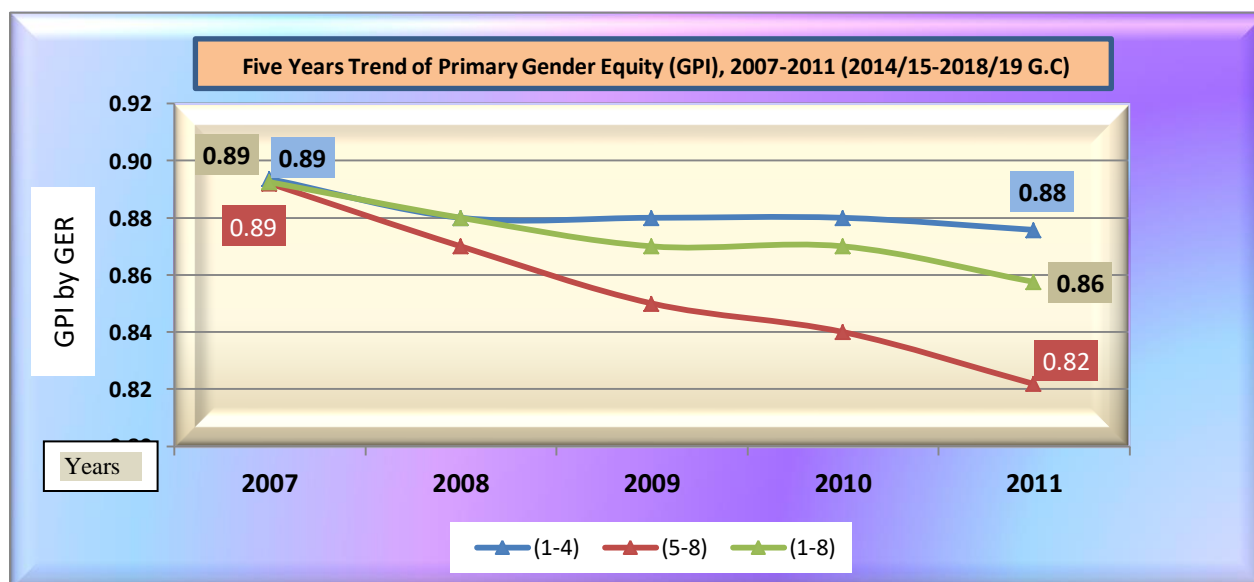

The Parity Index

The parity index comparing groups 'A' (boys) and 'B' (girls) is obtained by dividing the performance indicator of group 'B' (girls) by that of group 'A' (boys). The parity index provides the factor by which it would be necessary to multiply the group 'B' (girls) indicator (or divide the group 'A' /boys/ indicator) to achieve an equal value for both groups. Parity between the two groups is achieved when the parity index is equal to 1. An index value above 1 indicates an advantage for group 'A'/boys/ (numerator); conversely, an index value below 1 indicates a disadvantage for group 'B' (girls). The greater the divergence of the index from number one the greater the disparity between the two groups.

Table 1.2.30. Five Years Trend of Primary Gender Equity indicators by GER

Five Years 2007-2011 (2014/15-2018/19 G.C) Trend of Primary Gender Equity												
Year	Primary (1-4)				Primary (5-8)				Primary (1-8)			
	GER		GPI	G G	GER		GPI	G G	GER		GPI	G G
	M	F			M	F			M	F		
2007	133.0	118.9	0.89	14.2	62.6	55.8	0.89	6.8	100.3	89.5	0.89	10.8
2008	154.7	136.1	0.88	18.7	67.0	58.0	0.87	9.0	111.8	97.9	0.88	13.9

2010	154.2	135.9	0.88	18.3	73.4	61.6	0.84	11.8	114.3	99.2	0.87	15.1
2011	150.2	131.5	0.88	18.7	76.1	62.5	0.82	13.6	113.8	97.6	0.86	16.2

Graph 1.2.19 Five Years Trend of Primary Gender Equity indicators by GER

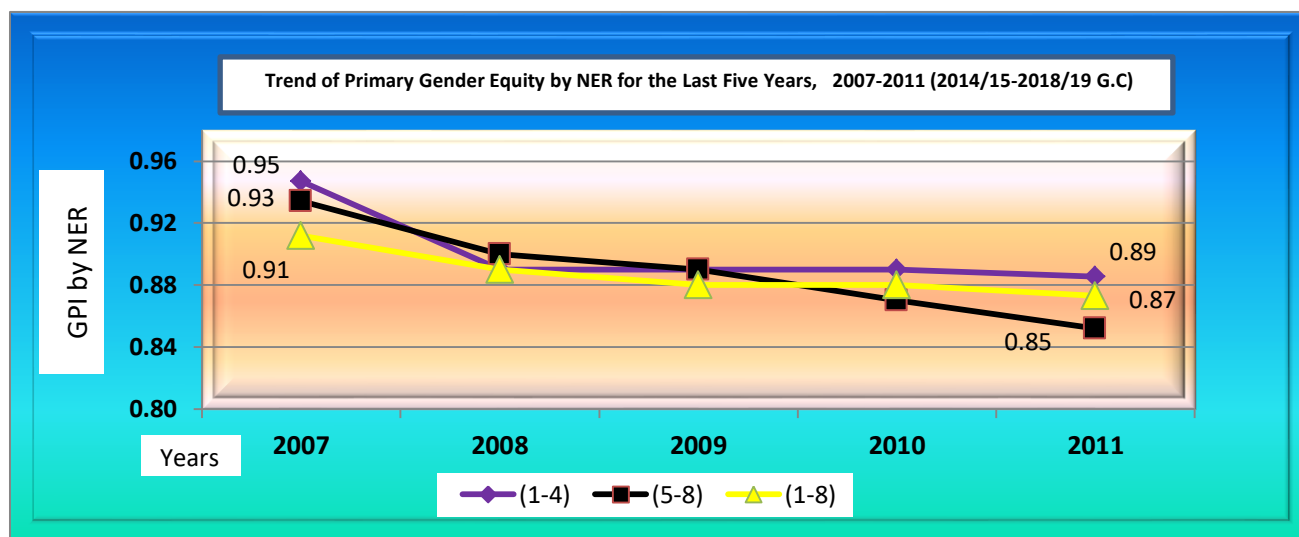

It is possible to see from table 1.2.30 and graph 1.2.19 above that the primary education gender gap has been increasing while the GPI has been decreasing for the last five years by GER. For example, the GG at regional level has been 10.8 in 2007 (2014/15 G.C) and then increased to 16.2 in 2011 (2018/19 G.C), whereas the GPI at regional level has been 0.89 in 2007 (2014/15 G.C) and then decreased to 0.86 in 2011 (2018/19 G.C), which indicates that the participation of primary education favour male than female.

Table 1.2.31. Five Years Trend of Primary Gender Equity by NER

Five Years, 2007-2011 (2014/15-2018/19 G.C), Trend of Primary Gender Equity by NER												
Year	Primary (1-4)				Primary (5-8)				Primary (1-8)			
	NER		GPI	GG	NER		GPI	GG	NER		GPI	GG
	M	F			M	F			M	F		
2007	99.43	94.1	0.95	5.3	48.4	45.2	0.93	3.2	90.7	82.7	0.91	8.0
2008	126.9	113.4	0.89	13.5	53.2	48.1	0.90	5.1	103.9	92.4	0.89	11.4
2009	126.6	112.6	0.89	14.0	54.8	48.7	0.89	6.1	103.5	91.4	0.88	12.0
2010	127.2	113.4	0.89	13.8	58.0	50.5	0.87	7.5	105.6	93.0	0.88	12.6
2011	123.0	108.9	0.89	14.07	60.5	51.5	0.85	8.94	105.0	91.5	0.87	13.1

Graph 1.2.20 Five Years Trend of Primary Gender Equity by NER

It is possible to see from table 1.2.30 and graph 1.2.20 above, gender equity of full primary (1-8) by NER. Accordingly, Gender Gap was 8.0% and GPI 0.91 respectively in 2007 (2014/15 G.C). After five years Gender Gap has increased to 13.1% and GPI has decreased to 0.87 in 2011

(2018/19 G.C) which shows the participation related to gender goes apart; male participation is increasing and female participation is decreasing from year to year.

1.3. Equitable Access in Secondary Education

Government continues to address challenges related with ensuring quality and inclusive education in the Secondary sub-sector. The sub-sector is charged with the duty of providing places for the masses of Primary Education. This is also in line with government commitment to the achievement of the 2nd growth & transformation plan.

Secondary education is composed of two cycles, these are General Secondary Education (9-10) and Preparatory classes (11-12). General secondary education (9-10) is designed to continue the basic programs of the primary level, but teaching is typically more subject focused and requires more specialized teachers for each subject area. The end of this level often coincides with the end of compulsory education. A preparatory class (11-12) is the final stage of secondary education and the entry point to the higher institution. Therefore, instruction is often organized and even more along subject lines and teachers, typically need a higher or more subject-specific qualification. Let us look at different indicators of secondary education of our region.

This chapter gives key statistical indicators about equitable access in the Secondary sub-sector in year 2011 (2018/19 G.C).

1.3.1. Number of Secondary Schools

I. Secondary Schools by Ownership & Cycle

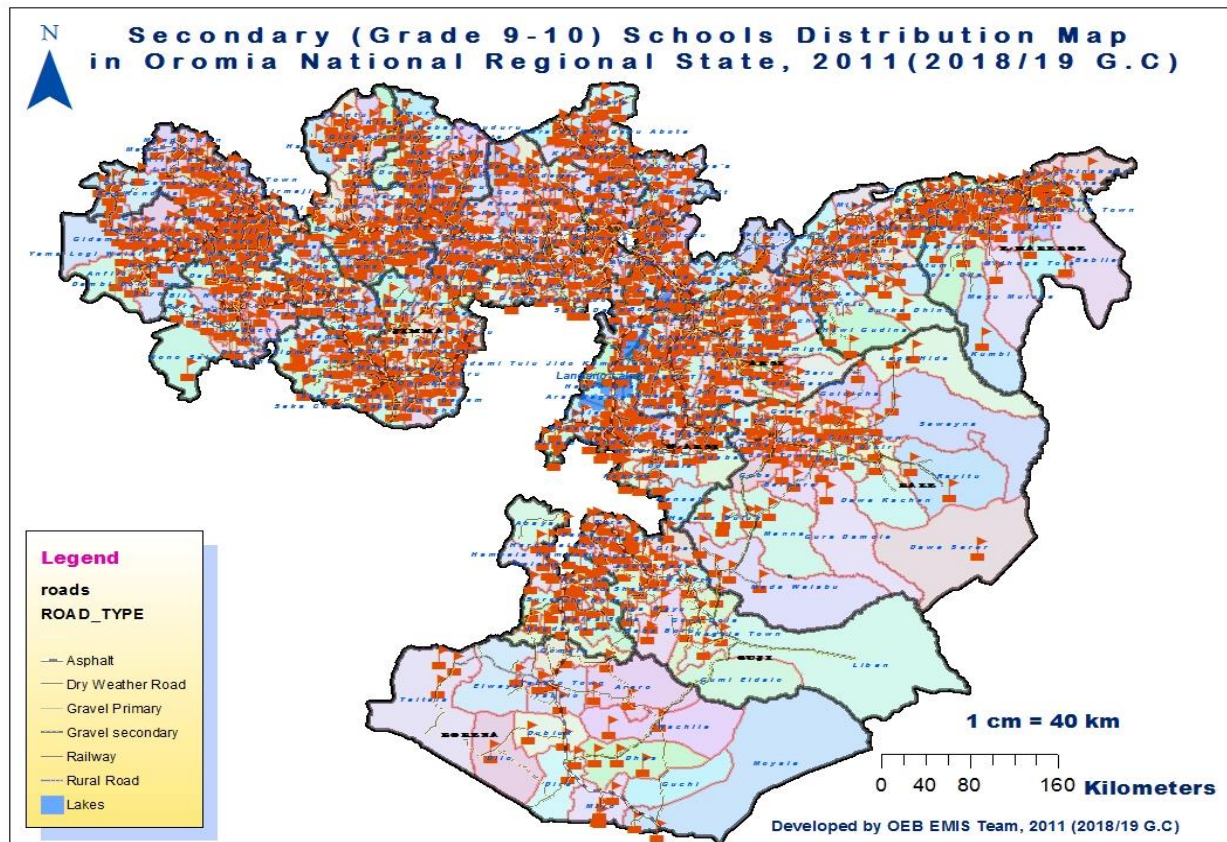

Table 1.3.1 below shows secondary schools in the region by zone, administrative town, ownership and cycle. Accordingly, among 1465 secondary schools, 1359 (92.8%) of them are owned by government as compared to 7.2% of the secondary schools are owned by Non-governmental organizations. Concerning the un separated 56 schools (9-12) 73.7% are under the ownership of non-governmental organizations. As the data shows Government involvement is higher than non-governmental organizations. In the same table it is shown that the intervention in secondary education of non-government organization is vital in only 9 zones and 13 administrative towns.

Geographical Location of Secondary schools

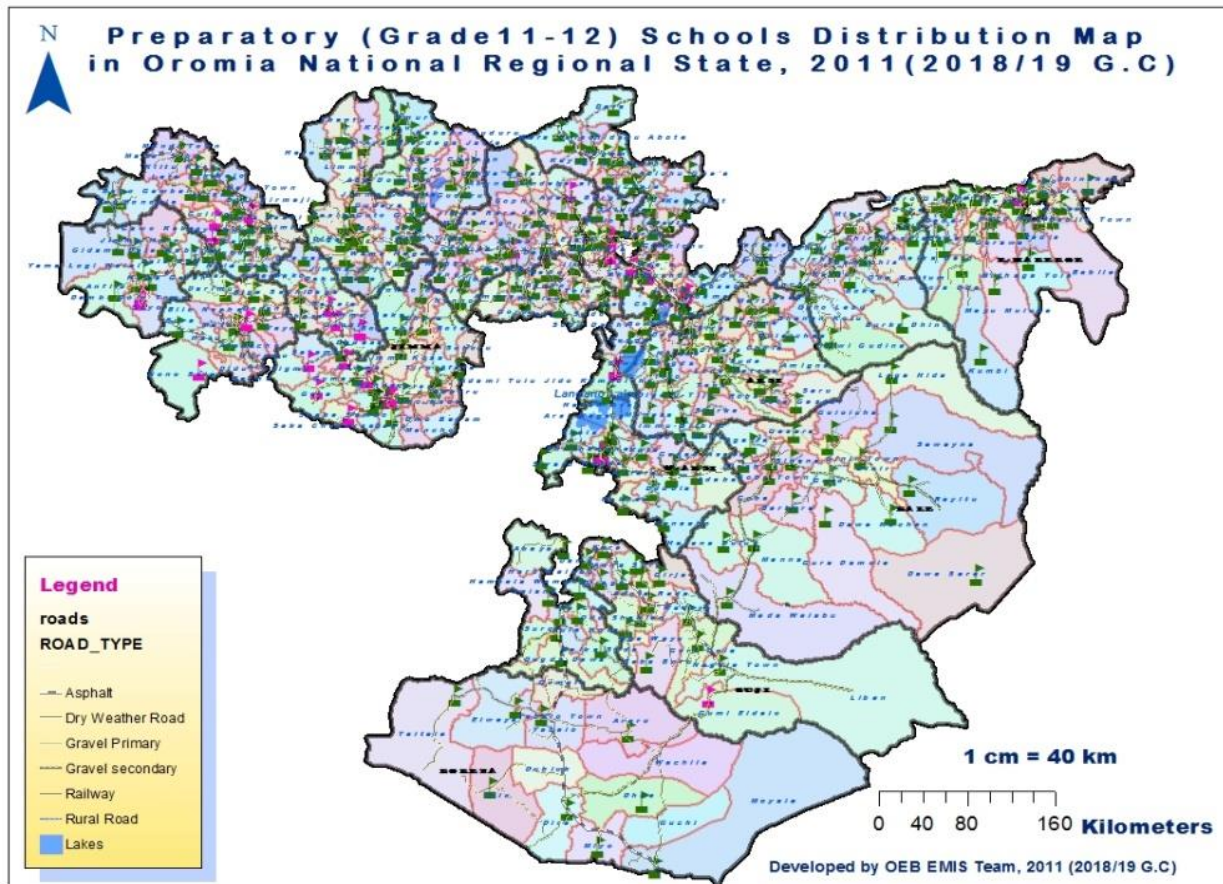

Map 1.3.1: Geographical Location of Secondary first Cycle (Grade 9-10) schools

Map 1.3.1 above shows the distribution of secondary (9-10) schools in the Region.

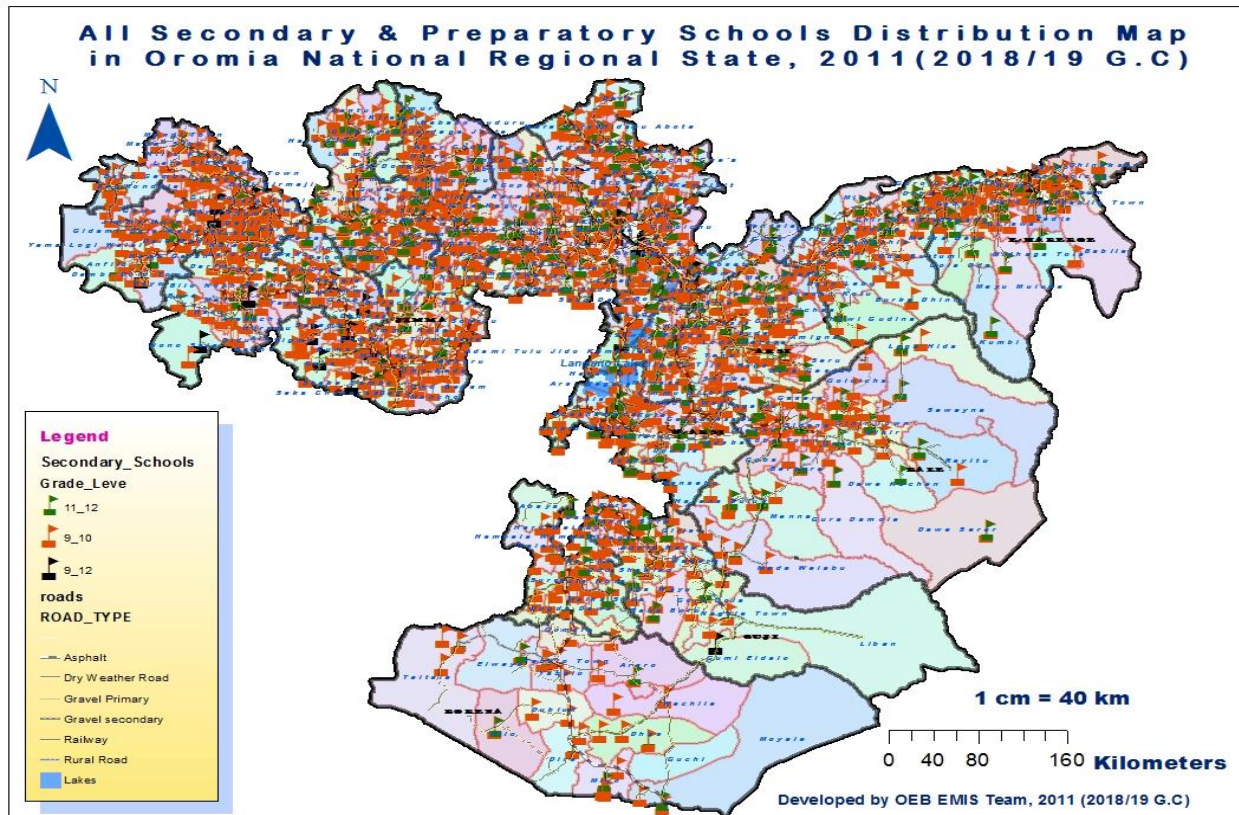

As we can see from the map the schools were relatively denser along the main road of the central, North East & west areas of the region for secondary first cycle and scattered in the other areas.

Map 1.3.2: Geographical Location of preparatory (Grade 11-12 Schools)

As can be seen from map 1.3.2 above the distribution of preparatory schools were also more scattered than secondary schools, specifically in the south eastern area of the region like Borena, Guji and Bale Zones. The symbol of schools on the map shows schools by grade level with different colors. The map also shows woredas and the accessibility of the road to schools by type of road.

Map 1.3.3: Geographical Location of Secondary first Cycle (Grade 9-10) schools

As can be seen from map 1.3.3 above; secondary schools in the region are more scattered in south eastern zones of the region like Borena, Guji and Bale Zones as compared with other zones. Better distribution of secondary schools is vital in administrative towns, middle, south western and western zones of the the region.

1.3.2. Student Enrolment in Secondary Schools

Secondary schools (9-12) Enrolment by Ownership

1.3.3. Secondary Schools Enrolment Rates

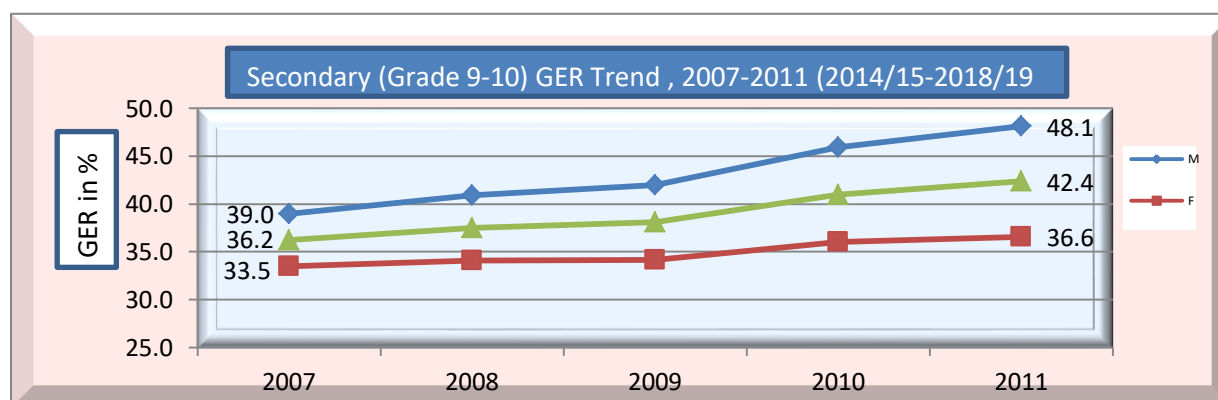

Access is the extent to which the secondary school age population is able to join this particular level of education. Equity implies a reduction in disparities based on gender (Male/Female) and geographical location (Urban/Rural). Equity also ensures that, all students in every school will be able to avail themselves of the services, technology, materials and the qualified teaching staff that enable them to achieve educational success. Besides, it indicates fairness in the distribution of opportunities for education, and is the main indicator that shows educational performance.

I. Gross Enrolment Rate (GER) of General Secondary Education Grade (9-10)

GER of general secondary education (grade 9-10) is the proportion of all enrolments regardless of age with school age population at this level. It compares the total number of students in the general secondary school with the school-age population of this level. In Ethiopia, the official school age for secondary first cycle is from 15-16 years old.

$$\text{Grade 9 – 10, GER} = \frac{\text{All age grade 9 – 10 enrolments}}{\text{School Age population of age 15 – 16}} \times 100$$

Graph 1.3.1 Five Years GER Trend of Secondary First Cycle (grade 9-10)

Graph 1.3.1 above shows the last five years trend of GER of secondary first cycle. Accordingly, it was 36.2% (M=39.0%, F=33.5%) in 2007 (2014/15 G.C) and increased to 42.4% (M=48.1%, F=36.6%) by 2011 (2018/19 G.C). Even though the reasons were not yet identified through research, the GER of the level is not in a position of improvement for the last five years. Thus, whatever the reason it needs serious attention from educational officials and concerned bodies.

The table 1.3.11 above also shows the GER of 2011 (2018/2019 G.C) for secondary school (9-10) at regional level by zone and administrative town. Accordingly, eight zones and eighteen administrative towns have GER above the regional average, 42.4%. From the same table it is possible to see that there are fifteen administrative towns those have GER greater than 100%. Even though, the causes haven't been identified with basic research yet, the major suspected reason behind the GER exceeding 100% in those administrative towns is that, students who are living in surrounding zones and district came to those towns to attend their high school education. This may led to the increment of enrolment in secondary education at these administrative towns. That is why the rate goes beyond the expected rate when it is calculated in respect of school age population of those towns. Concerning GPI, nine zones and thirteen administrative towns have registered above the regional average, 0.76.

Graph 1.3.2 below shows the gender gap of Secondary Education (9-10) is increasing in the last five years. Accordingly, the gender gap of (9-10) was increased from 5.5% in 2007 (2014/15 G.C) to 11.6 % in 2011 (2018/19 G.C).

Graph 1.3.2 Five Years Trend of Secondary (9-10) Gender Gap

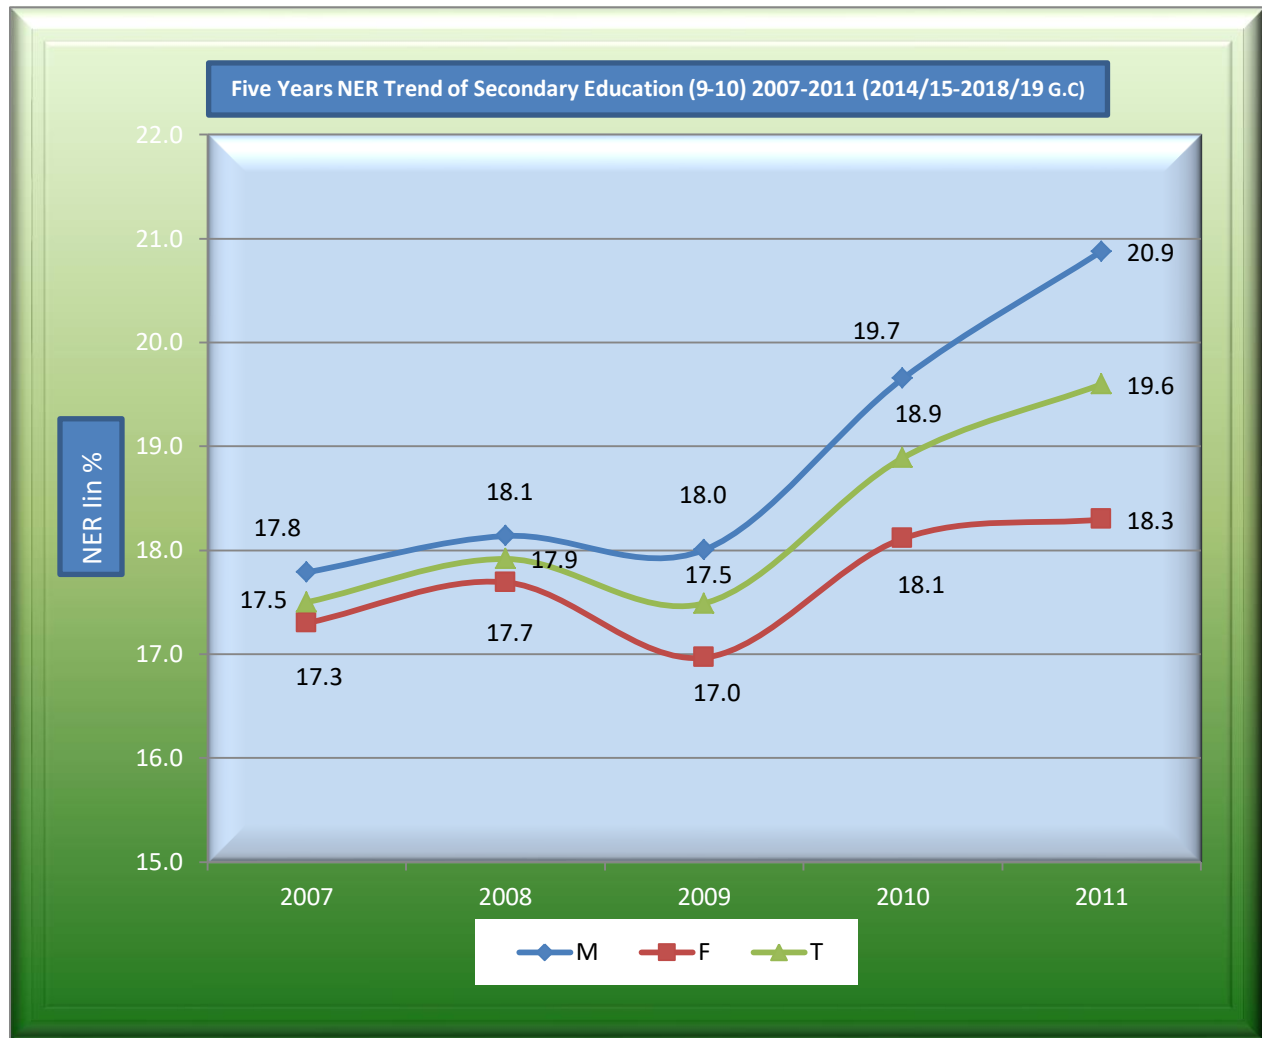

II. Net Enrolment Rate (NER) in Secondary First Cycle (9-10)

For this level, we consider students enrolled in secondary first cycle whose age is from 15-16 and compare it to the total number of populations belonging to the mentioned age group.

$$\text{Grade 9 – 10 NER} = \frac{\text{Grade 9–10 enrolments of age 15–16}}{\text{School Age population of age 15–16}} \times 100$$

Graph 1.3.3 Five Years NER Trend of Secondary First Cycle (9-10)

Graph 1.3.3 above indicates the NER of secondary education (9-10) of the last five years. It was 17.5% (M=17.8%, F=17.3%) in 2007 (2014/15 G.C) and rose to 19.6% (M=20.9, F=18.3%) in 2011 (2018/19 G.C). As the data indicates NER of the level shows slow increment during the last five years. So, the issue needs attention from the education officials and concerned bodies.

Table 1.3.12 above also shows the NER of secondary first cycle (9-10) education at regional level by zone and administrative towns. Accordingly, thirteen zones and two administrative town have registered below the regional NER average 19.6%. Specially, Borena, West Guji, have NER less than 10%. On the other hand, the NER of Dukem Administrative town exceeds 100% which is illogical. Therefore, the issue needs particular attention to improve the huge gap shown in these zones and illogical NER of that Administrative town.

I. Gross Enrolment Rate (GER) of Preparatory Schools (11-12)

GER of preparatory education (grade 11-12) is the proportion of all enrolments regardless of age with school age population at this level. It compares the total number of students in preparatory school with the school-age population of this level. In Ethiopia, the official school age for secondary first cycle is from 17-18 years old.

$$\text{Grade 11 - 12 GER} = \frac{\text{All age grade 11 - 12 enrolments}}{\text{School Age population of age 17 - 18}} \times 100$$

Graph 1.3.4 Five Years Trend of GER for Preparatory (11-12)

As shown in graph 1.3.4 above, the GER of preparatory (11-12) has shown a little improvement in the last four years as it was 8.1 % (M= 9.0%, F= 7.2%) in 2007 (2014/15 G.C) and increased to 10.0 % (M=11.4%, F=8.5%) in 2010 (2017/18 G.C). But in 2011 (2018/19 G.C) it shows better improvement of the gross participation of this level.

Table 1.3.15 below also shows the GER of preparatory by zones and administrative towns. Among the 20 zones in the region 15 of them have GER below the regional average 14.5%. The least GER registered zone is East Shoa (4.2%). Twelve zones and one administration town have GER of less than 10%. Regarding to administrative towns, only Bishan Guracha administrative town has registered least which is 5.4%. The rest 18 administrative towns have registered above the regional average GER which is 14.5%. However, only Ambo (65.2%), Dukem (65.3%) and Nekemte (71.9%) administrative towns have registered GER above 50%

Regarding GPI, the performance registered in preparatory education is somewhat low when compared with primary (1-8) and secondary (9-10) education. Accordingly, the GPI of preparatory in 2011 (2018/19 G.C) at regional level is 0.75. Concerning zones and administrative towns, seven zones and thirteen administrative towns have registered gender parity index (GPI) above the regional average which is (0.75).

I. Net Enrolment Rate (NER) of Preparatory Schools(11-12)

For this level, we consider students enrolled in schools (11-12) whose age is from 17-18 and compare it to the total number of populations belonging to the mentioned age group.

$$\text{Grade 11 – 12 NER} = \frac{\text{Grade 11 – 12 enrolments of age 17 – 18}}{\text{School Age population of age 17 – 18}} \times 100$$

Graph 1.3.5 Five Years Trend of Preparatory Schools NER

As shown in graph 1.3.5 above, NER of Preparatory schools (11-12) has been increasing for the last four years, and has decreased in 2010 and again increased in 2011. It was 4.5% (M=4.6, F=4.4%) in 2007 (2014/15 G.C) and then rose to 8.0% (M=8.6%, F=7.4%) in 2011(2018/19 G.C).

In table 1.3.14 above, the NER and GPI of preparatory schools in 2011 (2018/19 G.C) have shown by zones and administrative towns. As illustrated in the table, zone and administrative town's performance concerning NER is quite far apart from one another. Accordingly, the three high NER registered administrative towns are Dukem, Nekemte and Ambo have 44.6%, 43.0% and 36.0% respectively. Whereas Bishan Guracha administrative town has been registered the least NER which is 0.3%

Regarding zones, Oromia Special Zone Surrounding Finfinne, South West Shoa, East Shoa are the three least NER registered zones which have 1.8% and 2.0%, 2.3% respectively.

Concerning gender parity index /GPI/, it had been 0.82 in 2010 (2017/18 G.C).and this value has increased to 0.86 in 2011 (2018/19 G.C) which indicates the gap between male and female in participation becomes narrow than that of last year.

1.4. None Formal Education

1.4.1. Alternative Basic Education /ABE/

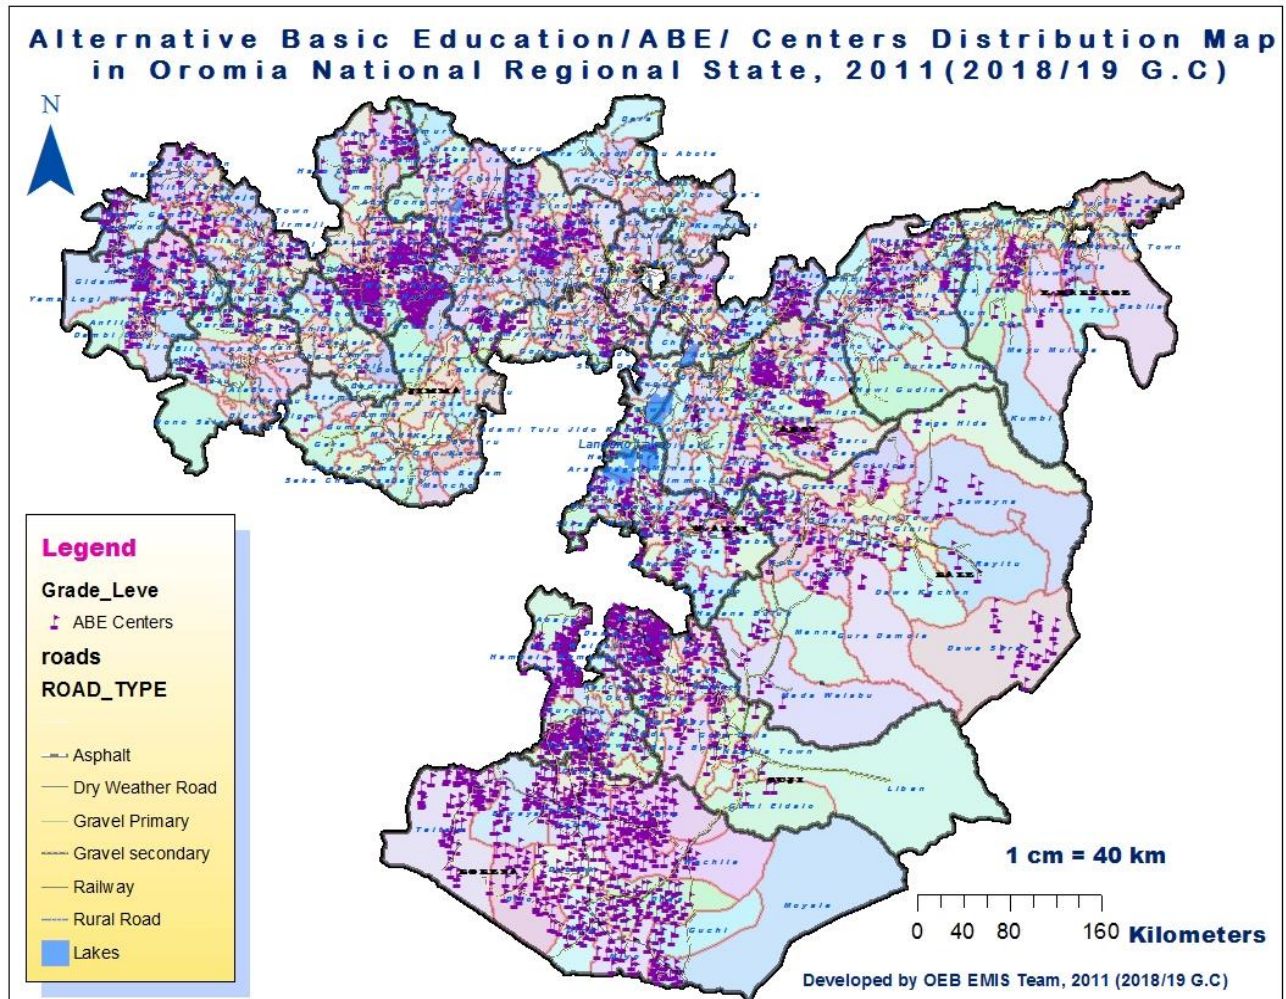

Basic education is the whole range of educational activities taking place in various settings (formal, non-formal and informal) that aimed to meet basic learning needs. The program should receive wide spread public support for reasons that include considerations of literacy as fundamental human right. As the fact indicates, illiteracy accompanies poverty and a low life expectancy. Alternative Basic Education (ABE) is intended to address the Primary education needs of children who are substantially older than primary school ages of 7-14. Moreover, ABE enrollments have contribution in reporting GER and NER of 1st cycle primary with regular program. In paying attention for the issue, our region has planned to reduce illiteracy in this regard. Even though, great efforts have made to meet the access, still hard work is expected to attain the plan. In this publication under this title we attempted to specify the data of Alternative Basic Education (ABE) and Integrated functional adult literacy (IFAL) program.

Table 1.4.1 below elaborates the number of ABE centers by ownership at regional and zone as well as administrative towns. Accordingly, among the total number of 1859 ABE centers 93.3% (1734) of them are owned by government. The rest of 6.7% (125) of them are under the ownership of non-government organization. Concerning zonal distribution Borena, Guji and East Wollega have the largest share of ABE centers that is (25.8%, 12.6% and 11%) respectively in the region. North Shoa zone has no ABE centers. On the other hand, the share of administrative towns is very low, and 14 administrative towns have no ABE centers.

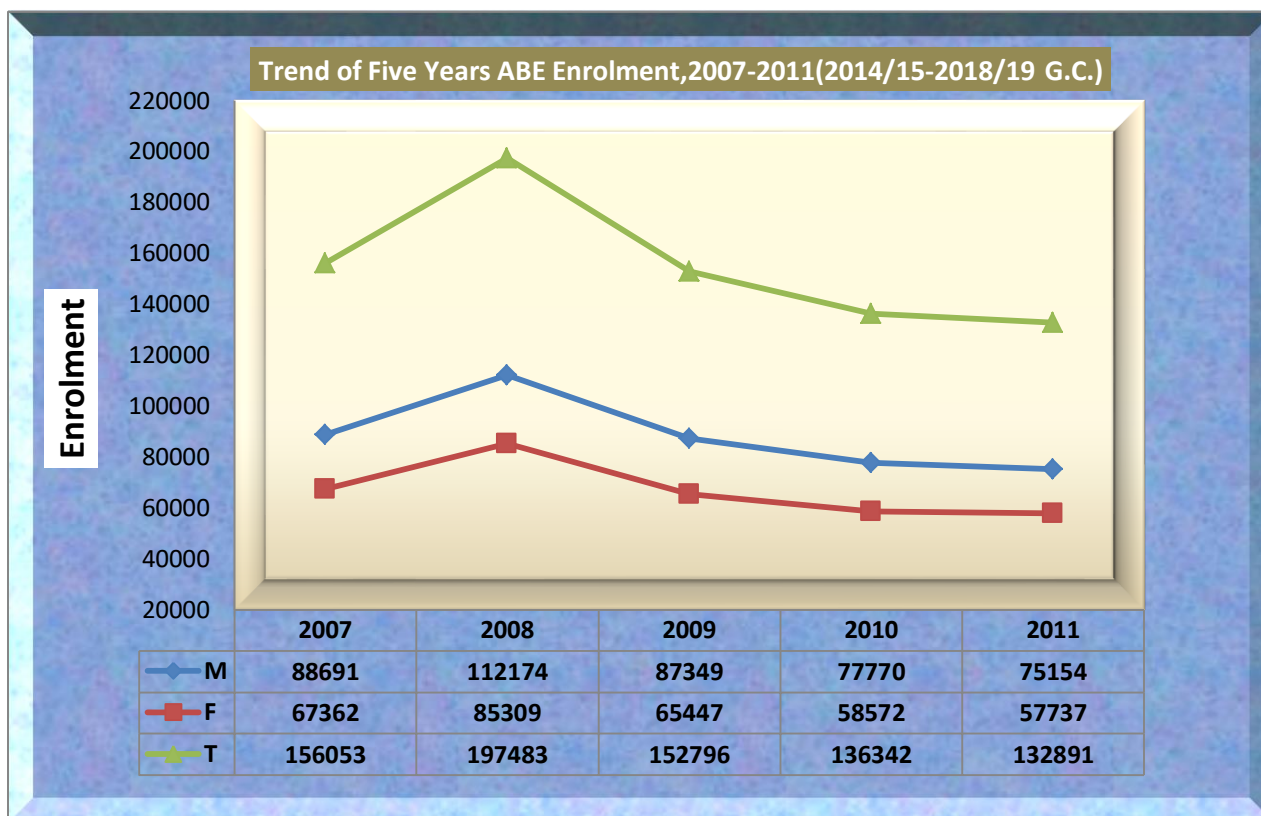

Map 1.4.1: Distribution OF ABE centers

As can be seen from map 7 above, ABE centers are relatively dense in southern and western parts of the region. Specifically, they are common in Borena, Guji, West Gujii, West Arsi, Bale, West Hararge, East Wollega, KellemWollega and Arsi zones. On the other hand, East Shoa, Jima, Ilu Aba Bora, Buno Bedelle and OSZSF zones are zones where ABE centers are scarcely distributed. North Shoa zone is the only zone in the region that has no ABE center in the year 2011 (2018/19 G.C).

Trend of ABE Enrolment

Graph 1.4.1 Five Years trend of ABE Enrolment

As indicated on table 1.4.2 below ABE enrolment was slightly decreasing from 2008 (2015/16 G.C) to 2011 (2018/19 G.C). It is clear that this approach has played significant role in addressing children who have not got chance to join primary education. But due attention has not been given to strengthen the sector. For example; large number of children is still not joining school in the region. Hence, even though basic research didn't attempt to identify the cause yet, our assumption for the challenges happened might be; low supervision and low follow-up of education sector at grass-root level, less interest and motivation of ABE facilitators, low participation of NGOs (both local and international) to promote the ABE program in the region and the like are an expected assumptions. Therefore, we recommend that the issues needs serious attention and follow up.

CHAPTER TWO: EDUCATION QUALITY

2.1. Quality Indicators in Pre-Primary Education

The meaning of a Quality Education is one that is pedagogically and developmentally sound and educates the student in becoming active and productive members of society. A quality education is supported by three key pillars: ensuring access to quality teachers; providing use of quality learning tools and professional development; and the establishment of safe and supportive quality learning environments. Pupil Teacher Ratio (PTR) Pupil section Ratio (PSR) and Pupil Tex book Ratio (PTBR) are the commonly used indicators in this publication.

I. Teachers in Pre-primary Schools

In pre-primary attached to primary education almost all teachers those care for the children are from primary first cycle schools to work side by side. Child to child program is held by trained young facilitators under full supervision of neighboring primary school. Only Kindergarten schools have their own teachers. In table 2.1.1 below it is possible to see that there were a total of 11,871 teachers registered in Kindergartens and pre-primary attached to primary education where 70.5% of them are females. Among 11,871 teachers 8,226 of them are employed as KG teachers and 4645 teachers are primary school teachers but also teaching in “o-class”.

II. Pupil Teacher Ratio (PTR)

PTR gives an indication of contact between pupils and teachers in a classroom. If it is lower, then there is high chance of contact between a teacher and pupils and teachers will have enough time to take care of children and check homework and class work as well. In other words, the lower the PTR the better teaching learning process would be. As shown in table 2.1.1 below the Pupil Teacher Ratio (PTR) of KG and O Class in the academic year reached 76:1 at regional level. Administrative towns have better Pupil Teacher Ratio (PTR) of KG and O Class, 34:1 than Zones which is 114:1.

III. Pupil Section Ratio (PSR)

As shown in table 2.1.1 below, the regional average Pupil Section Ratio (PSR) of KG and O Class in the academic year reaches 49:1 in general. Administrative towns have average Pupil Section Ratio (PSR) of KG and O Class, 42:1 than Zones average which is 49:1.

Table 2.1.1: Kindergarten and O class Schools Summary in 2011 (2018/19 G.C.)

2.2. Quality Indicators in Primary Education

Quality of education is the key indicator to detect whether a given country is on the right track to achieve the intended goal of its education system or not. Quality of education system may refer to many different characteristics, such as quality of inputs into education system, process, quality of educational outputs and outcomes. Here in this publication we focus on quality, in relation to educational inputs such as teacher's qualification, text book distribution and class size in our education system.

2.2.1. Teachers in Primary Education

I. Qualification of Teachers in Primary Education

One of the main factors, which affect the quality of education, is the qualifications of the teacher. That is, whether the educational qualifications of the teacher meet the requirements of the level he/she is teaching. According to national standards, primary education requires teachers with minimum qualification of Diploma from College of Teachers Education.

The performance of pupils in primary schools is greatly affected by the quality of the teaching staff. The Annual School Census 2011 captured the total number of teachers in the primary sector by zone and gender.

A total of 162,078 (66,381 Male and 95,697 Female) teachers were registered in all primary schools, with male teachers comprising a higher percentage of 59.0%. As illustrated from table 2.2.1, 2.2.2 and 2.2.3 below percentage of qualified teachers for primary first cycle schools at regional level is 73.8% (M=83.8% & F=79%), where as in primary second cycle schools the percentage of qualified teachers is 96.6% (M=96.0% & F=98.1%). The percentage of qualified full primary/1-8/ teachers is 86.9% (M=85.9% F=88.3%) at regional level. Consequently, the data indicates that the qualification of teachers is another area which needs special attention from concerned bodies particularly for primary first cycle.

Primary Natural Science and Mathematics Teachers

Findings of National Learning Assessment and other studies revealed that; primary school students' performance in Mathematics and Science as poor. Students were passive participants in classroom. That is why the project called SMASEE (Strengthening Mathematics and Science Education in Ethiopia) has been launched and implemented for the past few years. The premise behind this project is that there is strong association between teachers' competency and students' performance in Mathematics and Science education and needs to improve teachers' competency in teaching Mathematics and Science.

Data of natural Science and Mathematics teachers for primary schools has been also collected and identified in Government and non-Government Schools. Accordingly table 2.2.5 below indicates that there were 61,881 (Male=39,491 and Female=22,390) natural science and mathematics teachers in primary schools. Among all 162,078 primary school teachers of the region, natural science and mathematics teachers have a share of 61,881 (38.2%). These indicate more than 1/3rd of teachers in the region are involved in science and mathematics, which shows our recruitment of teachers, is on the right track that realizes the intention of country towards science and technology.

Regarding to gender participation among 61,881 natural science and mathematics teachers 39,491 (41.3%) were Male and 22,390 (33.7%) were Female. Specifically among 61,881 teachers 12,662 (20.5%) of them are graduates of Mathematics, 5,931 (10%) in Physics, 6,337 (10%) in Chemistry, 8,332 (13%) in Biology and 24,743 (40%) in Natural Science and 3,876 (6%) in mathematics and basic science.

2.2.2. Different Ratios in Primary Education

I. Primary Education Pupil Teacher Ratio

This is one of the most common indicators of quality education used in educational planning. It is believed that a lower number of pupils per teacher indicate that pupils will have better chance of contact with their teachers with in manageable class room. The standard set for pupil teacher ratio for primary education is 50:1. Findings from 2011 school census reveal that the overall PTR of the year is 49:1 as indicated in table 2.2.8 below:

It is indicated in the findings that, West Hararge, Guji, East Hararge and West Shoa zones are with the highest PTR by having 65, 61, 59 and 57 respectively in 2011 (2018/19 G.C.) This might be due to low attraction and retention of teachers in the area as compared with the Administrative Towns such as Gelan, Lega Tafo Lega Dadi, Burrayyu, Sebata and Dukam with the lowest Ratio of 22, 28, 29, 30 and 30 respectively, where attraction and retention is high. This can be lessened by increasing incentive schemes for teacher like; constructing more teachers' houses and improving the social infrastructure in those Zones with higher Student to Teacher Ratios is recommendable. As shown in Graph 2.2.1 below, the PTR trend of the last six years shows that it has been improving at a rate of 5%.

II. Primary Education Pupil Section Ratio

Pupil section ratio (PSR) is also one of the educational quality indicators that indicate average number of pupils per class rooms. It gives a rough estimation of class size, assesses the efficiency of resource utilization and it also used to assess the teaching- learning process. The standard set for pupil section ratio for primary education is 50:1. But as can be seen from graph 2.2.2 below the trend of PSR of the last five years in the region haven't reached the standard. Rather, as it is indicated on the graph, the trend of last five years of PSR in primary school has moved from 57:1 in 2007 to 58:1 in 2011 (2018/19 G.C). Furthermore, on the table 2.2.8 below PSR of 2011 (2018/19 G.C.) has shown at zonal and administrative town.

Accordingly, West Hararge, East Hararge, Guji, West Arsi and Jimma zones are with the highest PSR by having 79, 70, 67, 64 and 64 respectively in 2011 (2018/19 G.C.) On the other hand, Administrative Towns such as Galan, Burayu and Lega Tafo Lega Dadi are with the lowest PSR by having 35, 35 and 36 respectively.

Primary Schools Facilities

Research has found that school facilities can have a profound impact on both teacher and student outcomes. With respect to students, school facilities affect health, behavior, engagement, learning, and growth in achievement. Thus, researchers generally conclude that without adequate facilities and resources, it is extremely difficult to serve large numbers of children with complex needs. In this publication some school facilities availability and their status has been tried to be analyzed. Some of these school facilities include toilet, water, electricity, laboratory and others.

I. Primary Schools Toilet Availability

As can be seen from table 2.2.11 below among 14,730 primary schools in the region 13,493 of them (91.6%) have reported as they have toilet. Still large number of schools has no toilet for their students that may contribute for high dropout of students in the system especially of girls. The condition of the toilets can be categorized as improved (55.1%) and traditional (40.6%) respectively.

Concerning ownership, among 13,671 government owned and 1059 non-government organizations owned primary schools in the region 12439 (91.0%) and 1054 (100%) schools have reported that they have toilet. In the same table availability of toilet is also shown by zone and administrative towns. Accordingly, among the 19 administrative towns 14 of them reported that all their primary schools have toilet. Among the 20 zones East Hararge, Borana, Bale, West Guji and West Hararge zones have the least percentage of toilet availability by having 72%, 73.6%, 82.7%, 85.0% and 85.4% respectively.

II. Primary Schools Water Availability

Water is one of the most school facilities that schools must own. According to the 2011 (2018/19 G.C) school census among the 14,730 primary schools in the region only 4232 (28.7%) reported that as they have water. Most of primary schools 10,498 (71.3%) in the region has no water for their students that may contribute for high dropout of students in primary schools. Concerning ownership, among 13,671 government owned schools only 3,247 (23.8%) and from 1059 None-government organizations owned primary schools 985 (93%) schools in the region have reported that they have water. Table 2.2.12 below shows availability of water by zone and administrative towns. Accordingly, among the 19 administrative towns 5 of them reported that all their primary schools have water. Among the 20 zones

Guji, West Guji, Ilu Aba Bora, Buno Beddelle, East Hararge and West Hararge zones have the least percentage of water availability by having only 12.8%, 13.7%, 14.1%, 18.1% and 18.3% respectively.

III. Primary Schools Electricity Availability

Electricity is also one of the most school facilities that schools must own. But among the 14,730 primary schools in the region only 3941 (26.7%) reported that as they have electricity. Most of primary schools 10,789 (73.2%) in the region have no electric. Concerning ownership, among 13,671 government owned and 1059 none-government organizations owned primary schools in the region only 2958 (21.6%) and 983 (92.8%) schools have reported that they have electricity. Table 2.2.15 below shows availability of electricity by zone and administrative towns. Accordingly, among the 19 administrative towns all have registered above the regional average and 8 of them reported that all their primary schools have electricity. Among the 20 zones West Hararge, East Hararge, Bale and Kellem Wollega zones have the least percentage of electricity availability by having only 11.8%, 15.5%, 17.6% and 17.7% respectively.

Primary Schools Library and Laboratory Availability

I. Primary Schools Library

A library is an important source of knowledge to young minds in schools. It develops the important habit of reading among the students. The school library plays a great role in the life of students by serving as the store house of knowledge. The importance of a library in a school cannot be over emphasized. So that, every school should have a library. While the role of the school library remains constant, its design, digital platform, strategies and tools could change as technology changes.

Availability of the libraries in primary schools in 2011 (2018/19 G.C) has shown in table 2.2.16 below. Accordingly, among 14,730 primary schools in the region only 6,853 (46.5 %) of them have reported that they have library. Borena, East Hararge, West Hararge, West Guji and Guji zones have the least availability of library by having 11%, 18%, 25%, 29% and 35% respectively. Concerning administrative town all of them have availability above the regional average.(i.e 47%)

II. Primary Schools Laboratory

Recent studies in Ethiopia indicated that students beginning from lower grades have serious knowledge deficits in science and mathematics; this signifies that the quality of science education in primary and secondary schools, which is critical foundations for latter educational development, is at crisis. A high-quality science education in primary schools contributes to developing scientific literacy and would be expected to influence students to study the enabling sciences at secondary education. So as strengthen science education in primary schools' availability of science laboratory in schools is important. A science laboratory is a workplace for the conduct of scientific research. It helps students to remember the concepts better. It helps to transfer the experience to other learning situations. It is a facility that provides controlled conditions in which scientific research, *experiments* and measurement may be performed.

Information of laboratories in primary schools of the year 2011 (2018/19 G.C) has also shown in table 2.2.16 below. Regarding laboratory among 14,730 primary schools in the region only 1726 (12%) of have reported that they have laboratory. Among the 20 zones and 19 administrative

towns only Modjo, Jimma, Woliso and Adama administrative towns have reached availability of laboratory above 50%.

Primary Schools Finance

The Government funding procedure is passed through two steps process. The first involves fiscal transfers from the federal government to the regions and the second from regional governments to *woredas*. Accordingly, Woredas allocate the block grant for primary and secondary general education and the regional education Bureau for preparatory schools, based on the enrollment they had. Additionally, the GEQIP school grant also allocated accordingly based on the number of students enrolled in pervious academic year.

However, all levels of schools independently generate additional budget from different sources, for example by generating their internal income, community participation and NGO donation. Tables 2.2.18 below illustrate the overall revenue of Government primary schools. It demonstrates the financial information of the year, which was collected from the annual school census questionnaire. The tables indicate revenue of the region by zonal level.

Table 2.2.18 Government Primary Schools Revenue

2.4 Quality Indicators of Secondary & Preparatory Education

Among the major educational inputs those contribute a remarkable role to ensure quality of secondary education are the availability of sufficient and qualified teachers, class size and text books. As compared to the primary education the percentage of qualified teaches, pupil-teacher ratio and pupil-section ratio are better for secondary& preparatory education in the region. The minimum qualification required for first cycle is BEd/ BA/BSc and is MEd/MA/MSc. for preparatory school teachers.

2.4.1. Secondary & Preparatory Education Teachers, Principals and Vice Principals

I. Secondary & Preparatory School Teachers qualification

The strength of any educational system largely depends on the quality and commitment of its teachers. The teacher is the most important resource in an education system in any society. The teacher also plays a major role in the delivery of quality education.

As per the education policy, a secondary school teacher in Ethiopia should hold at least a first degree. The performance of pupils in secondary schools is greatly affected by the quality of the teaching staff.

The Annual School Census 2011 captured the total number of teachers in secondary & preparatory schools by zone and gender. The information about secondary and preparatory teachers has illustrated in tables 2.4.1, 2.4.2, 2.4.3, 2.4.4, and 2.4.5 below. Accordingly there were a total of 36,390 (M=30,517 and F=5,873) teachers where 27,589 (M=22,425 and F=5,164) are in secondary (9-10) and 8,801 (M=8,092 and F=709) in preparatory schools respectively. The percentage of qualified teachers for secondary schools at regional level is 95.2% (M=95.4% & F=94.2%). The percentage of qualified preparatory school with degree and above qualification is 95.9% (M=96.2% & F=96.1%) whereas with qualification of Masters and above the qualified percentage of teachers fails to 24.6% (M=24.4 & F= 27.2%) at regional level. Consequently, the data indicates that the qualification of teachers especially of preparatory schools needs special attention from concerned bodies.

I. Secondary and Preparatory schools Grade 9-10 and 11-12, Natural Science & Mathematics Teachers Information

Information about Science and Mathematics teachers in secondary and preparatory schools also collected to show the ratio among all teachers. According to table 2.4.7 below among all 36,390 secondary and preparatory schools teachers in the region 39.6%, 14,416 (Male=12,779 and Female=1,637) were natural science and mathematics teachers. Specifically, among 14,416 SMASEE teachers 4,610 (31.98%) of them are graduates of Mathematics, 3,286 (22.79%) in Chemistry, 3,232 (22.42%) in Physics and 3,288 (22.81%) in Biology.

Table 2.4.7 Secondary Grade 9-12, Natural Science & Mathematics Teachers by Specialization

2.4.2. Different Ratios in Secondary and preparatory Education

I. Secondary and Preparatory schools Teacher to Pupil Ratio

Teacher to student ratio of secondary & preparatory education (9-10) and (11-12) in 2011 (2018/19 G.C) at zones and administrative towns is shown in table 2.4.16 below. Accordingly, teacher to pupil ratio of secondary (9-10) & preparatory (11-12) education were 1:28 and 1:28 respectively. As data shows Borena, North Shoa, South West Shoa, Bale, Gelan & L/T/L/Dadhi Administrative town have the least teacher to student ratio in secondary first cycle (9-10) which are 1:16, 1:23, 1:23, 1:23, 1:20 and 1:24 respectively. On the other hand Robe 1:48 and Shashemenne 1:34 Administrative towns, Kellem Wollega & West Wollega zone, Administrative towns like Batu, Bishoftu, Holota, Woliso all are registered the highest teacher to student ratio which is 1:32.

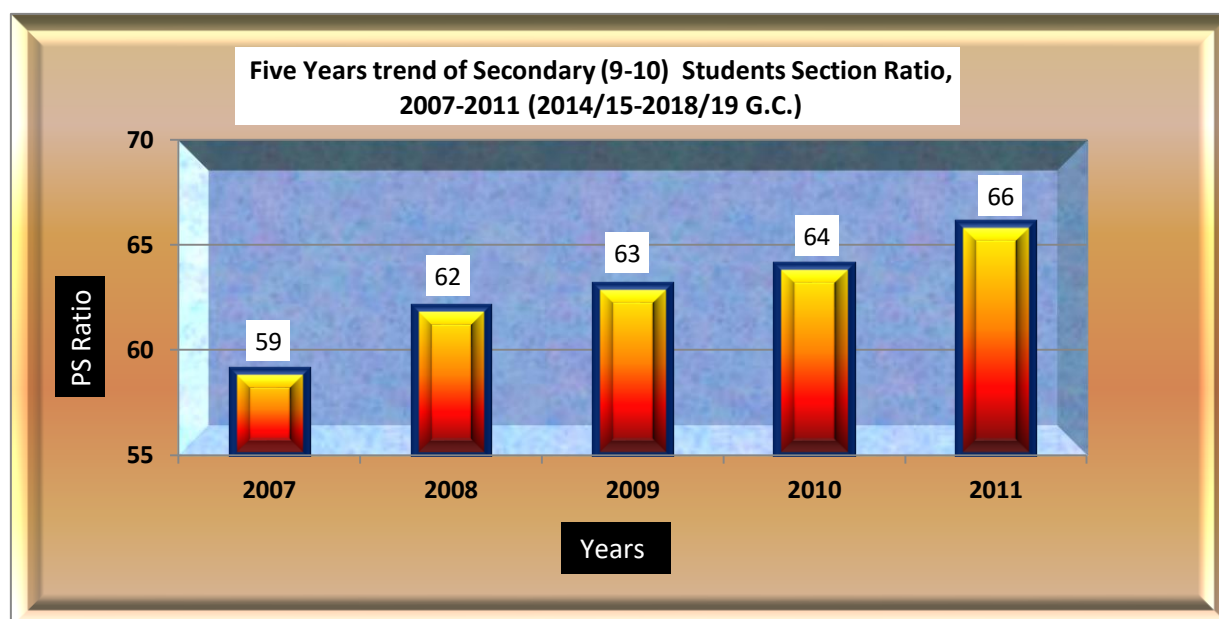

In preparatory grades (11-12) Bishan Guracha, Gelan Administrative towns, East Shoa, OSZS Finfinne Zones and Sululta Administrative towns have the least teacher-student ratio which is 1:5, 1:10, 1:14, 1:14 and 1:14 respectively. On the other hand, West Shoa, Horo Guduru Wollega, East Wollega, West Wollega Zones and Nekemte Administrative Town have registered the highest teacher to pupil ratio which is 1:37, 1:38, 1:39, 1:40 and 1:48 respectively.

II. Secondary and Preparatory schools Section to Pupil Ratio

Graph 2.4.1 Five Years trend of Secondary (9-10) Section pupil Ratio

As can be seen from graph 2.4.1 above, the trend of Section pupil ratio for secondary first cycle /9-10/ has been increasing from year to year. Accordingly; it was 1:59 in 2007 and rose to 66:1 in 2011. As shown in table 2.4.17 below section to pupil ratio of secondary & preparatory education (9-10) and (11-12) in 2011 (2018/19 G.C) were 1:66 and 1:62 respectively.

As data shows East Hararge, West Gujii, Guji, West Hararge and West Wollega Zones have relatively maximum section to pupil ratio in secondary first cycle (9-10) which are 1:79, 1:75, 1:70, 1:70 and 1:70 respectively. Among the 19 administrative towns Batu, Robe and Bishan Guracha Administrative towns have registered the lowest section to student ratio which is 1:93, 1:90 and 1:72 respectively.

In preparatory grades (11-12) schools among 20 zones Horo Guduru Wollega, West Wollega, East Wollega, West Shoa and West Guji have the maximum section to pupil ratio which is 1:75, 1:74, 1:72, 1:72, 1:30 and 1:66 respectively. Concerning Administrative towns; Robe, Ambo and Woliso Administrative town have registered the highest section to pupil ratio which is 1:78, 1:77 and 1:73 respectively.

2.4.3. Secondary and Preparatory Schools Facilities

Researchers conclude that without adequate facilities and resources, it is extremely difficult to serve large numbers of students with complex needs. In this publication some secondary school facilities availability has been compiled. Some of these school facilities include water, toilets, electricity, library, laboratory, internet, computers and others.

I. Secondary and Preparatory Schools Water Availability

Water is one of the most school facilities that secondary and preparatory schools must own. Accordingly, among the 1465 secondary and preparatory schools in the region only 835 (57.0%) reported that as they have water. Concerning ownership, among the 1,359 government owned secondary and preparatory schools in the region 731 (53.8%) and all 106 (100%) none-government organizations owned schools have reported that they have water. Table 2.4.19 below shows availability of water by zone and administrative towns. Accordingly, among the 19 administrative towns all (100%) secondary and preparatory schools in 14 of them reported that they have water. Among the 20 zones Ilu Aba Bora, West Guji, Guji, Buno Beddelle and Borena zones have the least percentage of water availability by having only 23.1%, 32.5%, 34.5%, 35% and 35.9% respectively.

Although number of schools reported that they have water are 835 this number has increased to 870 when they are counted by source of water, for the reason that some schools may get water from more than one source. Accordingly as shown in table 2.4.20 among the 870 secondary and preparatory schools those reported that they get water from different source, 322 (37%) of them get water from pipeline in school compound. If it is analyzed by ownership as shown in table 2.4.21 below among the 731 government owned secondary and preparatory schools those reported that they get water 273 (37.3%) of them get water from pipeline in school compound. As shown in table 2.4.22 below among the 106 none-government organizations owned secondary and preparatory schools those reported that they have water by source, 104 (98.1%) of them reported that they get water and 49 (47.1%) of them get water from pipeline in school compound.

II. Secondary and Preparatory Schools Toilet Availability

As can be seen from table 2.4.23 below among 1,465 secondary and preparatory schools in the region 1,347 (91.9%) of them have reported as they have toilet. Still 8.1% schools have no toilet for their students that may contribute for high dropout of girls. Concerning ownership, among 1,359 government owned and 106 non-government organizations owned secondary and preparatory schools in the region 1,243 (91.4%) and 100 (94.3%) schools have reported that they have toilet.

In the same table availability of toilet is also shown by zone and administrative towns. Accordingly, among the 19 administrative towns in 15 administrative towns secondary and preparatory schools reported that they have 100% toilet. Among the 20 zones, secondary and preparatory schools only in OSZS Finfinne Zone has 100% availability of toilet. But Buno Beddelle, Borana and Bale zones have the least percentage of toilet availability by having 70.0%, 74.4% and 80.3% respectively.

Table 2.4.24 below also shows the condition of the toilets in secondary and preparatory schools. Accordingly among the 1,347 secondary and preparatory schools those have toilet, 925 (68.7%) of them have improved toilet and 422 (31.3%) of the have traditional toilets. By ownership category among 1359 government owned secondary and preparatory schools in the region 928 (68.3%) of them have improved toilet and 431 (31.7%) have traditional. Among 106 non-government organizations owned secondary and preparatory schools 92 (88.5%) of them have improved toilet and 14 (11.5%) have traditional toilet.

III. Secondary and Preparatory Schools Electricity Availability

Electricity is also one of the most necessary school facilities that secondary and preparatory schools must have. As can be seen from table 2.4.25 below among the 1,465 secondary and preparatory schools in the region 1,153 (78.7%) of them reported that as they have electricity. Concerning ownership, among 1,359 government owned and 106 none-government organizations owned secondary and preparatory schools in the region 1047 (77.04%) and 106 (100%) of the schools have reported that they have electricity.

In the same table below the availability of electricity by zone and administrative towns has been elaborated. Accordingly, among the 19 administrative towns unlike Ambo (83.3%) and L/T/L/Dadhi (75%) administrative towns, schools in the other 17 towns have reported that they have electricity. Among the 20 zones Borena, Bale, Buno Beddelle and West Guji zones have the least percentage of electricity availability by having only 66.7%, 65.8%, 62.5% and 62.5% respectively.

Table 2.4.26 below also shows electricity availability by source electric power at regional, zonal and administrative town level. Accordingly, among 1,153 secondary and preparatory schools those have reported that they have electricity at regional level, 1017 (88.2%) of them reported that they get electricity from hydro. On the other hand, out of 1,359 government owned and 106 none-government organizations owned secondary and preparatory schools those reported that they have electricity, 1047 (87.3%) and 103 (97.2%) of them get electricity from hydro respectively.

V. Secondary and Preparatory Schools Library and Laboratory Availability

a. Secondary and Preparatory Schools Library

The importance of library in schools is un debatable. So that, every school should have a library. While the role of the school library remains constant, its design, digital platform, strategies and tools could change as technology changes.

Availability of libraries in secondary and preparatory schools in 2011 (2018/19 G.C) has shown in table 2.4.30 below. Accordingly, among 1,465 secondary and preparatory schools in the region only 1132 (77.3%) of them have reported that they have library. Among the 20 zones Bale and Buno Bedele zones have the least availability of library by having 61.8 % and 57.5% respectively. Concerning administrative towns in the region, only Sululta (50.0%) administrative towns have registered below the regional average.

b. Secondary and Preparatory Schools Laboratory

A high quality of science education in secondary schools contributes to developing scientific literacy and would be expected to influence students to study the enabling sciences at higher education. So as strengthen science education in secondary schools' availability of science laboratory in schools is important. A science laboratory is a workplace for the conduct of scientific research. It helps students to remember the concepts better and to transfer the experience to other learning situations. It is a facility that provides controlled conditions in which scientific research, *experiments* and measurement may be performed.

Information of laboratories in secondary and preparatory schools of the year 2011 (2018/19 G.C) has also shown in table 2.4.30 below. Regarding laboratory among 1,465 secondary and preparatory schools in the region only 595 (40.6%) of them have reported that they have laboratory. Among the 20 zones and 19 administrative towns, secondary and preparatory schools only in Modjo, Lege Tafo Lege Dadhi and Robe administrative towns have 100% laboratory availability.

CHAPTER THREE: EDUCATION INTERNAL EFFICIENCY

3.1. Primary Education Internal Efficiency

The term "internal efficiency" of education refers to a comparison of learning (a non-monetary outcome of education) to the costs of educational inputs; the analysis typically employed is cost-effectiveness. The internal efficiency of an educational system concerns the optimal use of resources (inputs) in producing its outputs.

The Internal Efficiency Rate (IER) is the ratio of number of student's years that should be, ideally spent to carry out a certain number of students at the end of primary cycle out of the number of students-years effectively spent.

Internal Efficiency Rate (IER) is calculated with different methods such as Transverse, Longitudinal and Pseudo-Longitudinal Methods. In this case we have deployed a Longitudinal Methods for calculating internal efficiency rate.

Formula for Calculating IER by Longitudinal Method

$$IER = \frac{(\text{Survival Rate for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

Table 3.1.1 Primary education Internal Efficiency Rate (IER)

Internal Efficiency Rate (IER) of the Year 2011 (2018/19 G.C)									
Grades	G1	G2	G3	G4	G5	G6	G7	G8	
Survival Rates/Retention Rates	100	65.12	52.65	48.73	44.43	37.05	33.99	29.19	
Efficient Students-years	234								
Effective Students-years	411								
IER	0.57								
1-IER (wasted Resource)	0.43								

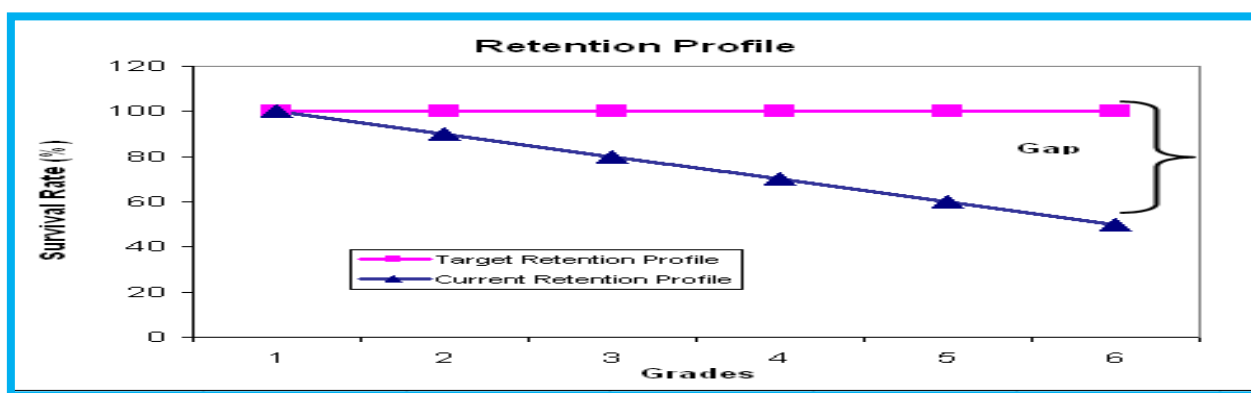

Interpretation of the Internal Efficiency Rate

Internal Efficiency Rate is a number between 0 and 1. The more this ratio is close to 1, the more the system is efficient. It is complementary to 1 (1-IER) is interpreted as the percentage of resources wasted, because these resources have been used to finance dropouts and repeaters.

Retention Profile

The retention profile is, constituted by the series of survival rate at each grade level. It measures the capacity of the system to keep students in the system until they complete their schooling. Data required to determine retention profile are enrolment and news entrants by grade at least for two years. As shown on figure 3.1.1, a flat graph constitutes retention ideal for the system (no dropout). Conversely, a slanted graph reflects the scale of dropout throughout the cycle and indicates low internal efficiency.

Figure 3.1.1 Retention Profile

Survival Rate (SR)

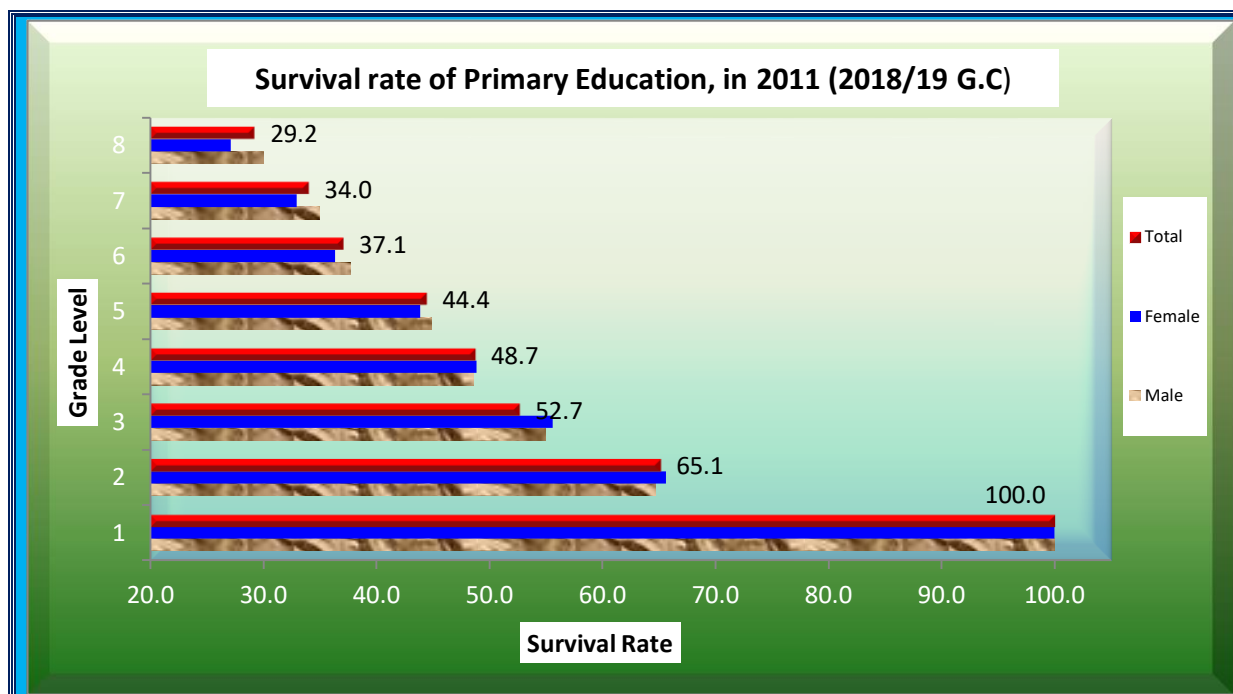

A survival rate approaching 100% indicates a high level of retention and low incidence of dropout. Survival rates may vary from grade to grade, giving an indication of grades with relatively more or less dropouts. The distinction between survival rates with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

The data required to calculate survival rate are, new entrants by grade for consecutive years of the total duration of education level. For instance, in Ethiopia, we need data for 8 consecutive years and population at the official school entrance age 7 years for primary education, as shown on table 3.1.2

Table 3.1.2 Survival Rate of Primary Education, in 2011 EFY

Graph 3.1.2 Survival Rate of Primary Education, in 2011 (2018/19 G.C)

3.1.1. Internal Efficiency and Flow Rate

The quantitative goals of education systems are not limited to increasing the number of children enrolled but also to ensure that children who begin a cycle complete it (do not quit and do not repeat). Indeed, the pedagogical programs of each cycle are developed in such a way as to progressively provide learners with a coherent and self-reinforcing set of knowledge and skills. The early abandon of a cycle is thus likely to result in the partial or total loss of the knowledge and skills acquired in the years effectively attended.

Promotion, Repetition and Dropout rates are the paths of student flow from grade to grade and characterize the efficiency of the education system in generating graduates. These rates are used for evaluating, monitoring and projecting the efficiency of students flow in our education systems. In this publication the primary education system of Oromia can be evaluated in terms of promotion rate, repetition rate and dropout rate.

3.1.1.1. Primary Education Promotion Rate (PR)

Promotion Rate is the proportion of pupils enrolled in a given grades that reach the next grade in the following year. The data required in this calculation is new entrants in grade **j** for year **T** and enrolment in grade **j-1** for year **T-1**. It is also interpreted as a high level of promotion rate indicates a high level of retention or survival rate.

$$PR = \frac{\text{New entrants in grade } j \text{ for year } T}{\text{Enrolment in grade } j-1 \text{ for year } T-1} \times 100$$

Graph 3.1.3. Primary Education Promotion Rate

3.1.1.2. Primary Education Repetition Rate (RR)

I. Repetition Rate

Repetition Rate is the proportion of pupils enrolled in a given grade for a given year who studied in the same grade for the previous year. Data required for this calculation is repeaters of grade **j**, in year **T** and enrolment of grade **j** of year **T-1**. It is interpreted as a high level of the repetition rate indicates a high level of repetition of grades. Repeating has impact on the system, because

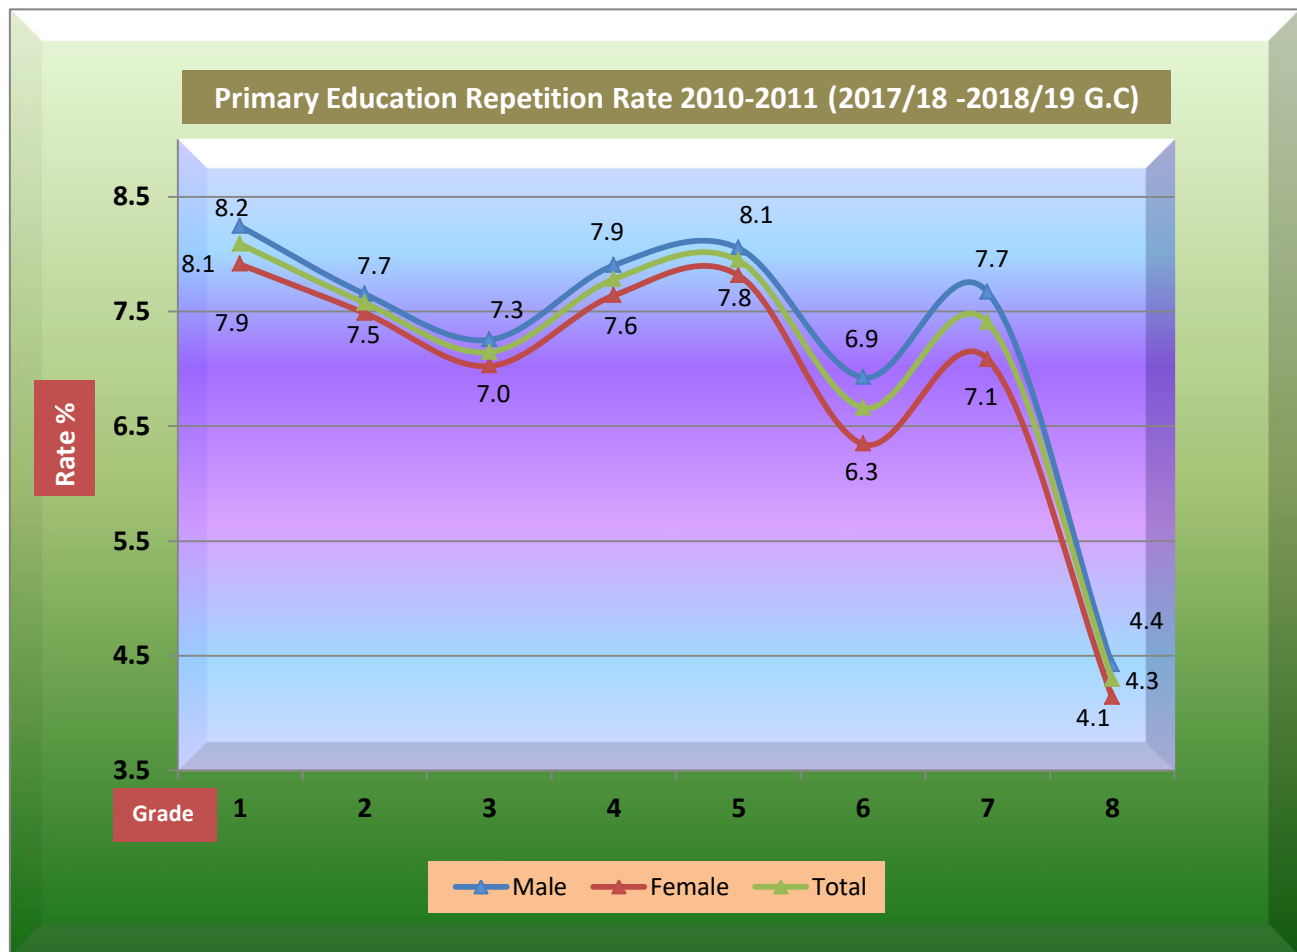

1. Repeaters have wasted the resources they had used while they repeat in the same grade.
2. They occupied a school space that can be used by the other new comers.

The formula to calculate Repetition Rate is;

$$RR = \frac{\text{Repeaters of grade } j, \text{ year } T}{\text{Enrolment of grade } j, \text{ year } T - 1} \times 100$$

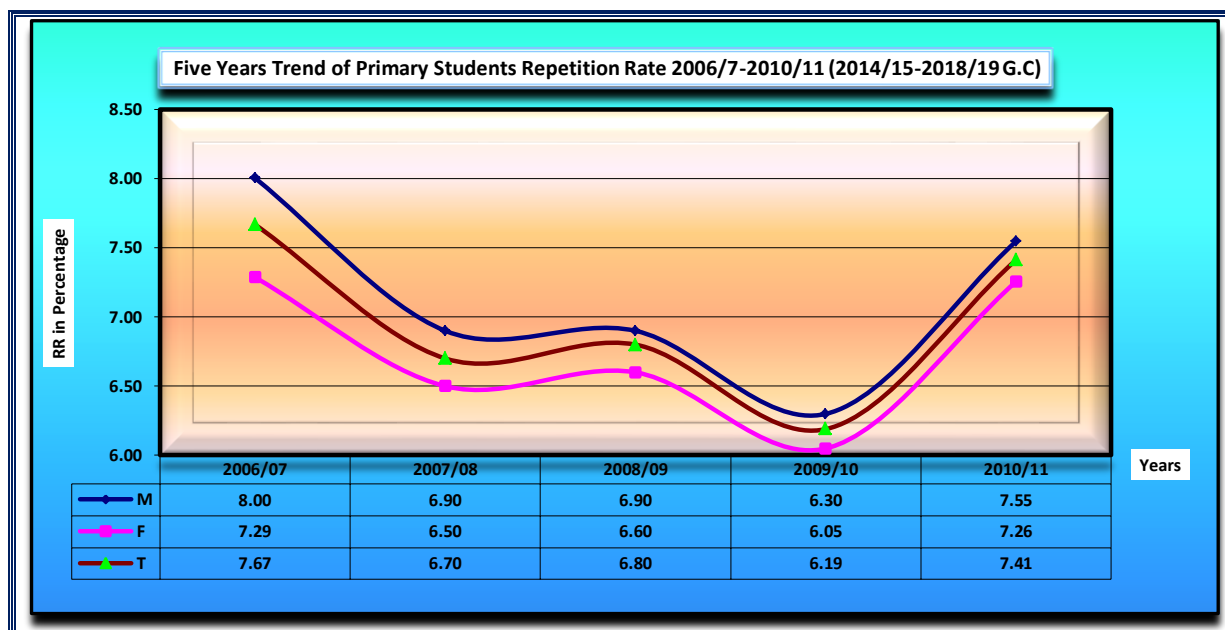

Grap

Graph 3.1.4. Primary Education Repetition Rate

As the graph shows, the repetition rate from grade 1 to 7 is almost at similar stage and the female repetition rate is a bit less than male in all grades. However, the grade 8th repetition rate is highly slanted down than all of other grades.

Graph 3.1.5 Five Years Trend of Primary Students Repetition Rate

As shown in graph 3.1.6 above the trained of repetition rate has slightly decreased from 7.67% in 2006/07 EFY to 6.19% in 2009/10 and inclined-up to 7.41% on its original place where it started in 2010/11 EFY.

3.1.1.3. Primary Education Dropout Rates (DR)

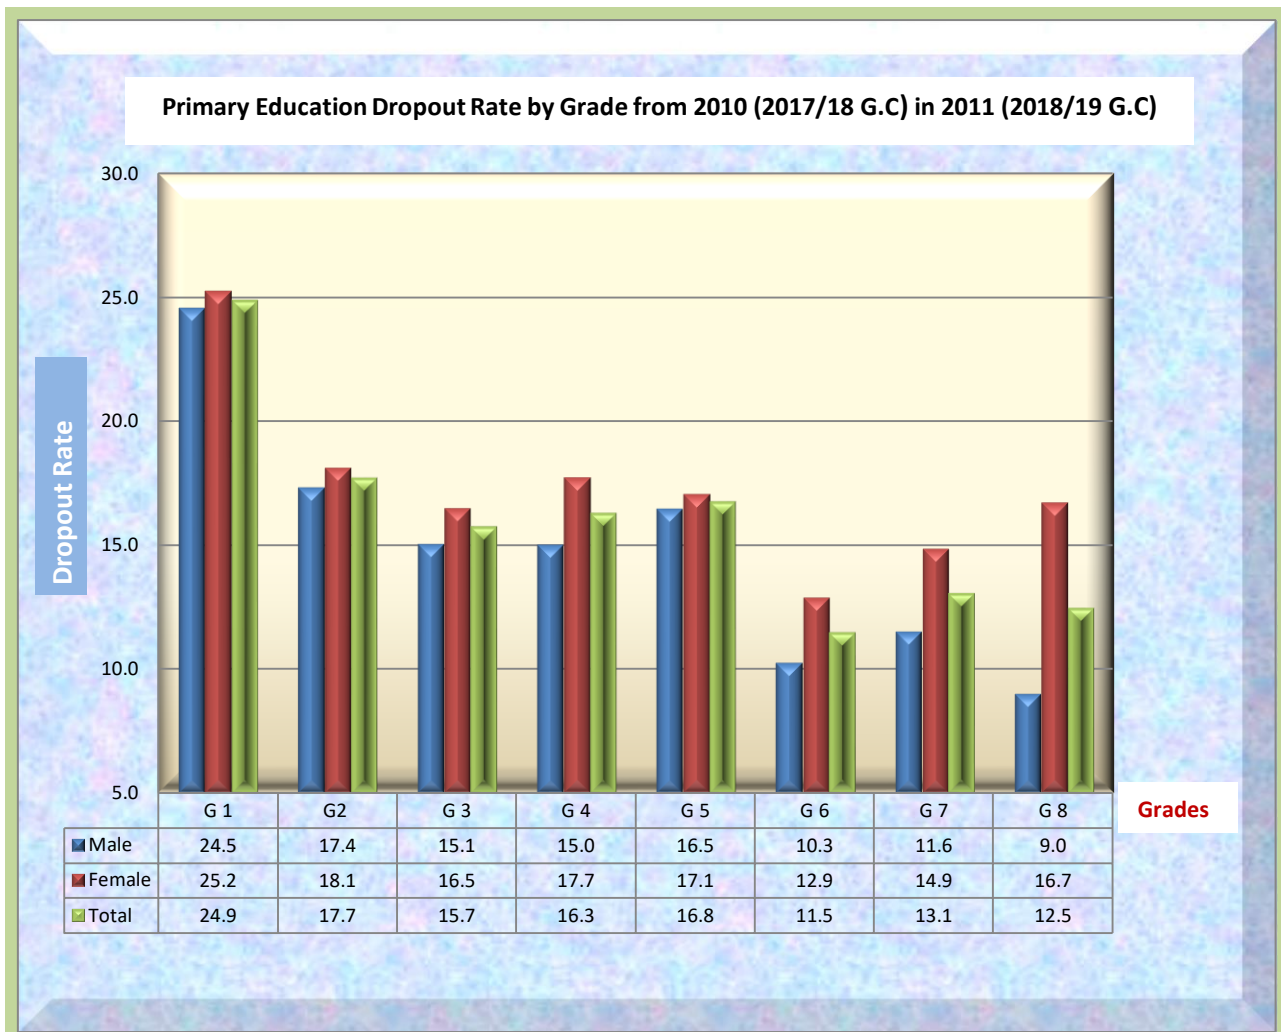

Dropout rate is proportion of pupils who withdraw from education system for more than one year. It corresponds to the difference between one hundred and the sum of promotion rate and repetition rates. Data required for the calculation of dropout rate are, Promotion Rate and Repetition rate. Dropout problem has different impact on the system. Because;

1. Dropouts have wasted the resources.
2. They occupied a school space, which could use the other new comers if they readmitted.
3. They have not acquired the minimal levels of literacy and numeracy if they dropped out in early grades.

The formula to calculate dropout is,

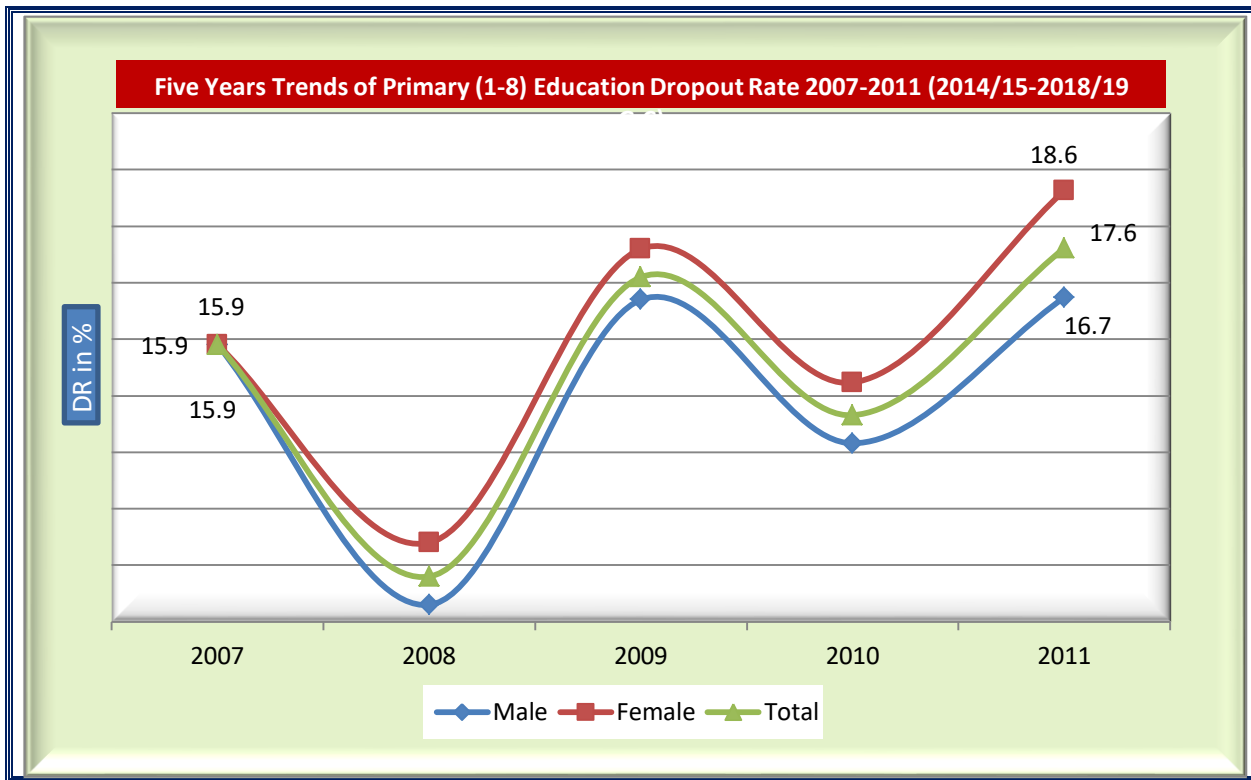

$$\text{Drop-out Rate} = 100 - (\text{Promotion Rate} + \text{Repetition Rate})$$

Graph 3.1.6 Primary Education Dropout Rate by Grade

As shown on graph 3.1.7, the Dropout rate is higher in Primary first cycle especially in grade one and two as compared to primary second cycle grade six and seven. It was 24.9% at grade 1 and 12.5% at grade 8. Apparently graph 3.1.8 below indicates the comparison & trend of five years primary dropout. As shown, it has increased from 15.9% in 2007 to 17.6% in 2011 (2018/19 .G.C). Similarly, the trend of Grade 1 dropout on graph 3.1.9 shows that increasing from 22.8% in 2007 to 24.9% in 2011 (2018/19 G.C), so that the issue needs concern.

Graph 3.1.7 Five Years Trend of Primary Education Dropout Rates

Graph 3.1.8 Five Years Trend of Grade 1 Students Dropout Rates

Total		24.5	25.2	17.4	18.1	15.1	16.5	15.0	17.7	18.8	20.1	19.4	16.5	17.1	10.3	12.9	11.6	14.9	9.0	16.7	12.4	15.4	13.8	16.7	18.6	17.6

As shown on graph 3.1.4 above, the dropout rate in primary first cycle is higher as compared to primary second cycle by being 19.4% and 13.8% respectively. The primary dropout at regional level for the year 2011 (2018/19 G.C) is 17.6% (M=16.7% and F=18.6%). For zonal comparison, West Guji, West Hararge and East Hararge zones have the largest share of dropout rate by having 26.4%, 25.7% and 24.4% respectively. The three zones with better drop out rate are Horo guduru Wollega, West Wollega and East Wollega by having 8.1%, 9.2% and 11.5% respectively. Concerning administrative towns' dropout rate in all of them is less than the regional average. Specifically, Asela, Holeta and Nekemte Administrative towns have the least dropout rate which is 2.2%, 2.4% and 2.6% respectively.

3.1.1.4. Transition Rate (TR)

Transition Rate (TR) is the number of students admitted to the first grade of a higher level of **education** in a given year, expressed as a percentage of the number of students enrolled in the final grade of the lower level of **education** in the previous year.

It is calculating by dividing the number of new entrants in the first grade of the specified higher cycle or level of education by the number of pupils who were enrolled in the final grade of the preceding cycle or level of education in the previous school year, and multiply by 100.

Data required is the enrolment in the final grade of a given cycle or level of education for year t and new entrants to (or enrolment minus repeaters) the first grade of the higher cycle or level of education for year t+1. Method of calculation for TR of Primary education is the following;

$$\text{Grade 4 Transition Rate or TR to grade 5}^{\text{th}} = \frac{\text{New entrants in 5 th for Year T}}{\text{Enrolment of 4 th for Year T - 1}} \times 100$$

$$\text{Grade 8 Transition rate or TR to grade 9}^{\text{th}} = \frac{\text{New entrants in 9th for Year T}}{\text{Enrolment of 8th for Year T - 1}} \times 100$$

Interpretation: as the high transition rates indicate a high level of access or transition from one level of education to the next. They also reflect the intake capacity of the next level of education. Inversely, low transition rates can signal problems in the bridging between two cycles or levels of education, due to either deficiencies in the examination system, or inadequate admission capacity in the higher cycle or level of education, or both.

Interpreting the regional primary education TR, most of administrative towns were registered the high score of TR, interpreted as the high level of transferring access to the next level were registered, additionally most of zones except North Shewa, East and West Hararge, have registered more than the regional average 77.3% on TR in 1st cycle primary, that means it indicates good performance in this regard. However, in 2nd cycle primary even though, the regional average is supposed to be higher than the 1st cycle 85.6%, thirteen zones and one administrative town registered less than the regional average as shown on tables 3.1.5 and table 3.1.6. As can be seen from graph 3.1.10 the trend of transition rate in primary 1st cycle is lower than primary second cycle for the last five years

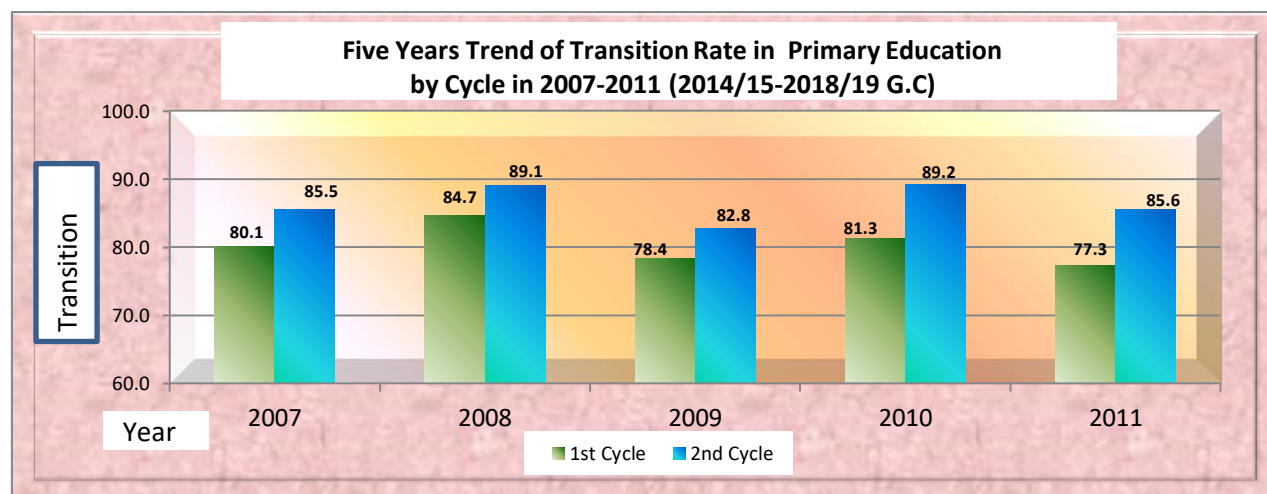

Table 3.1.5 Primary First cycle Transition Rate

Graph 3.1.9 Five Years Trend of Transition Rate in Primary Education

3.1.1.5. Primary Completion Rate

Primary completion rate is calculated by dividing the number of new entrants (enrollment minus repeaters) in the last grade of primary education, regardless of age, by the population at the entrance age for the last grade of primary education and multiplying by 100.

The Primary Completion Rate is internationally an established measure of the outcomes of an education system and calculated with the following formula, Where;

$$\text{Completion Rate} = \frac{\text{New entrant in last Grade}}{\text{Population of official age in last grade}}$$

“New entrant in last Grade” = (Total pupils in last Grade– repeaters in last grade)”

Interpreting the primary Completion Rate (CR) of the region, eleven zones have registered less than the regional average 82.2% in 1st cycle primary CR. however, the rest of zones and administrative towns were exceeding the regional average. Nevertheless, in 2nd cycle primary even though, the regional average is lower than the 1st cycle of 55.3%, fourteen zones were registered less than the regional average as shown on tables 3.1.7 and table 3.1.8. However, most of administrative towns registered CR of 100% in both 1st cycle and 2nd cycle. Occasionally, the primary completion rate can exceed 100 percent for many reasons, such as; the numerator may include late entrants and overage children who have repeated one or more

grades of primary education as well as children who entered school early, while the denominator is the number of children at the entrance age for the last grade of primary education.

Table 3.1.7. Grade 5 Completion Rate by Zone and Administrative town

3.2. Primary Education Cohort Analysis

A *cohort* is defined as a group of persons who jointly experience a series of specific events over a period of time. Accordingly, we may define a pupil cohort as a group of pupils who join the first grade of a given cycle in the same school year, and subsequently experience the events of promotion, repetition, dropout or successful completion of the final grade, each in his/her own way.

To apply the cohort method, data on enrolment by grade for two consecutive years, together with data on repeaters by grade from the first to second year are sufficient to enable the estimation of three main flow-rates: promotion, repetition and dropout. Once obtained, these rates we can analyze the rates by grade to study the patterns of repetition and drop-out. Then they can be used to reconstruct a pupil-cohort flow in order to derive other indicators of internal efficiency. This is illustrated as follows.

Flow Rates Using Data on Enrolment and Repeaters

The methodology of the reconstructed cohort flow model is based on the fundamental concept that for pupils enrolled in a given grade in a given year, there can be only three eventualities: (a) some of them will be promoted to the next higher grade in the next school year; (b) others will repeat the same grade in the next school year; and (c) the remaining pupils will drop-out of school in the course of the year.

Hypothetical Flow Diagram of the Cohort through Primary Education

Assumption of the Cohort Analysis

The flow of a fictitious cohort of 1,000 pupils through the primary education cycle of our Region can be reconstructed as stated below, based on three assumptions:

1. At any given grade, the same rates of repetition, promotion, and drop-out apply, regardless of whether a pupil has reached that grade directly or after one or more repetitions, it also assumes that no pupil skips a grade, i.e., there is no double promotion.

2. There will be no additional pupils (new entrants) in any of the subsequent years during the life time of the cohort, other than original cohort of 1,000 pupils; and no in-migration or out-migrations throughout the cohort years.
3. Pupils in a grade are, allowed to repeat only twice. However, in reality a pupil may repeat a grade more than twice. In this case, the assumption remains constant and allows only for the repeating of the grade twice.

In analyzing hypothetical flow diagram of reconstruction cohort method of primary education system, one can analyze as follows. There were a total of 1,834,141 pupils registered in grade 1 in 2010.

Based on table 3.1.11, to reconstruct the history of 1,834,141 pupils entering grade 1, it is easier to express this starting cohort as an index of 1,000 pupils, and all operations are consequently translated in 'per thousand' terms. Thus, when applying each flow-rate for grade 1 to this fictitious cohort of 1,000 pupils (instead of the actual 1,834,141 pupils), one can easily find out that, 81 pupils repeated grade 1, (8.1%) 249 dropped-out (24.9%), and 670 were promoted to grade 2 (67.0%) and so on. It may be noted that the first diagonal row in the diagram table 3.1.11, is obtained by multiplying the successive promotion rates for successive grades and successive years. The repetition and dropout rates are then applied to obtain the second, the third and the fourth rows.

From this flow diagram, one can draw a number of interesting observations. For instance, out of the initial 1,000 pupils entering grade 1, only 120 graduated from the cycle without repeating any grade; 68 graduated with a one-year delay, i.e. they repeated once; 22 graduated with two years delay, i.e. they repeated twice.

In addition, this flow diagram enables the computation of the main indicators of internal efficiency. For example, the figures in the boxes below give the number of pupils reaching a particular grade, thus enabling the calculation of the survival rates by grade. One can observe that 729 out of the 1,000 pupils in the cohort (or 72.9%) reached grade 2. These figures can be easily derived from the upper part of the diagram, by summing the number of drop-outs from each grade and each year and subtracting that sum from the enrolment in the same grade. For grade 1 we

obtain $249+20+2 = 271$ drop-outs, which when subtracted from 1,000 would give 729 survivals. Finally

Multiplying graduates at the final grade by the number of grades ($210 \times 8 = 1,680$) would give the ideal number of pupil-years required to produce the graduates. The ratio between the latter and the actual number of pupil years used by the cohort as shown from table 3.1.11, i.e. 4,872, gives the coefficient of efficiency $(1,680 \div 4,370) * 100 = 0.384$ or 38.4%.

The years input per graduate (20.8 years) is obtained by dividing the total number of pupil-years spent by the cohort (4,370) by the total number of graduates (210). The years input per graduate can then be compared to the ideal number required, which is simply the duration of the education cycle 8 years of the cohort.

Table 3.1.13. Flow Rate in Primary Education (Female)

3.2.1. Internal Efficiency of the Cohort in Primary Education

3.2.1.1 Pupils Year by Grade of the Cohort

Table 3.1.14. Pupils Year by Grade of Cohort

Pupils Year by Grade of Cohort Analysis								
sex	Grade							
	1	2	3	4	5	6	7	8
M	1089	792	639	537	448	361	320	269
F	1085	784	625	515	415	331	286	231
Average	1088	787	632	527	432	347	305	252

I. Indicators of Retentions by Grade of the Cohort

A. Survival Rate of the Cohort

The purpose of survival rate of the cohort is to measure the retention capacity and internal efficiency of an education system. It illustrates the situation regarding retention of students from grade to grade in schools, and conversely the magnitude of dropout by grade. Survival rate is the proportion of cohort pupils who reached the subsequent grade expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. It also used to measure the impact of repetition and dropout on internal efficiency. Survival by grade of the cohort obtained by adding the number of pupils who eventually will promoted to the next higher grade. In each grade, some pupils promoted to the next grade without repeating a grade and others after repeating once or twice.

Table 3.1.15. Primary Education Cohort Analysis Survival Rate by Grade

Primary Education Cohort, Survival Rate by Grade (%)								
Sex	Grades							
	1	2	3	4	5	6	7	8
M	73.2	59.4	49.6	41.4	34.0	29.8	25.9	23.3
F	72.6	58.3	47.8	38.5	31.3	26.8	22.3	18.4
Average	72.8	58.8	48.7	40.0	32.6	28.5	24.3	21.0

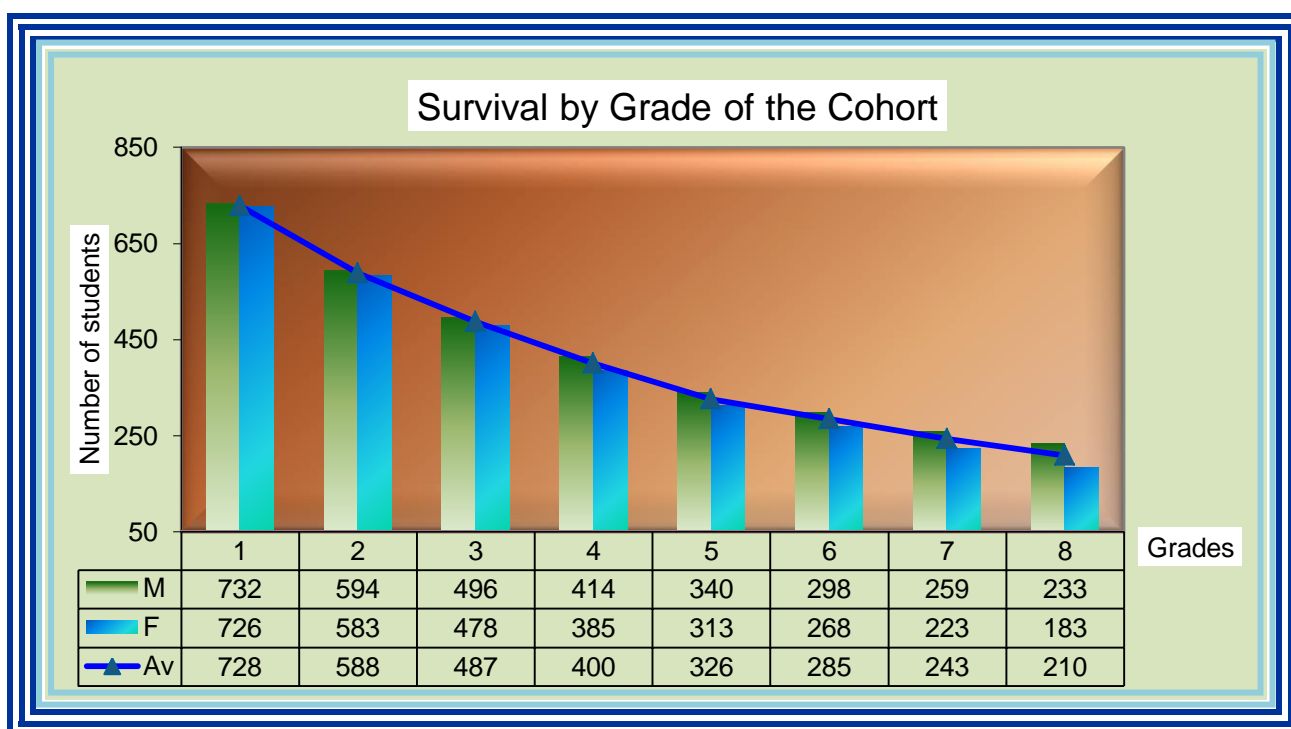

As the table 3.1.15 above shows, among 1000 cohort students enrolled in grade 1, only 72.8% (M=73.2%, F=72.6%) are survived to complete grade 1 in the cohort. The rest 27.2% (M=26.8%, F=27.4%) left the school before completing grade 1. In addition, 40.0% (M= 41.4% and F= 38.5 %) students survived to complete first cycle primary. From 1000 pupils started the cohort, only 21.0% (M=23.3%, F= 18.4 %) will finally survive at grade 8th. This shows,79.0% (M=76.7%, F=81.6%) of students left the system without completing primary education.

Survival rate by Cohort interpreted, as rates approaching to 100% indicate a high level of retention and low incidence of dropout. In the contrary as the rates far away from 100% the opposite will happen. Survival rate to the last grade of primary education is, of particular interest for monitoring Sustainable Millennium Development Goal-4. However, as our regional data indicates, since the survival rate of the cohort were very far away from the expected rates, it's clear that the gap were seen so that, the concerned bodies must give attention to consider the issue.

Table 3.1.16. Number of Pupils Survived in Each Grade of the Cohort

Number of Pupils Survived in Each Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	732	594	496	414	340	298	259	233
F	726	583	478	385	313	268	223	183
Average	728	588	487	400	326	285	243	210

Graph 3.1.10. Survival by Grade of the Cohort

As shown in the graph 3.1.11, as the levels of the grade increases from grade 1 to 8, the survival rates of student's were highly decreased. These shows high number of students leave the system

before completing grade 8th and it also shows the wastage seen due to dropout and repetition in the system

B. Dropout by Grade of the Cohort

As shown on table 3.1.17 below, most of the students left the system early in grade 1 and 2. About 27.0% (M=26.7%, F=27.4%) of the pupil of the cohort left the system before completing grade one. Majority of children leave the system at an early stage compared to dropouts at upper grades. This is an undesirable situation, to which planners and decision makers should pay immediate attention to it.

Table 3.1.17. Percentage of Dropout by Grade of the Cohort

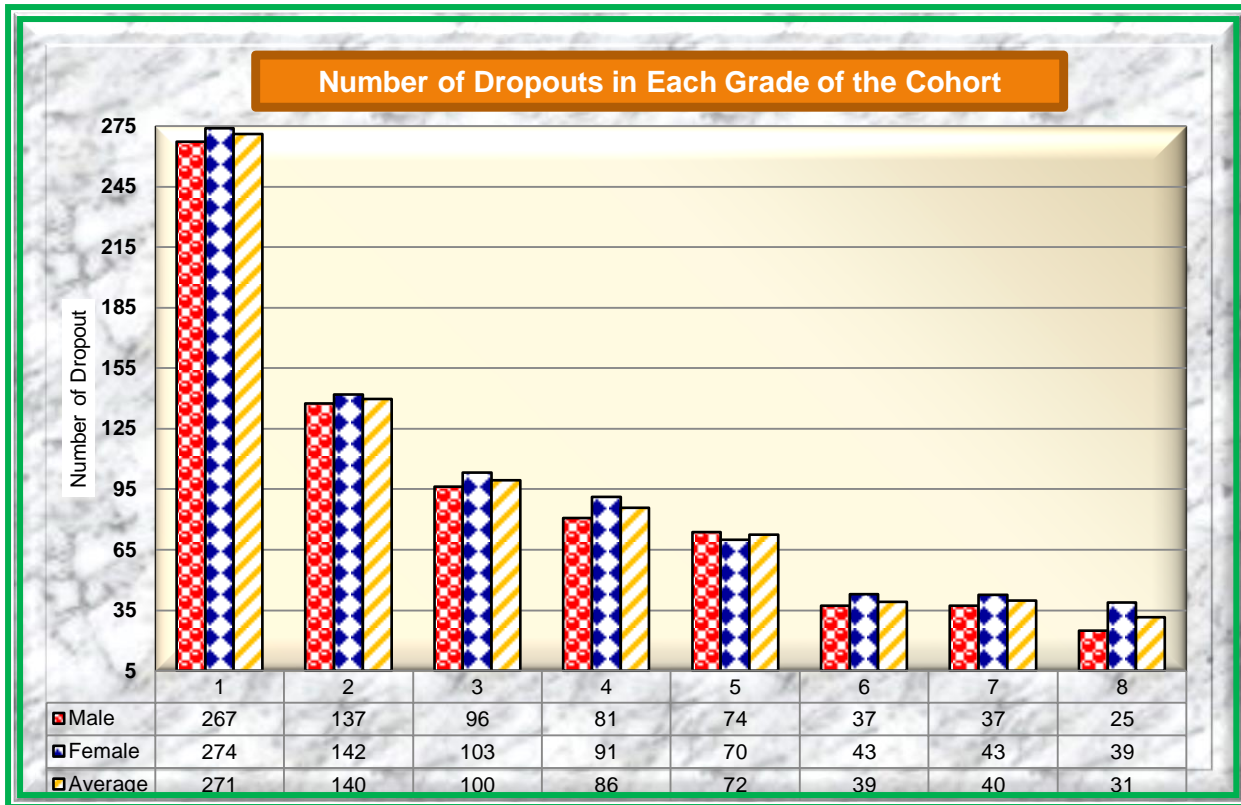

Percentage of Dropout by Grade of the Cohort (%)								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	26.7	13.7	9.6	8.1	7.4	3.7	3.7	2.5
F	27.4	14.2	10.3	9.1	7.0	4.3	4.3	3.9
average	27.0	14.0	10.0	8.6	7.2	4.0	4.0	3.1

Dropout is the proportion of students who leave the system at each grade. It is the most serious problem in education system. As the cohort data on the table 3.1.18 below shows, among the cohort of 1000 pupil, 271 of them left the school before completing grade one. However, as goes up from lower grade to higher grade the number of dropouts decreased gradually.

Table 3.1.18. Number of Dropout by Grade of the Cohort

Number of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	267	137	96	81	74	37	37	25
F	274	142	103	91	70	43	43	39
Average	271	140	100	86	72	39	40	31

Graph 3.1.11 Number of Dropouts in Each Grade of the Cohort

C. Repeaters by Grade of the Cohort

Table 3.1.19. Repeaters by Grade of the Cohort

Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	90	60	46	43	35	25	24	12
F	85	59	44	39	32	21	20	10
Average	89	60	45	41	34	23	23	11

The cohort data on the table 3.1.19 above shows that, among the cohort of 1000 pupils 89 of them repeated at grade one, number of repeaters gradually decreases from grade to grade while it goes up to the higher grade as shown on the table.

Graph 3.1.12 Number of Repeaters of the Cohort by Grade

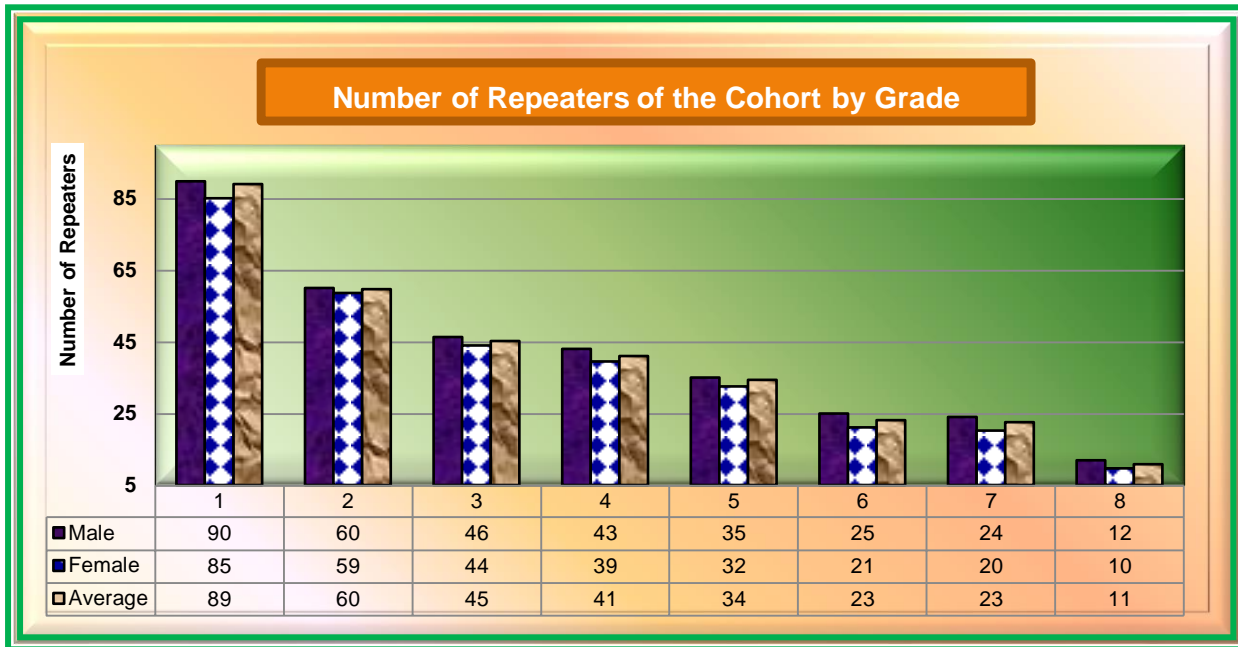

Table 3.1.20. Percentage of Repeaters by Grade of the Cohort

Percentage of Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	9.0	6.0	4.6	4.3	3.5	2.5	2.4	1.2
F	8.5	5.9	4.4	3.9	3.2	2.2	2.0	1.0
Average	8.9	6.0	4.5	4.1	3.4	2.3	2.3	1.1

Table 3.1.20 above shows that, 8.9 % (M=9.0%, F=8.5%) of pupils of the cohort repeats at grade 1. When we compare both levels, majority of children repeat in the early grades than the upper one.

D. Number of Graduates from the Final Years of the Cohort

Graduates from the final year is the number of pupils who eventually graduate (Complete) from the final year of the cycle. In other words, those who successfully complete primary first cycle of 4 years of the study and promoted to the first grade of second cycle primary (Grade 5), or those who successfully complete second cycle primary of 8 years of the study and promoted to first cycle secondary (Grade 9).

According, as shown on table 3.1.11, out of the cohort of 1000 pupils registered in 2010 E.C at grade one, 293 pupils' will graduate grade 4th without repeating any grade during their stay in school. Another 90 pupil's will also graduate grade 4th after repeating once and 17 of them will graduated after repeating twice in any of the grades. Accordingly, $(293+90+17) = 400$ of pupils were graduated the first cycle primary.

Similarly, 120 pupils will be expected to graduate grade 8th by 2017 E.C. without repeating, 68 pupils will graduate grade 8th in 2018 E.C by repeating once, and finally 22 pupils will also graduate grade 8th by 2019 E.C by repeating any of the grade twice. According to the cohort, the possible number of pupil graduates from the complete primary system or grade 8th is only 210. Therefore, only about 21.0% of the pupil's complete primary education out of 1000 pupils of the cohort. Unfortunately, in this case about, 790 (79.0%) pupils of the cohort will be leaving the system before completing primary education. Therefore, Educational planners, policy makers, decision makers, stakeholders and communities must work towards finding the solutions to improve this huge gap.

Table 3.1.21 Number of Graduates from the Final Year

Number of Graduates from the Final Year

Internal Efficiency in Secondary & Preparatory Schools

3.2. Secondary Education Promotion, Dropout and Repetition Rates

As table 3.2.1 below shows the Regional level average Repetition Rate (RR) of Grade 9th was 10.6% (M=11%, F=10%). As the data shows, some of Zones and administrative towns were above and below regional average. For instance, there are 25 zones and Administrative towns those registered below the regional average, amongst Buno Bedele zone, West Arsi zone and Burayu Admin town were from the top least of all, registered RR of (4.1%, 4.6% & 5.1%) respectively. whereas, 14 zones and Administrative towns were above regional average, South West Shewa zone, Dukem and Adama Admin towns were among the top highest of RR (25.5%, 19.6% & 19%) respectively.

Furthermore, as indicated on the table, the RR for grade 11th were registered as 3.4% (M=3.5%, F=3.2%) at Regional level. As the data shows, 27 zones and admin towns were registered below regional average including eight zones with 0 RR. However, 12 zones and admin towns were recorded above regional average, amongst, Adama Admin town, West Guji and Sebeta Admin town were from the top of highest having RR of (14.8%, 10.2% & 9.9%) respectively.

This table also elaborates, the Dropout Rate (DR) 12.8% (M=13.5%, F=11.8%) of grade 9th and 6.2% (M=6.9%, F=5.2%) of Grade 11th at regional level. The mean data have difference in values across the zones, by registering below and above Regional average. For instance, regarding to grade 9th, there are 25 zones and Administrative towns which registered below the regional average. Amongst West Guji, South West Shewa and Buno Bedele zones, were from the top least of DR registered (0.7%, 2.0% & 4.0%) respectively. whereas, 14 zones and Administrative towns were recorded above regional average, amid of those, East Wollega zone, Bishan Guracha and Bishoftu Admin towns were from top of highest having DR of (24.0%, 21.4% & 20.8%) respectively.

Regarding to Grade 11th DR, the table demonstrates that 22 zones and Administrative towns were below regional average, amongst, Jima zone, Batu Admin towns, West Shewa and Buno Bedelle were from top of least having DR of (0.3%, 0.3%, 0.5% & 0.5%) and 17 zones registered above the regional average, those are Kelem Wollega zone, Modjo Admin town and East Hararge Zone were among the very highest of DR (22.8%, 17.4% & 17.1%) respectively.

Chapter Four: Tertiary Education

4. College of Teachers Education (CTE)

Colleges of Teachers' Education (CTE) are institutions those aimed to train teachers for primary schools. There are 13 CTEs in the region in 2011 E.C, those have been striving to fulfill the desired teachers in quality and quantity wise for the sector in regular, evening and weekend diploma program, in addition to these instructions, they have been fully dedicated to in-service-training that helps TTI (certificate) teachers to upgrade to the Diploma level in summer program too.

In this publication enrolled, graduated and attrition of candidate teachers in different Diploma program as well as permanent and part time staff of CTEs are included.

Map 4.1 Distributions of Colleges of Teachers Education

4.1 Enrolment in Diploma Program

4.1.1 Enrolment in Regular Diploma Program

As can be seen from table 4.1 below of 13 CTEs, a total of 12,787 (8,259 male & 4,528 female) of which 35.41% are female candidate teachers were enrolled for regular diploma program, for three years study amongst; 1,508 (1,070 male & 438 female) and 11,279 (7,189 male & 4,090 female) candidate teachers have been attending training in linear and New modalities respectively.

4.1.2. Enrolment in Evening and Weekend Diploma Program

As Table 4.2 shows, 27,302 (16,656 male & 10,646 female) of which 38.99% are female candidate teachers were enrolled for evening and weekend diploma program in all CTEs. Amongst 917 (631 male & 286 female) and 26,385 (16,025 male & 10,360 female) candidates have been attending their training in Linear and New modalities respectively.

INDICATORS BY WOREDAS

In the above sessions of this publication the data and other statistical information have been presented by Zone and administrative town. From this page on words the data and other statistical information will be presented by Woreda and Administrative towns. There are about 317 Woredas and 19 administrative towns in our region. Some of the data and other statistical information we present by woreda here under are like number of institutions, number of enrolled students, AIR, NIR, GER, NER, internal efficiency; DOR, RR, PR, number of teachers, number of sections, schools' different facilities availability information and others.

Table 5.1: Perprimary Different Information by Districts 2011 (2018/19 G.C.)
